Notes to the Financial Statements

1. General

The Company is an open-ended investment company and was incorporated in Luxembourg as a SICAV (société d'investissement à capital variable) on 15 June 1990. The Company is a SICAV under part I of the Luxembourg Law of 17 December 2010, as amended, relating to undertakings for collective investment, which implements Directive 2014/91/EU ("UCITS V Directive").

FIMLUX is the Management Company of the Company, with the day-to-day responsibility for the administration, investment management and marketing/distribution functions of the Company.

As at 30 April 2025, the Company consisted of 128 active sub-funds. The Directors may from time to time close sub-funds as well as launch further sub-funds with different investment objectives, subject to the approval of the CSSF.

The following classes of Shares were launched during the year:

Investments in Indian securities within India Focus Fund are made partly via a wholly-owned Mauritian subsidiary, FIL Investments (Mauritius) Limited (the "Subsidiary"), previously called Fid Funds (Mauritius) Limited. The sole object of the Subsidiary is to carry out investment activities on behalf of the Company. FIL Investment Management (Singapore) Limited ("FIMSL") provides investment advisory and management services to the Subsidiary. FIMSL has obtained approval from the Securities and Exchange Board of India and the Reserve Bank of India to invest in India on its own behalf and on behalf of approved client accounts as a Foreign Portfolio Investor under Indian law. The Subsidiary is registered as a Foreign Portfolio Investor sub-account of FIMSL's licence and has been granted approval to invest in Indian securities. The assets and liabilities of the Subsidiary are consolidated in the Statement of Net Assets and all investments held by the Subsidiary are disclosed in the Schedule of Investments.

On 17 July 2024 a capital distribution was paid to investors of Emerging Europe, Middle East and Africa Fund side pockets classes of Shares ("SP"). Please refer to the Dividend Payments disclosed in note 10. For more details please refer to the announcement released on 10 July 2024 and available on <https://www.fidelity.lu/funds/fund-updates>.

On 30 July 2024, Sustainable Emerging Markets Ex China Fund was renamed Emerging Markets Ex China Fund, Sustainable Strategic Bond Fund was renamed Strategic Bond Fund, Sustainable Asian Bond Fund was renamed Sustainable Asia Pacific Bond Fund.

On 28 March 2025, 20 sub-funds changed their name, for more details please refer to the announcement released on 26 February 2025 and available on <https://www.fidelity.lu/funds/fund-updates>.

2. Significant Accounting Policies

The financial statements are prepared in accordance with generally accepted accounting principles in Luxembourg relating to undertakings for collective investment.

Calculation of the Net Asset Value. The Net Asset Value per share of each class of shares, is calculated by determining first the proportion of the net assets of the relevant sub-fund attributable to each class of shares. Each such amount will be divided by the number of shares of the relevant class outstanding as at close of business. The Net Asset Value of each class is determined in the principal dealing currency of the respective class.

Security Valuation. Investments in financial instruments traded on any stock exchange are valued at the last available price at the time when the valuation is carried out on the principal stock exchange on which such security is traded. Financial instruments dealt on any Over-the-Counter ("OTC") market, short-dated debt transferable securities and money market instruments not traded on a regulated exchange or market are valued at the last available price at the time when the valuation is carried out. For Cash Funds, Money Market Instruments are valued at Mark-to-Market or Mark-to-Model where the use of mark-to-market is not possible or the market data is not of sufficient quality. All other assets are valued with prudence and in good faith by the Directors of the Company on the basis of their reasonably foreseeable sales price. All holdings owned by the Company are quoted on a regulated market, except where otherwise distinguished in a sub-fund's Schedule of Investments.

Swing Pricing Policy. A swing pricing policy has been adopted and implemented to protect the interests of the Company's shareholders. The purpose of the price adjustment policy is to allocate the costs associated with large inflows and outflows to investors transacting that day, thereby protecting the long-term Shareholder from the worst effects of dilution. It achieves this purpose by adjusting the share class price at which deals in a sub-fund are transacted. As such, share class prices may be adjusted up or down depending on the level and type of investor transactions on a particular day within a sub-fund. In this way the existing and remaining Shareholders do not suffer an inappropriate level of dilution. The Company will only trigger an adjustment in the price when there are significant net flows likely to have a material impact on the remaining Shareholders. The adjustment will be based on the normal dealing costs for the particular assets in which a sub-fund is invested but will not exceed 2% of the price. The Board may decide to increase this adjustment limit in exceptional circumstances to protect Shareholders' interests. Once an adjustment is made to a share class price, that price is the official price for that share class for all deals that day. As at 30 April 2025, price adjustments were made on the following sub-funds:

Sub-fund name	Class of Shares	Unswung NAV per Share	Swung NAV per Share

Fair Value Adjustments Policy. Fair value adjustments may be implemented to protect the interests of the Company's Shareholders against market timing practices. Accordingly if a sub-fund invests in markets that are closed for business at the time the sub-fund is valued, the Directors may, by derogation from the provisions above under security valuation, allow for the financial instruments included in a particular portfolio to be adjusted to reflect more accurately the fair value of the sub-fund's investments at the point of valuation.

Bank Deposits and Cash at Banks and Brokers. All bank deposits and cash at bank and brokers amounts are carried at face value.

Investment Security Transactions. Investment security transactions are accounted for on the date securities are purchased or sold. The computation of the cost of sales of securities is made on the basis of average cost.

Futures. Futures are accounted for on the date of opening or closing of the contract. Subsequent payments are made or received by the sub-fund each day, dependent on the daily fluctuations in the value of the underlying index or security which are recorded for financial reporting purposes as unrealised gains or losses by the sub-fund. The unrealised gains or losses resulting from futures are included in the Statement of Net Assets and in the Schedule of Investments. The realised gains and losses are based on the First In – First Out method. All gains and losses on futures are disclosed in the Statement of Operations and Changes in Net Assets.

Forward Foreign Exchange Contracts. Forward foreign exchange contracts are valued on the basis of forward exchange rates prevailing at the closing date and applicable to the remaining period until the expiration date. The unrealised gains or losses resulting from forward foreign exchange contracts are included in the Statement of Net Assets and in the Schedule of Investments. All forwards, including those used for the hedging of share classes, are included in the Schedule of Investments. All realised gains and losses on forwards are disclosed in the Statement of Operations and Changes in Net Assets.

Option Contracts. Options purchased are recorded as investments at their realisable market value; options written or sold are recorded as liabilities based on the cost to close the position. Purchased and written options are included in the Statement of Net Assets and in the Schedule of Investments. When the exercise of an option results in a cash settlement, the difference between the premium and the settlement proceeds is accounted for as a realised gain or loss. When an option expires, the premium is accounted for as a realised gain for options written or as a realised loss for options purchased. All gains and losses on options are disclosed in the Statement of Operations and Changes in Net Assets.

Interest Rate , Inflation , Overnight Index & Total Return Swaps. Interest receivable and payable on interest rate, inflation, overnight index and total return swap contracts is accrued on a daily basis, and future commitments under the swap are valued at market rates. Interest rate, inflation, overnight index and total return swap contracts are disclosed in the Statement of Net Assets and in the Schedule of Investments. All gains and losses in the value of interest rate, inflation, overnight index and total return swaps are disclosed in the Statement of Operations and Changes in Net Assets. Income receivable/payable on interest rate, inflation, overnight index and total return swaps is included in income or expenses on an

accruals basis and is reflected in the Statement of Operations and Changes in Net Assets as Interest received/paid on swaps.

Credit Default Swaps. Premiums paid and received on credit default swap contracts to buy or sell protection against a credit event are accrued on a daily basis and reflected as net income. Future commitments under the swap are valued at market rates. Credit default swap contracts are disclosed in the Statement of Net Assets and the Schedule of Investments. All gains and losses in the value of credit default swaps are disclosed in the Statement of Operations and Changes in Net Assets.

Contracts for Difference. Contracts for difference are contracts entered into between a broker and the Company under which the parties agree to make payments to each other so as to replicate the economic consequences of holding a long or short position in the underlying security. Contracts for difference also mirror any corporate actions that take place. Dividends received or paid on contracts for difference are disclosed net in the Statement of Operations and Changes in Net Assets under the caption Derivative Income or Derivative Expenses. When a contract is closed, the Company records a realised gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The valuation of contracts for difference is based on the underlying security and they are disclosed in the Statement of Net Assets and the Schedule of Investments. The finance costs paid to the broker for holding the underlying security are included under the caption Finance costs on contracts for difference in the Statement of Operations and Changes in Net Assets. All gains and losses on contracts for difference are disclosed in the Statement of Operations and Changes in Net Assets.

Equity Linked Notes. Equity Linked Notes are valued daily based on the price of the underlying security and are disclosed in the Statement of Net Assets and the Schedule of Investments at market value. The intermediate coupon(s) and final payment at maturity are determined by the change in value of the underlying security. The interest income or "out performance" earned and any gains or losses are disclosed in Statement of Operations and Changes in Net Assets.

Foreign Exchange. The Directors determine the designated currency of each sub-fund. Assets and liabilities as at 30 April 2025 have been translated at the prevailing exchange rates on that date. All transactions denominated in foreign currencies during the year are translated into the subfund's designated currency at the exchange rate prevailing on the day of transaction.

Bonds in Escrow. Bonds included in the Schedule of Investments can be used as collateral against open derivative exposures. Where this is the case, bonds will be escrowed to prevent them from being traded. The following table discloses the bond's quantities in escrow per sub-fund:

Sub-fund name	Security description	Denominated quantity in escrow
Absolute Return Global Fixed Income Fund	US Treasury Bill 4.043% 22/05/2025	569,000

Fund share Transactions. The issue and redemption price per share of each sub-fund is the Net Asset Value per share on the date of trade, subject to the price adjustment policy.

Formation Costs. All formation costs related to the launch of the Company have been amortised. Costs incurred in launching new sub-funds will be charged to current operating expenses.

Income. Dividends on equities are recognised when the security is quoted ex-dividend. Interest is accounted for on an accruals basis.

Zero Coupon Disclosure. Zero coupon bonds and zero coupon money market instruments are disclosed in the Schedule of Investments at a rate reflecting the actual return.

Combined Accounts. The combined financial statements have been presented in USD which is the Company's designated currency and represent the total financial statements of the different sub-funds. Sub-funds stated in currencies other than USD have been converted at exchange rates ruling at the year-end.

3. Co-Management of Assets

For the purpose of effective management, where the investment policies of the sub-funds so permit, the Board of Directors may choose to co-manage assets of certain sub-funds within the Fidelity Funds range. In such cases, assets of different sub-funds will be managed in common. Fractions may result from the co-management technique. The value of these fractions is based on the market value of the underlying financial instruments in the portfolio of the co-managed sub-funds at the end of the year and is included in the total market value of the portfolio. Considering the insignificance of these amounts, they have been included as "Fractions" in the Schedule of Investments.

4. Investment Management Fees and Other Transactions with the Investment Manager or its Affiliates

Pursuant to the Investment Management Agreement amended and restated on 9 July 2020, FFML is entitled to a monthly investment management fee and asset allocation fee, accrued daily and based on the average Total Net Assets of each sub-fund, at annual rates disclosed in the table below:

Sub fund name / Class of Shares	Maximum annual investment management fee	Maximum asset allocation fee

During the year ended 30 April 2025, the sub-funds invested in the following fund shares: Fidelity ILF - The Sterling Fund - A-ACC-GBP, Fidelity ILF - The US Dollar Fund - A-ACC-USD and Fidelity ILF - The Euro Fund - A-ACC-EUR, all of which have their management fees capped at 0.25% per annum.

Performance Fees

The Investment Manager is entitled to receive an annual performance fee, which is calculated in relation to the net assets of classes of Shares of funds that have cash indices as Market Indices, and which is subject to a high water mark adjusted for the return of the relevant Market Index. The use of a High Water Mark is appropriate in a performance fee methodology for a class of Shares of a fund that seeks to achieve an absolute return annually. The use of a High Water Mark seeks to ensure that investors will not be charged a performance fee until any previous losses are recovered. There is no mechanism to lower the High Water Mark.

The basis for calculation of performance fees is fully explained in the Prospectus that all investors should read before investing. The relevant performance fee rates, hurdle rates and comparative indices for each sub-fund are as follows:

Sub-fund name	Performance fee	Hurdle rate	Comparative Index
Absolute Return Global Equity Fund	15%	N/A	Secured Overnight Financing Rate
Absolute Return Multi Strategy Fund	10%	N/A	Secured Overnight Financing Rate

The following table discloses the accrued yet uncrystallised performance fees for each share class as at 30 April 2025:

Sub-fund name	Class of Shares	Class Currency	Performance Fees	% of AUM
Absolute Return Global Equity Fund	A-PF-ACC Shares (USD)	USD	16,889	0.03
Absolute Return Global Equity Fund	A-PF-ACC Shares (EUR) (EUR/USD hedged)	EUR	3,069	0.00
Absolute Return Global Equity Fund	SE-PF-ACC Shares (EUR) (EUR/USD hedged)	EUR	22	0.05
Absolute Return Global Equity Fund	W-PF-ACC Shares (GBP) (GBP/USD hedged)	GBP	100	0.01
Absolute Return Global Equity Fund	Y-PF-ACC Shares (USD)	USD	10,349	0.02
Absolute Return Global Equity Fund	Y-PF-ACC Shares (EUR) (EUR/USD hedged)	EUR	7,988	0.01

The aforementioned percentages of Assets Under Management ("AUM") are determined based on the share class AUM as of the end of the year.

During the year under review, none of the Class of Shares of Absolute Return Multi Strategy Fund were paid performance fees.

Others

Classes B and C Shares are subject to an annual distribution fee of up to 1.00% of the Net Asset Value of the relevant class. Class D shares are subject to an annual distribution fee of up to 0.50% of the Net Asset Value of the relevant class. Class E shares are subject to an annual distribution fee of up to 0.75% of the Net Asset Value of the relevant class. These fees are accrued daily and payable quarterly to FIL Distributors ("FID"). The Reserved Funds' classes of shares may only be acquired by investors who are either Undertakings for Collective Investment or investors whose assets

are held in accounts managed by FIL or its affiliates. Expenses and charges, excluding investment management fees, administration expenses, government taxes and custodian fees for such classes of shares, will be charged to, and paid directly by, FIL and its affiliates. The investment management fees, administration expenses, government taxes and custodian fees for such classes of shares are charged to the sub-funds but are reimbursed in full by FIL and its affiliates.

FIL and its affiliates may waive any or all of their fees and limit the maximum level of expenses (with certain exceptions) that the sub-funds would be paying. These waivers are voluntary, may be revised at any time and are disclosed under the caption Fees waived in the Statement of Operations and Changes in Net Assets. In addition, FFML may from time to time bear certain expenses of the subfunds, on a discretionary basis, these reimbursements are disclosed under the caption Expense reimbursement in the Statement of Operations and Changes in Net Assets. Certain officers and directors of the Company are also directors, officers or employees of FIL or its affiliates.

FID is a wholly-owned subsidiary of FIL. In performing its activities as General Distributor of the Company, FID is entitled to receive a sales commission on sales of shares in the Company. For the year ended 30 April 2025, FID retained a total of USD 211,675 in sales commissions, the remainder is paid to intermediaries involved in distributing shares.

During the year ended 30 April 2025, the Company did not have transactions with connected persons and did not enter into any soft dollar arrangement.

5. Directors' Fees

Each Director is entitled to an annual fee of EUR 50,000. The Chair is entitled to an annual fee of EUR 100,000. There is an additional attendance fee of EUR 5,000 for each meeting attended. Directors who are employed by FIL or any of its subsidiaries have waived their fees for the year ended 30 April 2025. The total fees earned by the Directors in respect of services rendered for the year ended 30 April 2025 was USD 490,233.

6. Securities Lending

As at 30 April 2025, the Company lent securities having a value of USD 1,221,798,890 and received collateral with a market value of USD 1,286,141,586. During the year ended 30 April 2025, the Company paid USD 964,657 to the securities lending agents in relation to the securities lent. With respect to securities lending transactions, the Company will generally require the borrower to post collateral representing, at any time during the lifetime of the agreement, at least 105% of the total value of the securities lent. The following table discloses the breakdown of the total value of securities on loan, by sub-fund, as at 30 April 2025:

Sub-fund name	Currency	Maturity Tenor	Securities Values	% of Lendable Assets	% of AUM

The following table provides the breakdown of the total value of securities on loan by counterparty and the total collateral market value by counterparty as at 30 April 2025:

Counterparty	Total Value USD	Collateral Market Value USD	Country	Clearing Type
Goldman Sachs	383,889,461	406,113,721	United Kingdom	Bilateral
Barclays Bank	242,944,397	253,004,725	United Kingdom	Bilateral
Merrill Lynch	190,631,272	200,304,653	United Kingdom	Bilateral
UBS	135,023,963	141,964,796	United Kingdom	Bilateral
Morgan Stanley	103,651,292	110,243,435	United Kingdom	Bilateral
Societe Generale	64,323,218	67,557,253	France	Bilateral
BNP Paribas	44,691,783	47,160,559	France	Bilateral
J.P Morgan	31,598,124	33,437,097	United Kingdom	Bilateral
ING Bank	21,086,920	22,184,590	Netherlands	Bilateral
HSBC	3,958,460	4,170,757	United Kingdom	Bilateral

The collateral which consists of government bonds is held by the securities lending agents and is not reflected in the financial statements. The collateral has not been reused. There are no restrictions on the reuse of collateral. As at 30 April 2025, the analysis of collateral received on securities lending was as follows:

Collateral Type	Total Value USD	Collateral Quality	Maturity Tenor of Collateral	Collateral Currency
Government Bond	140,489,319	A1	Above 1 Year	JPY
Corporate Bond	26,349,299	Aa3	Above 1 Year	EUR
Government Bond	243,036,986	Aa3	Above 1 Year	EUR
Government Bond	486,553,325	Aa3	Above 1 Year	GBP
Government Bond	2,600,110	Aaa	Above 1 Year	CAD
Government Bond	60,307,890	Aaa	Above 1 Year	CHF
Government Bond	155,393,960	Aaa	Above 1 Year	EUR
Government Bond	171,410,697	Aaa	Above 1 Year	USD

Income from securities lending of USD 8,048,331 is included in the net dividend and interest income balance within the Statement of Operations and Changes in Net Assets.

Brown Brothers Harriman (BBH) and Citibank act as agent lender for the Company for equity and fixed income lending, respectively. The allocation of income from the equity and fixed income lending as at 30 April 2025 is as follows:

Equity securities lending programme

The relevant sub-funds retain 90% of income and BBH retains 10%.

Fixed income securities lending programme

The relevant sub-funds retain 87.5% of income and Citibank retains 12.5%.

The analysis of income on securities lending for the year was as follows:

7. Taxation

The Company is not liable to any Luxembourg taxes on income or on realised or unrealised capital gains, nor to any Luxembourg withholding tax. The sub-funds are subject to an annual subscription tax of 0.05% on Equity, Equity Income, Asset Allocation, Multi Asset, Bond, Fidelity Lifestyle Funds and Institutional Reserved Funds Class Y Shares, 0.01% on Cash, Reserved, Class P, R, X and I Shares, and 0.00% on Index tracker Funds, calculated and payable quarterly on the Net Assets of the sub-fund on the last day of each calendar quarter.

Foreign capital gains, dividends and interest may be subject to capital gain and withholding taxes or other taxes imposed by the country of origin concerned and such taxes may not be recoverable by the Company or its Shareholders. Where there is a reasonable likelihood that a liability will crystallise, the tax payable on the unrealised gain is provided for in the NAV.

8. Transaction Fees

Transaction fees are fees paid to brokers when buying and selling equities, CFD's, futures, options and exchange traded funds. Transaction fees are generally included in the costs of investments that are part of the realised and unrealised gain/(loss) in the Statement of Operations and Changes in Net Assets. A portion of the transaction fees are included in the custody fees in the Statement of Operations and Changes in Net Assets. Transactions fees on Bonds and Swaps are not disclosed as they are included in the spread.

For the year ended 30 April 2025, these transaction fees amount to:

9. Equalisation

Income equalisation arrangements are applied to all share classes (accumulating and distributing), across all sub-funds. For distributing shares, these arrangements are intended to ensure that the income per share which is distributed in respect of a distribution period is not affected by changes in the number of shares in issue during that period. The calculation of equalisation is based on net investment income. All equalisation amounts are disclosed in the Statement of Operations and Changes in Net Assets.

10. Dividend Payments

The following dividend payments were made during the year ended 30 April 2025:

Sub-fund name	Div per Share	Ex-div date	Sub-fund name	Div per Share	Ex-div date
ASEAN Fund A Shares (SGD)	0.0265	01-Aug-2024	Asia Equity ESG Fund A-MCDIST (G) Shares (SGD) (SGD/USD hedged)	0.0026	03-Feb-2025

18. Claims for Discriminatory Withholding Taxes within the European Union

Investment funds are generally subject to local withholding taxes on receipt of cross-border payments of dividends throughout Europe. However, European Court of Justice and European Free Trade Association Court decisions support a tax discrimination claim where EU or European Economic Area ("EEA") countries impose such withholding taxes on cross-border payments at rates higher than the withholding tax imposed on dividends paid in similar situations to resident investors.

The Board of the Company has therefore authorised the filing of protective claims, based on the EU principle of the freedom of movement of capital within the EU & EEA, against countries where it is believed that withholding taxes may have been unlawfully imposed by individual EU or EEA States on dividend payments to the Company. The Board's decision has been taken exclusively to protect the position of investors in the Company.

The nature of these claims is complex and subject to each jurisdiction's local statute of limitations and procedural requirements. Consequently, these claims may be subject to lengthy litigation, and at the current time there is no certainty whether all the protective claims will ultimately be successful and whether or how much withholding tax will ultimately be recovered in each of the jurisdictions. During the year ended 30 April 2025, no reclaims were received. The Withholding tax reclaims receivable are included in the Dividend and interest receivable in the Statements of Net Assets.

19. Statement of Changes in Investments

A list for each sub-fund, specifying for each investment the total purchases and sales which occurred during the year under review, may be obtained free of charge from the Registered Office of the Company or from any of the companies registered as Distributors of the Company. It is possible to receive information about the full holdings of the sub-funds in which you invest, at any point in time during the year. This is available upon request, by contacting your usual Fidelity Representative.

20. Rates of Exchange

The USD exchange rates as at 30 April 2025 are noted below. For the Chinese Renminbi currency, please note that the offshore rate is applied. RMB is a colloquial reference to the Chinese Renminbi, which is also known internationally as the Chinese Yuan ("CNY"). Whilst the CNY is traded both onshore in China and offshore (primarily in Hong Kong), it is the same currency although currently traded at different rates. The offshore rate for trading CNY is generally referred to as 'CNH'. The CNH rate will be used when determining the value of the Shares of a fund as well as for hedging purposes and should be read as the base currency of China RMB Bond Fund in the whole report.

Currency	Exchange rate	Currency	Exchange rate
Australian dollar (AUD)	1.563111	Norwegian krone (NOK)	10.3917

REPORT OF THE *REVISEUR D'ENTREPRISES AGREE*

Opinion

We have audited the financial statements of Fidelity Funds (the “Company”) and of each of its sub-funds, which comprise the statement of net assets and the schedule of investments as at 30 April 2025 and the statement of operations and changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company and of each of its sub-funds as at 30 April 2025, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the *Commission de Surveillance du Secteur Financier* (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the *réviseur d’entreprises agréé* for the Audit of the Financial statements” section of our report. We are also independent of the Company in accordance with the Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Company is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the *réviseur d’entreprises agréé* thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Company for the Financial Statements

The Board of Directors of the Company is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Company is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Company either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the *réviseur d'entreprises agréé* for the Audit of the Financial Statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the *réviseur d'entreprises agréé* that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Company.
- Conclude on the appropriateness of the Board of Directors of the Company use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the *réviseur d'entreprises agréé* to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the *réviseur d'entreprises agréé*. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

For Deloitte Audit, *Cabinet de révision agréé*

Laurent Fedrigo, *Réviseur d'entreprises agréé*
Partner

Luxembourg, 30 July 2025

Global Market Risk Exposure

The Board of Directors of the Company has decided to adopt the commitment approach to determine the global market risk exposure for the Company, except for the below mentioned sub-funds:

The global market risk exposure information for the year ending 30 April 2025 is as follows:

Sub-Fund	Global Risk calculation Method	VaR model	Reference Portfolio	VaR limit	Lowest utilisation of VaR limit	Highest utilisation of VaR limit	Average utilisation of VaR limit	Average level of leverage reached during the year
Global Multi Asset Defensive Fund	Absolute VaR	Monte Carlo Simulation	N/A	8%	21.70%	40.05%	30.34%	204.45%
Multi Asset Dynamic Inflation Fund	Absolute VaR	Monte Carlo Simulation	N/A	20%	12.94%	26.79%	19.57%	530.64%
Emerging Market Total Return Debt Fund	Relative VaR	Monte Carlo Simulation	50% JP Morgan GBI-EM Global Diversified Composite 25% JP Morgan CEMBI Broad Diversified 25% JP Morgan EMBI Global	150%	53.76%	78.02%	65.47%	162.73%
Flexible Bond Fund	Absolute VaR	Monte Carlo Simulation	N/A	10%	22.07%	41.45%	26.97%	300.33%
Strategic Bond Fund	Absolute VaR	Monte Carlo Simulation	N/A	10%	15.65%	25.95%	20.19%	220.61%
Structured Credit Income Fund	Absolute VaR	Monte Carlo Simulation	N/A	20%	1.99%	3.81%	2.58%	39.97%
Absolute Return Global Equity Fund	Absolute VaR	Monte Carlo Simulation	N/A	9.5%	30.71%	40.20%	36.67%	199.52%
Absolute Return Global Fixed Income Fund	Absolute VaR	Monte Carlo Simulation	N/A	10%	0.10%	24.74%	14.00%	198.81%
Absolute Return Multi Strategy Fund	Absolute VaR	Monte Carlo Simulation	N/A	20%	4.12%	14.20%	8.88%	381.82%

For the above mentioned sub-funds, the global exposure is calculated and monitored daily by using the Value at Risk (VaR) calculation methodology. Monte Carlo Simulation: 5000 Simulations, 99% Confidence, 20 days holding period.

EU Securities Financing Transactions Regulation

The Securities Financing Transaction Regulations (SFTR), which came into effect on the 13 January 2017, requires further transparency regarding the use of securities financing transactions.

The Company may use total return swaps or other financial derivative instruments with similar characteristics to meet the investment objective of the Company.

The Company used contracts for difference (CFD), total return swap (TRS) and securities lending for the year ended 30 April 2025.

The top 10 counterparties are disclosed in note 6 for the securities lending and in note 17 for CFD.

As at 30 April 2025, there was only collateral received from collateral issuers (governments and international institutions) for securities lending as shown in note 6.

Assets engaged in securities financing transactions as at 30 April 2025

The assets engaged, expressed in absolute value and as a proportion of the net assets, by category of securities financing transactions as at 30 April 2025 amounted to:

The assets engaged in securities lending are disclosed in note 6.

Shareholders Rights Directive II

On 20 August 2019, the Grand Ducal Law of 1 August 2019 amended the Law of 24 May 2011 on the exercise of certain shareholder rights. This law transposes, for Luxembourg, the Directive (EU) 2017/828 (the Shareholders' Rights Directive II). It entered into force on 24 August 2019.

The information on the Portfolio turnover ratio (PTR) and the Portfolio turnover cost (PTC) are disclosed in the fund factsheet except for the sub-fund below. SRDII does not define a methodology for these values; ours is as follows: $PTR = (\text{purchases of securities} + \text{sales of securities}) \text{ minus } (\text{subscriptions of units} + \text{redemptions of units})$, divided by average fund value over the prior 12 months multiplied by 100. Any funds' trading in Fidelity Institutional Liquidity Funds is excluded from the PTR calculation. $PTC = PTR \text{ (capped at 100\%)} \times \text{transaction cost}$, where transaction cost is calculated as ex-post (i.e. prior 12 months) MiFID disclosure of portfolio transaction costs minus implicit costs.

The risks factors are available in the section Risk Descriptions of the prospectus.

Sub-fund name	Status period	PTR %	PTC %
Greater China Fund II	01/05/24 - 30/04/25	170.43	0.27

For French residents only

For the year under review, the following sub-funds have invested in securities eligible to PEA (Plan d'Épargne en Actions), a French tax wrapping in accordance with article L 221-31 of the French monetary and financial code.

Sub-fund name	% of Net Assets
Germany Fund	99.77
Italy Fund	97.60
Nordic Fund	95.36
Iberia Fund	94.84
Sustainable Eurozone Equity Fund	94.50

For Hong Kong residents only

The Manager and/or the Investment Manager may enter into trades for the account of a Sub-Fund with: (i) the accounts of other clients managed by the Manager, the Investment Manager or its affiliates; or (ii) their house accounts (i.e., accounts owned by the Manager, the Investment Manager or any of its connected persons over which it can exercise control and influence) ("cross-trades"). Such cross-trades will only be undertaken in accordance with the relevant requirements promulgated by the relevant authorities. During the year ended 30 April 2025, the Company did not enter into any cross trade.

For UK residents only

The affairs of the Company have been conducted to ensure as far as possible that United Kingdom Reporting Fund Status will be granted for the period of these accounts with respect to the sub-funds and Share classes that are registered in the United Kingdom. With respect to UK registered sub-funds and Share classes in existence prior to the introduction of the new regime the Company has applied to the UK Inland Revenue to transition into the new regime and the UK authorities have given notice that they accept this entry. Moreover, the Company has submitted an application for the reporting funds regime for UK registered sub-funds launched during the accounting year ending 30 April 2025. It also submitted or will submit an application for new Share classes in existing or new UK registered sub-funds launched during the accounting period. Reportable income figures are generally available six months after the year end date. The distributing sub-funds and Share classes of the Company that were registered in the UK at the time have also been certified as "distributing funds" by the UK Inland Revenue authorities under the predecessor regime for all accounting periods up to 30 April 2010.

Taxonomy

Where a sub-fund is not identified as subject to the disclosure requirements of article 8 or article 9 of the EU Sustainable Finance Disclosure Regulation, the sub-fund is subject to Article 7 of the EU Taxonomy Regulation (EU) 2020/852 and the investments underlying such sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Remuneration**Remuneration Disclosure**

FIMLUX is a UCITS licensed Management Company and wholly owned subsidiary of FIL. The FIL Group, consisting of FIL and its subsidiaries, has approved a remuneration policy which is applicable to all constituent parts of the group. In addition FIMLUX has its own remuneration policy which closely reflects the FIL group policy. In the implementation of its policy, FIMLUX will ensure good corporate governance and promote sound and effective risk management.

Remuneration Policy

The remuneration policy does not encourage any risk taking which would be inconsistent with the risk appetite of the Company, the Articles of Association or Prospectus. FIMLUX will ensure that any decisions are consistent with the overall business strategy, objectives and the remuneration policy and try to avoid any conflicts of interest which may arise.

Fixed remuneration is defined as base salary plus other benefits. Base salaries are set competitive to local market, based on an individual's specific role and responsibilities as well as their relevant experience, qualifications, performance and overall contribution to FIL. These levels are reviewed on a regular basis.

Variable remuneration is defined as annual bonuses and long term incentive awards. These discretionary pay elements are determined by individual performance and overall company affordability (set taking into consideration the financial and non-financial performance and associated business and operational risks).

A summary of the Remuneration Policy is available at <https://www.fidelityinternational.com>.

FIMLUX will ensure that the remuneration policy is reviewed internally and independently annually. There have not been any material changes to the adopted remuneration policy since the last review performed in December 2024 and the review outcome showed no exception. The Remuneration Policy applies to all employees of FIMLUX, including individuals whose professional activities have a material impact on the risk profile of the Management Company or the UCITS Funds it manages ('UCITS Identified Staff'). The UCITS identified staff include members of the Board of the Management Company, senior management, heads of relevant control functions and heads of other key functions. Individuals are notified of their identification and the implications of this status on at least an annual basis.

Total Remuneration paid to staff of the Management Company and to its delegates for the past financial year	EUR 11,330,971
Of which, fixed remuneration	EUR 8,760,560
Of which, variable remuneration	EUR 2,570,411
Total number of employees of the Management Company and its delegates (as at 31/12/2024)	101
Portion of remuneration that is attributable to the Fund (as at 31/12/2024)	77.37%

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - All China Equity ESG Fund

Legal entity identifier:
254900EMLMON5USOI521

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 38.65% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of assets with the lowest ESG ratings. ESG scores were determined by reference to ESG ratings.

ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 82.64%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund measured against the ESG score of its benchmark excluding 20% of assets with the lowest ESG ratings: 6.76 vs. 6.53

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 38.65%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 29.16%

iv) the percentage of the fund invested in sustainable investments with a social objective: 9.49%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

The fund was launched on 16 November 2022.

For the period 16 November 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 84.23%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 29.61%.
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 6.34%
- v) the percentage of the fund invested in sustainable investments with a social objective: 22.75%.

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 79.12%
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 28.07%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 12.72%
- (v) the percentage of the fund invested in sustainable investments with a social objective: 15.35%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 38.65% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Tencent Holdings	Information Technology	9.8%	CHINA
Alibaba Group Holding	Consumer Discretionary	9.58%	CHINA
Contemporary Amperex Technology (A)	Industrials	4.15%	CHINA

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 38.65% in sustainable investments.

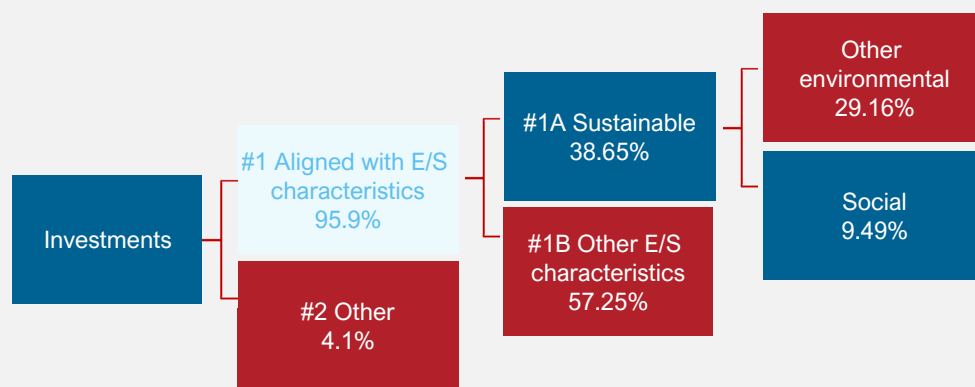

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 95.9%, which corresponds to the proportion of fund by achieving an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of securities with the lowest ESG rating. This included 38.65% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 29.16% have an environmental objective (which is not aligned with the EU Taxonomy) and 9.49% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%
- 2) climate change adaptation: 0%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end

of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The fund was launched on 16 November 2022.

For the period 16 November 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.5% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.5% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 29.16%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 9.49%.

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of assets with the lowest ESG ratings.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - America Fund

Legal entity identifier:

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 85.58%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.12 vs. 6.73

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 47.97%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 25.42%

iv) the percentage of the fund invested in sustainable investments with a social objective: 22.49%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 82.68%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 47.9%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 20.63%
- v) the percentage of the fund invested in sustainable investments with a social objective: 27.06%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 86.76%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 48.6%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 23.67%
- v) the percentage of the fund invested in sustainable investments with a social objective: 24.49%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 47.97% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
- (vi) Investments in UCITS and UCIs - Fidelity referenced its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) were considering principal adverse impacts on sustainability factors. The fund relied on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considered principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Berkshire Hathaway (B)	Financials	4.08%	United States
Wells Fargo &	Financials	3.82%	United States
McKesson	Healthcare	3.04%	United States
Alphabet (A)	Information Technology	3.04%	United States
Elevance Health	Healthcare	3%	United States
Labcorp Holdings	Healthcare	2.46%	United States
Bunge Global SA (A)	Consumer Staples	2.35%	United States
PNC Financial Services Group	Financials	2.34%	United States
McCormick & Co MD	Consumer Staples	2.33%	United States
Exelon	Utilities	2.22%	United States
Salesforce	Information Technology	2.22%	United States
Union Pacific	Industrials	2.18%	United States
Walt Disney	Communication Services	2.17%	United States
BJ's Wholesale Club Holdings	Consumer Staples	2.08%	United States
Arthur J Gallagher &	Financials	2.05%	United States

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 47.97% in sustainable investments.

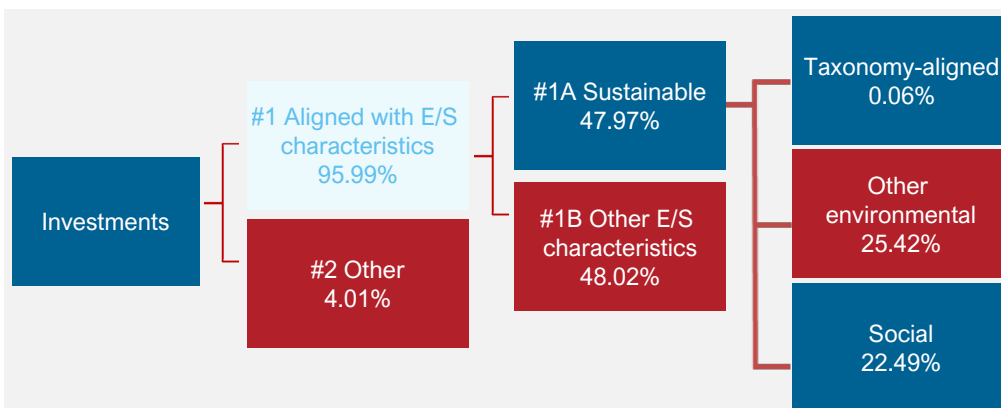

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 95.99%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 47.97% in sustainable investments of which 0.06% have an environmental objective (which is aligned with the EU Taxonomy), 25.42% have an environmental objective (which is not aligned with the EU Taxonomy) and 22.49% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Media	3.93%
	Wireless Telecommunication Services	1.46%
Consumer Discretionary	Media	1.83%
Consumer Staples	Food Products	4.68%

	Independent Power Producers & Energy Traders	1.26%

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective

and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

aligned with the EU Taxonomy was 0.06%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0.03%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.4% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.4% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.03% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.03% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 25.42%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 22.49%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 51.98% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 76.23%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 6.86 vs. 6.73

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 51.98%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 19.5%

iv) the percentage of the fund invested in sustainable investments with a social objective: 32.47%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 74.12%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 36.14%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 4.63%
- v) the percentage of the fund invested in sustainable investments with a social objective: 31.51%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 75.03%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 44.04%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 12.11%
- v) the percentage of the fund invested in sustainable investments with a social objective: 31.74%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 51.98% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
- (vi) Investments in UCITS and UCIs - Fidelity referenced its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) were considering principal adverse impacts on sustainability factors. The fund relied on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considered principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Fidelity Institutional Liquidity Fund - A-ACC-USD	Open Ended Fund	6.77%	Ireland
Alphabet (A)	Information Technology	6.25%	United States
Amazon.com	Consumer Discretionary	4.93%	United States
UnitedHealth Group	Healthcare	2.96%	United States
RenaissanceRe Holdings	Financials	2.92%	Bermuda
Ingredion	Consumer Staples	2.81%	United States
Meta Platforms (A)	Information Technology	2.76%	United States
Ares Management (A)	Financials	2.69%	United States
Everest Group	Financials	2.68%	Bermuda
Microsoft	Information Technology	2.5%	United States
Service Corp International/US	Consumer Discretionary	2.48%	United States
AstraZeneca	Healthcare	2.41%	United Kingdom
Monster Beverage	Consumer Staples	2.03%	United States
Dexcom	Healthcare	2%	United States
Lazard	Financials	1.99%	United States

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 51.98% in sustainable investments.

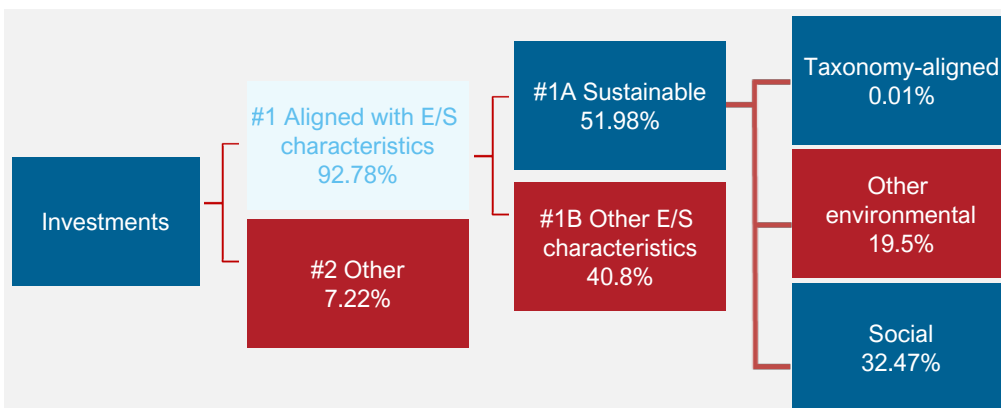

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 92.78%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 51.98% in sustainable investments of which 0.01% have an environmental objective (which is aligned with the EU Taxonomy), 19.5% have an environmental objective (which is not aligned with the EU Taxonomy) and 32.47% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Multiline Retail	5.97%
	Household Durables	2.68%
	Diversified Consumer Services	2.48%
	Speciality Retail	0.92%

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.01%. This contributed to the following

fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

environmental objectives:

- 1) climate change mitigation: 0.01%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

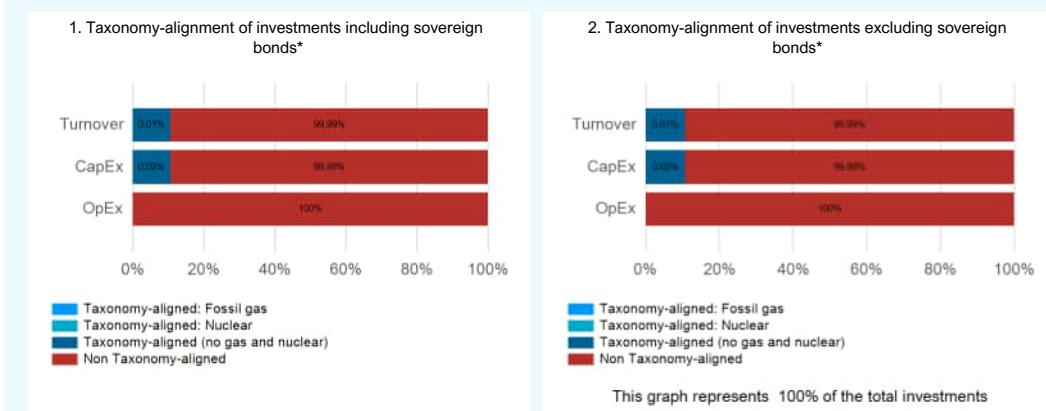

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0.01% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.1% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.1% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.01% based on Turnover, 0.02% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.01% based on Turnover, 0.02% based on CapEx and 0.0% based on OpEx.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 19.5%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 32.47%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - ASEAN Fund

Legal entity identifier:
549300NUQAYRMJ1DF30

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 29.96% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided below covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 83.03%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.09 vs. 6.70

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 29.96%

iii) the percentage of the fund invested in sustainable investments with a social objective: 25.57%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 78.61%.

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 24.53%

iv) the percentage of the fund invested in sustainable investments with a social objective: 22.34%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 84.45%.

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 28.45%

iv) the percentage of the fund invested in sustainable investments with a social objective: 27.52%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 29.96% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching “do no significant harm” requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Sea	Consumer Discretionary	9.52%	Singapore
DBS Group Holdings	Financials	9.33%	Singapore
Bank Central Asia	Financials	7.53%	Indonesia
Oversea-Chinese Banking Corp	Financials	5.99%	Singapore
United Overseas Bank	Financials	4.7%	Singapore

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 29.96% in sustainable investments.

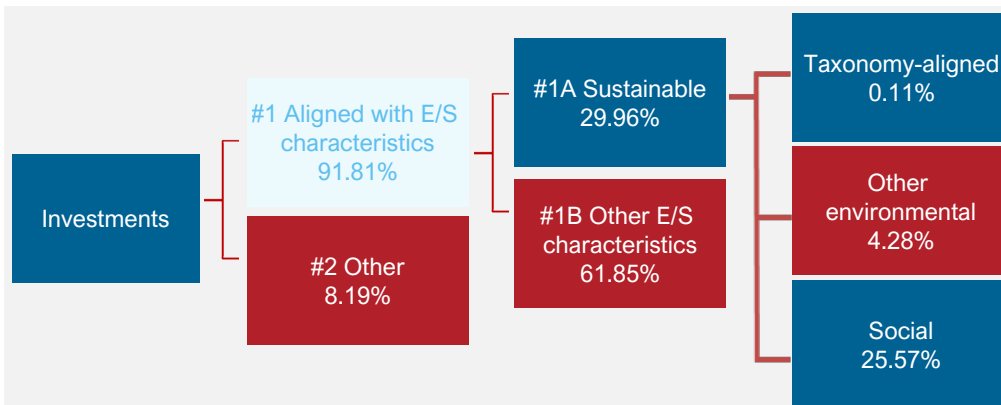

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 91.81%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 29.96% in sustainable investments of which 0.11% have an environmental objective (which is aligned with the EU Taxonomy), 4.28% have an environmental objective (which is not aligned with the EU Taxonomy) and 25.57% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.11%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0.04%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

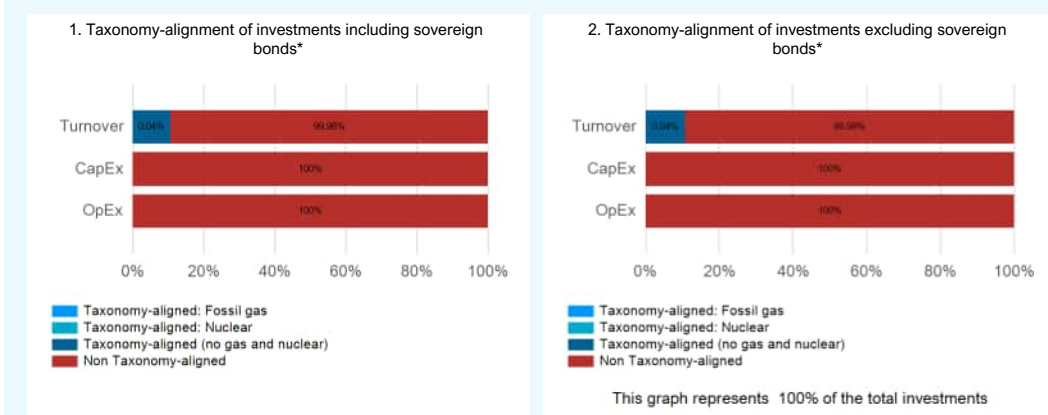

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.08% based on Turnover, 0.07% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.08% based on Turnover, 0.07% based on CapEx and 0.0% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 4.28%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 25.57%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Asia Equity ESG Fund

Legal entity identifier:
549300XNOLBE172DCX03

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 57.8% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024.
- the data 'High ESG rating', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics ESG including product safety, supply chain, health and safety and human rights. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 91.99%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with high ESG ratings: 91.53%

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 57.8%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 27.55%

iv) the percentage of the fund invested in sustainable investments with a social objective: 30.25%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 92.16%

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 42.79%

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 12.11%

v) the percentage of the fund invested in sustainable investments with a social objective: 30.68%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 91.92%

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 49.77%

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 19.81%

v) the percentage of the fund invested in sustainable investments with a social objective: 29.96%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 57.8% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "[Sustainable investing framework](#)".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	9.48%	Taiwan
Tencent Holdings	Information Technology	6.57%	China
ICICI Bank	Financials	6.46%	India
Samsung Electronics	Information Technology	6.02%	Korea (South)

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 57.8% in sustainable investments.

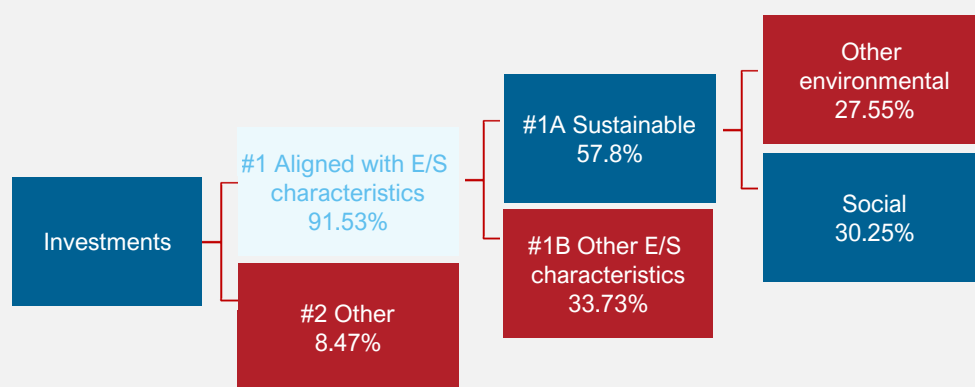

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 91.53%, which corresponds to the proportion of fund invested in securities with high ESG ratings. This included 57.8% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 27.55% have an environmental objective (which is not aligned with the EU Taxonomy) and 30.25% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%

carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

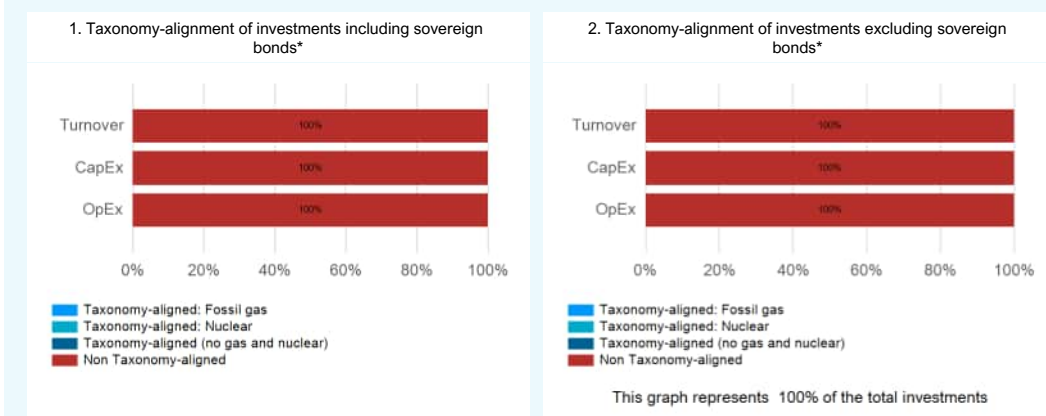

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities,

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.3% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.3% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 27.55%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 30.25%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024.
- the data 'High ESG rating', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics ESG including product safety, supply chain, health and safety and human rights. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 91.85%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with high ESG ratings: 91.57%

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 57.7%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 27.5%

iv) the percentage of the fund invested in sustainable investments with a social objective: 30.2%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 91.49%.

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 42.48%

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 12.02%

v) the percentage of the fund invested in sustainable investments with a social objective: 30.46%.

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 91.02%

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 49.55%

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 19.67%

v) the percentage of the fund invested in sustainable investments with a social objective: 29.88%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 57.7% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 57.7% in sustainable investments.

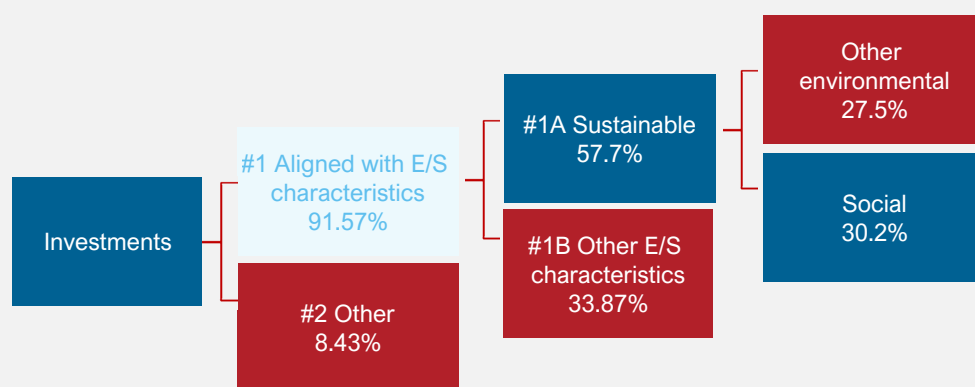

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 91.57%, which corresponds to the proportion of fund invested in securities with high ESG ratings. This included 57.7% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 27.5% have an environmental objective (which is not aligned with the EU Taxonomy) and 30.2% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-

carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

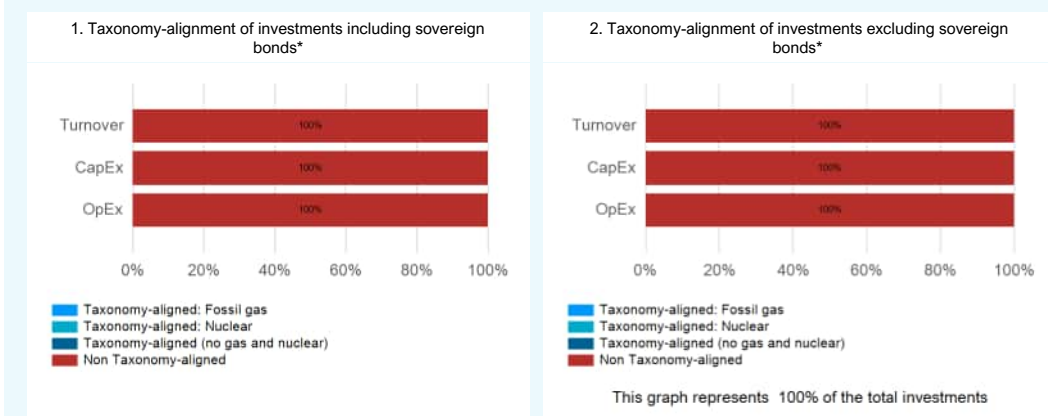

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities,

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.3% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.3% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 27.5%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 30.2%.

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Asian Smaller Companies Fund

Legal entity identifier:
549300WPIOCV90YN3U76

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 31.92% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided below covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024.
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 73.15%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 6.14 vs. 5.17

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 31.92%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 10.56%

iv) the percentage of the fund invested in sustainable investments with a social objective: 21.36%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

The fund was uplifted to an Article 8 in August 11, 2023.

For the period 11 August 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 74.35%.

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 30.2%

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 5.8%

v) the percentage of the fund invested in sustainable investments with a social objective: 24.4%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 31.92% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Axis Bank	Financials	3.39%	India
Taiwan Semiconductor Manufacturing	Information Technology	3.13%	Taiwan
Bank Negara Indonesia Persero	Financials	2.97%	Indonesia
Indofood CBP Sukses Makmur	Consumer Staples	2.91%	Indonesia

Source of data: Fidelity International, as at 30 April 2025.

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 31.92% in sustainable investments.

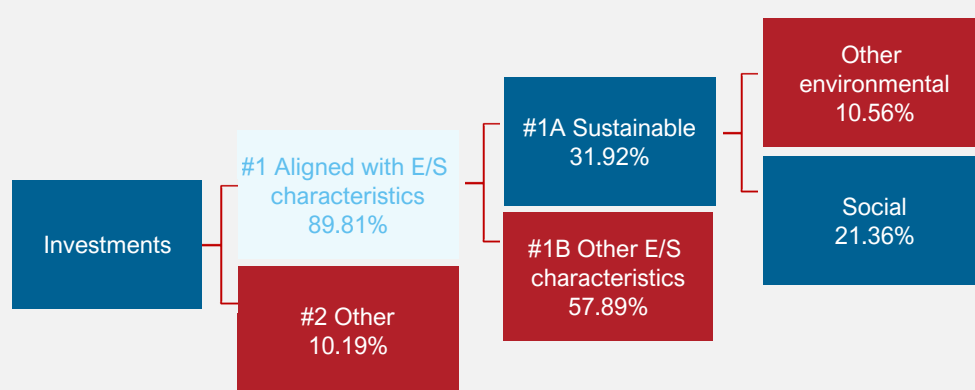

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 89.81%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 31.92% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 10.56% have an environmental objective (which is not aligned with the EU Taxonomy) and 21.36% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International, as at 30 April 2025.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution

to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

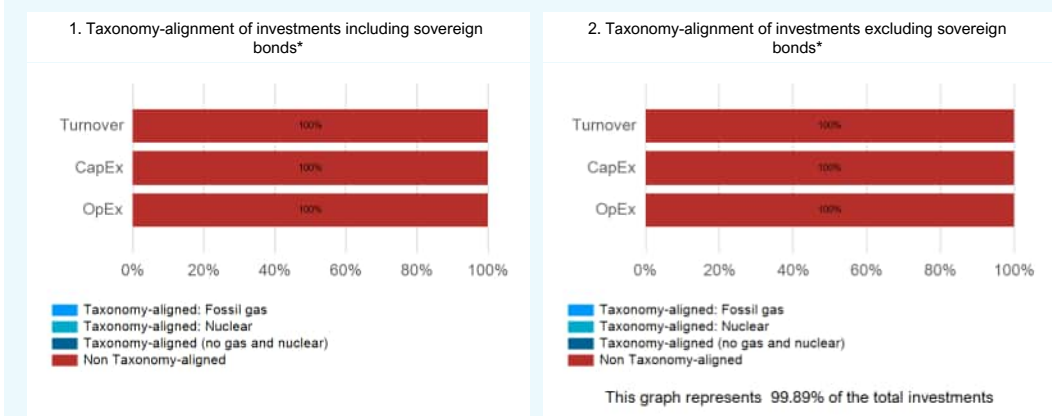

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The fund was uplifted to an Article 8 in August 11, 2023.

For the period 11 August 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.03% based on Turnover, 0.09% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.03% based on Turnover, 0.09% based on CapEx and 0.0% based on

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

OpEx.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 10.56%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 21.36%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than its benchmark.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 57.86% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided below covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024.
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 88.70%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.50 vs. 6.72

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 57.86%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 29.81%

iv) the percentage of the fund invested in sustainable investments with a social objective: 28.05%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 91.48%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 43.8%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 12.02%
- v) the percentage of the fund invested in sustainable investments with a social objective: 31.78%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 89.99%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 48.81%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 17.57%
- v) the percentage of the fund invested in sustainable investments with a social objective: 31.24%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 57.86% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	8.77%	Taiwan
Tencent Holdings	Information Technology	8.62%	China
Samsung Electronics	Information Technology	5.85%	Korea (South)
Alibaba Group Holding	Consumer Discretionary	5.33%	China
ICICI Bank	Financials	5.19%	India
HDFC Bank	Financials	4.98%	India
AIA Group	Financials	3.45%	Hong Kong
MediaTek	Information Technology	3.29%	Taiwan
TRIP.COM GROUP	Consumer Discretionary	2.86%	China
Bharti Airtel	Communication Services	2.67%	India
Bank Central Asia	Financials	2.14%	Indonesia
Infosys	Information Technology	1.74%	India
Meituan (B)	Consumer Discretionary	1.74%	China
Eicher Motors	Consumer Discretionary	1.65%	India
Samsung Fire & Marine Insurance	Financials	1.64%	Korea (South)

Source of data: Fidelity International, as at 30 April 2025.

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 57.86% in sustainable investments.

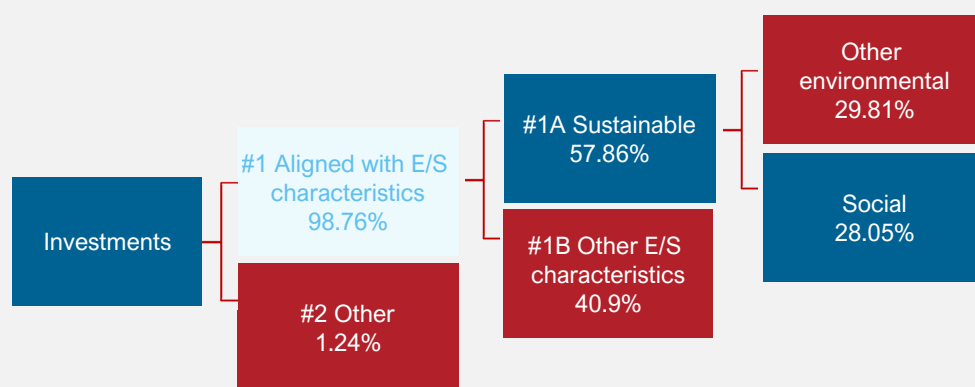

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 98.76%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 57.86% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 29.81% have an environmental objective (which is not aligned with the EU Taxonomy) and 28.05% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Wireless Telecommunication Services	2.67%

Source of data: Fidelity International, as at 30 April 2025.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%
- 2) climate change adaptation: 0%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end

of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

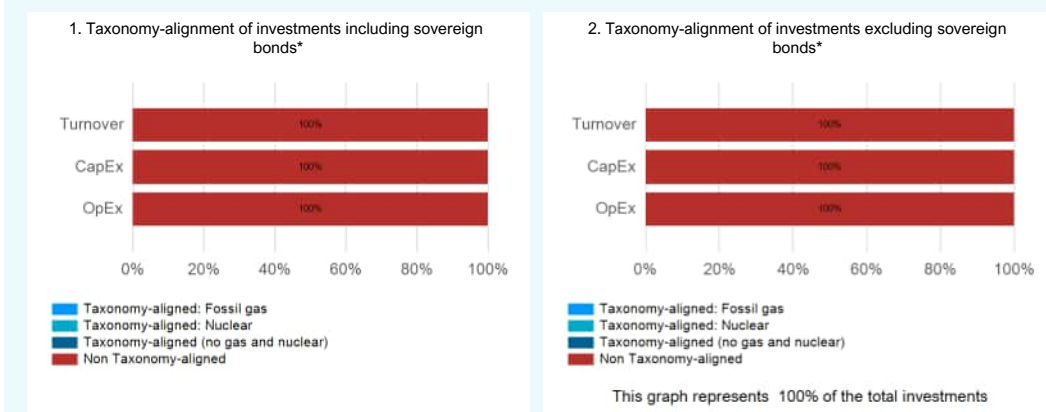

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 29.81%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 28.05%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 33.8% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of assets with the lowest ESG ratings. ESG scores were determined by reference to ESG ratings.

ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 82.72%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund measured against the ESG score of its benchmark excluding 20% of assets with the lowest ESG ratings: 6.57 vs. 5.59

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 33.8%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 21.58%

iv) the percentage of the fund invested in sustainable investments with a social objective: 12.22%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 74.8%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 38.23%.
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy: 0.58%.
- v) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 11.58%
- vi) the percentage of the fund invested in sustainable investments with a social objective: 26.07%.

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 78.39%
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 31.85%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 14.01%
- (v) the percentage of the fund invested in sustainable investments with a social objective: 17.85%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 33.8% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching “do no significant harm” requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Contemporary Amperex Technology (A)	Industrials	5.91%	CHINA
China Merchants Bank (A)	Financials	5.14%	CHINA
Industrial & Commercial Bank of China (A)	Financials	3.88%	CHINA
China Construction Bank (A)	Financials	3.75%	CHINA
Fuyao Glass Industry Group (A)	Consumer Discretionary	3.59%	CHINA
BYD (A)	Consumer Discretionary	3.02%	CHINA

Ping An Insurance Group Co of China (A)	Financials	2.15%	CHINA

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 33.8% in sustainable investments.

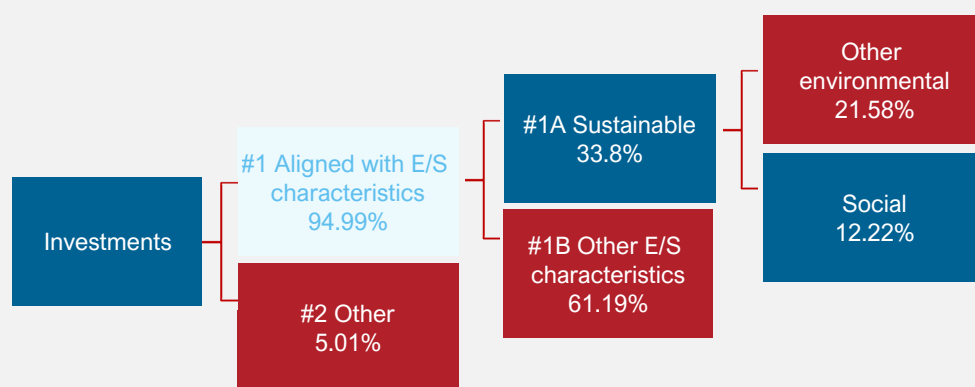

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 94.99%, which corresponds to the proportion of fund by achieving an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of securities with the lowest ESG rating. This included 33.8% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 21.58% have an environmental objective (which is not aligned with the EU Taxonomy) and 12.22% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Auto Components	4.16%
	Automobiles	3.02%
	Household Durables	2.84%
	Media	1.63%
	Textiles & Apparel	1.14%

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For

nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

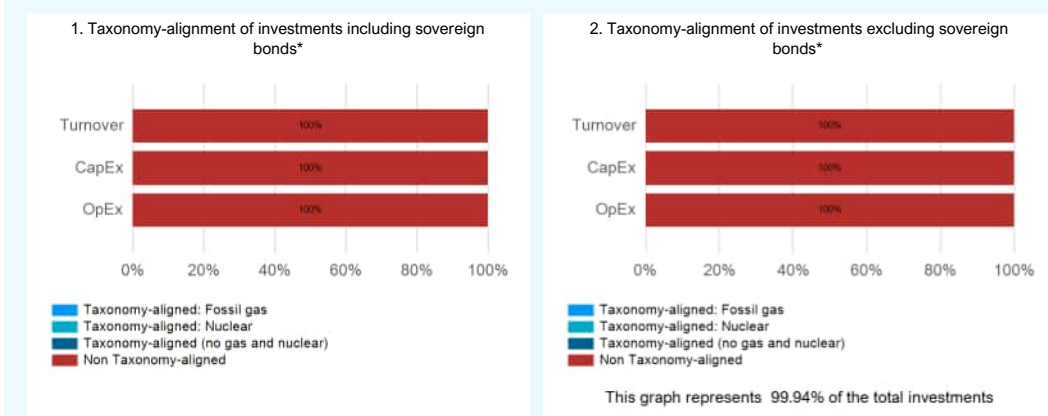

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy'?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.4% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.4% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 21.58%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 12.22%.

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of assets with the lowest ESG ratings.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - China Consumer Fund

Legal entity identifier:
5493007PTUTOK6CJU119

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="checkbox"/> <input type="checkbox"/> Yes	<input type="checkbox"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 42.6% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 80.22%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 6.85 vs. 4.37

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 42.6%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 27.63%

(iv) the percentage of the fund invested in sustainable investments with a social objective: 14.97%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 82.8%
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 21.26%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 3.14%
- v) the percentage of the fund invested in sustainable investments with a social objective: 18.11%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 82.29%
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 30.58%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 10.42%
- (v) the percentage of the fund invested in sustainable investments with a social objective: 20.16%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 42.6% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
- (vi) Investments in UCITS and UCIs - Fidelity referenced its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) were considering principal adverse impacts on sustainability factors. The fund relied on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considered principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Alibaba Group Holding	Consumer Discretionary	9.6%	CHINA
Tencent Holdings	Information Technology	9.46%	CHINA
Fidelity Institutional Liquidity Fund - A-ACC-USD	Open Ended Fund	7.05%	IRELAND
Naspers	Consumer Discretionary	4.44%	SOUTH AFRICA
ANTA Sports Products	Consumer Discretionary	4.19%	CHINA
NetEase	Consumer Discretionary	3.9%	CHINA
TRIP.COM GROUP	Consumer Discretionary	3.4%	CHINA
Ping An Insurance Group Co of China (H)	Financials	3.22%	CHINA
Xiaomi (B)	Information Technology	3.17%	CHINA
PDD Holdings	Consumer Discretionary	3.14%	IRELAND
Prosus	Consumer Discretionary	3.03%	NETHERLAND S
BYD (H)	Consumer Discretionary	2.95%	CHINA

China Overseas Land & Investment	Real Estate	2.59%	HONG KONG
Pop Mart International Group	Consumer Discretionary	2.28%	CHINA

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 42.6% in sustainable investments.

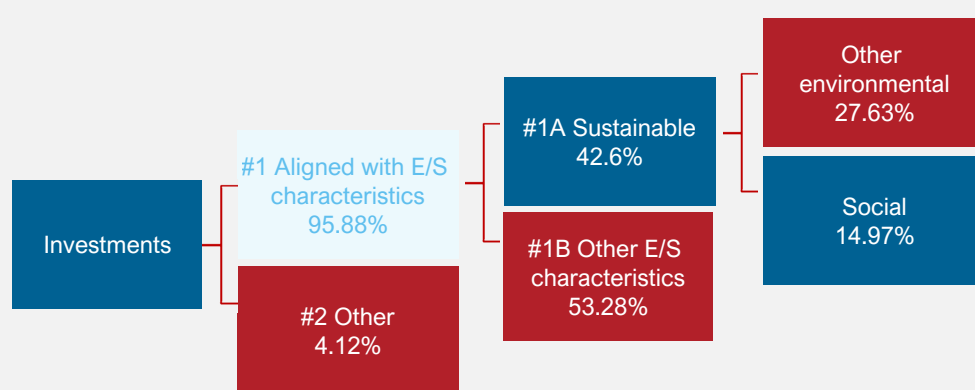

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 95.88%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 42.6% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 27.63% have an environmental objective (which is not aligned with the EU Taxonomy) and 14.97% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Hotels Restaurants & Leisure	6.68%
	Media	5.56%
	Automobiles	4.48%
	Textiles & Apparel	4.19%
	Multiline Retail	20.21%
	Speciality Retail	2.64%
	Household Durables	1.48%
	Auto Components	1.25%
	Diversified Consumer Services	0.53%
Consumer Staples	Beverages	3.99%
	Personal Products	1.11%
	Food & Staples Retailing	0.19%

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.2% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.2% based

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 27.63%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 14.97%.

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - China Innovation Fund

Legal entity identifier:
549300IV1SMG8Q6CJU79

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 41.24% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided below covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024.
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 74.02%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 6.67 vs. 5.66

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 41.24%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 30.1%

iv) the percentage of the fund invested in sustainable investments with a social objective: 11.14%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 85.55%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 34.24%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 18.11%
- v) the percentage of the fund invested in sustainable investments with a social objective: 15.23%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 76.88%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 39.01%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 26.26%
- v) the percentage of the fund invested in sustainable investments with a social objective: 12.47%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 41.24% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Tencent Holdings	Information Technology	9.47%	China
Alibaba Group Holding	Consumer Discretionary	8.3%	China
Fidelity Institutional Liquidity Fund - A-ACC-USD	Open Ended Fund	5.07%	Ireland
PDD Holdings	Consumer Discretionary	4.17%	Ireland
TRIP.COM GROUP	Consumer Discretionary	3.6%	China

Source of data: Fidelity International, as at 30 April 2025.

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 41.24% in sustainable investments.

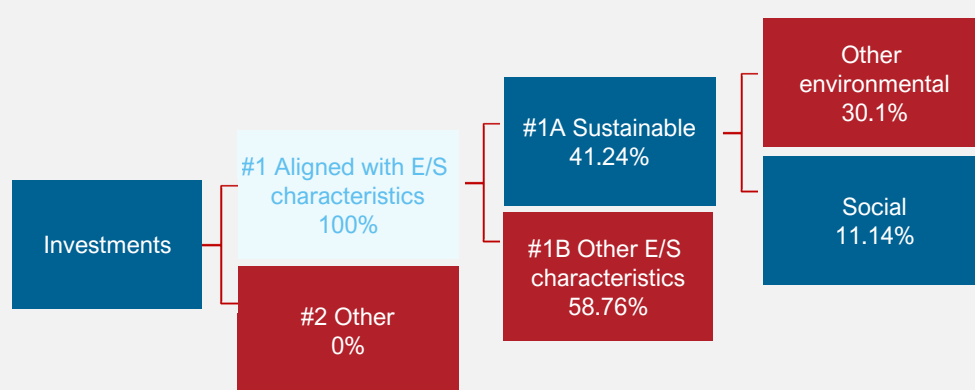

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 100%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 41.24% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 30.1% have an environmental objective (which is not aligned with the EU Taxonomy) and 11.14% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Hotels Restaurants & Leisure	8.49%
	Auto Components	3.3%
	Diversified Consumer Services	3.24%
	Media	2.71%
	Multiline Retail	13.11%
	Automobiles	1.87%

Source of data: Fidelity International, as at 30 April 2025.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

1) climate change mitigation: 0%

power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

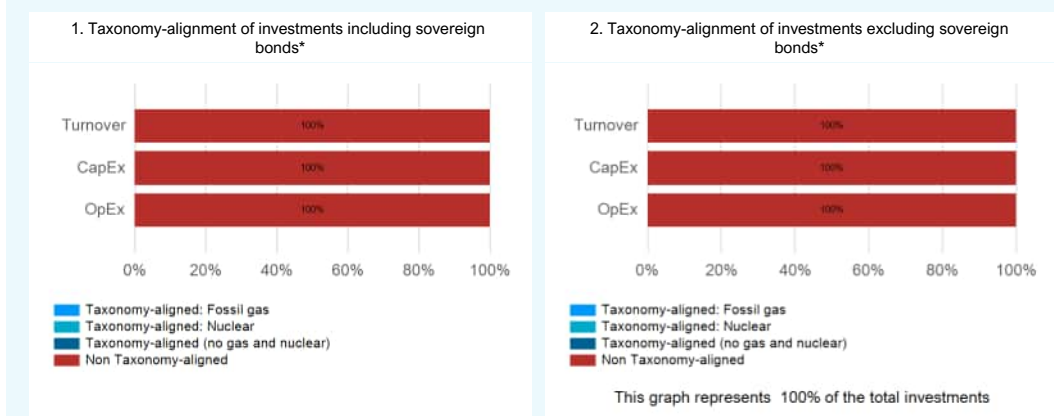

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities,

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.9% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.9% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.31% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.31% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 30.1%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 11.14%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 9(1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective ?	
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 76.45% <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 19.04%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

With effect from 31 July 2024, the fund's approach towards sustainable investment objectives was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. While the fund now operates under the updated framework, there is no change in how the fund met the sustainable investment objective.

The Fund met the sustainable investment objective as defined in the SFDR precontractual disclosure for the period. The fund aimed to achieve capital growth over the long term by investing in sustainable investments.

The fund determined sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
- (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives; provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The Investment Manager selected issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website:

<https://sdgs.un.org/goals>. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the sustainable investment objective of the fund:

- i) the percentage of the fund invested in sustainable investments: 95.49%
- ii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy: 4.44%
- iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 72.01%
- iv) the percentage of the fund invested in sustainable investments with a social objective: 19.04%
- v) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, not applicable as this fund was uplifted to an Article 9 fund in 3 August 2023.

For the period 3 August 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the sustainable investment objective of the fund:

- i) the percentage of the fund invested in sustainable investments: 95.85%
- ii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy: 3.26%
- iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 65.31%
- iv) the percentage of the fund invested in sustainable investments with a social objective: 27.28%
- v) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 95.49% in sustainable investments.

What was the asset allocation?

The proportion of the investments of the fund used to meet the sustainable investment objective, in accordance with the binding elements of the investment strategy of the financial product is 95.49%, which corresponds to the proportion of fund invested in sustainable investments. This included 4.44% have an environmental objective (which is aligned with the EU Taxonomy), 72.01% have an environmental objective (which is not aligned with the EU Taxonomy) and 19.04% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments

In which economic sectors were the investments made?

Source of data: Fidelity International, as at 30 April 2025.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 4.44%. This contributed to the following

and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

environmental objectives:

- 1) climate change mitigation: 3.44%
- 2) climate change adaptation: 0.04%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☒ Yes

☐ In fossil gas

☒ In nuclear energy

☐ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 3.01% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, not applicable as this fund was uplifted to an Article 9 fund on 3 August 2023.

For the period 3 August 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 4.56% based on Turnover, 6% based on CapEx and 3.49% based on OpEx.

The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 4.56% based on Turnover, 6% based on CapEx and 3.49% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 72.01%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 19.04%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to attain the sustainable investment objective during the reference period?

The fund took the following actions to meet the sustainable investment objective:

1. The fund made sustainable investments.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative ESG characteristics.
3. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Emerging Asia Fund

Legal entity identifier:
549300DFTX1HYCKWAS72

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 48.44% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided below covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 84.57%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.13 vs. 6.64

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 48.44%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 26.23%

iv) the percentage of the fund invested in sustainable investments with a social objective: 22.13%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 81.81%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 34.21%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 13.01%
- v) the percentage of the fund invested in sustainable investments with a social objective: 21.19%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 80.57%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 40.12%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 16.53%
- v) the percentage of the fund invested in sustainable investments with a social objective: 23.58%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 48.44% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	10%	Taiwan
Tencent Holdings	Information Technology	8.35%	China
Fidelity Institutional Liquidity Fund - A-ACC-USD	Open Ended Fund	6.05%	Ireland
HDFC Bank	Financials	4.73%	India
Alibaba Group Holding	Consumer Discretionary	4.34%	China
Samsung Electronics	Information Technology	3.74%	Korea (South)
ICICI Bank	Financials	3.41%	India
TRIP.COM GROUP	Consumer Discretionary	2.68%	China
BYTEDANCE	Information Technology	2.61%	China
Bank Central Asia	Financials	2.22%	Indonesia
MediaTek	Information Technology	1.99%	Taiwan
China Overseas Land & Investment	Real Estate	1.68%	Hong Kong
NetEase	Consumer Discretionary	1.66%	China
Axis Bank	Financials	1.56%	India

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 48.44% in sustainable investments.

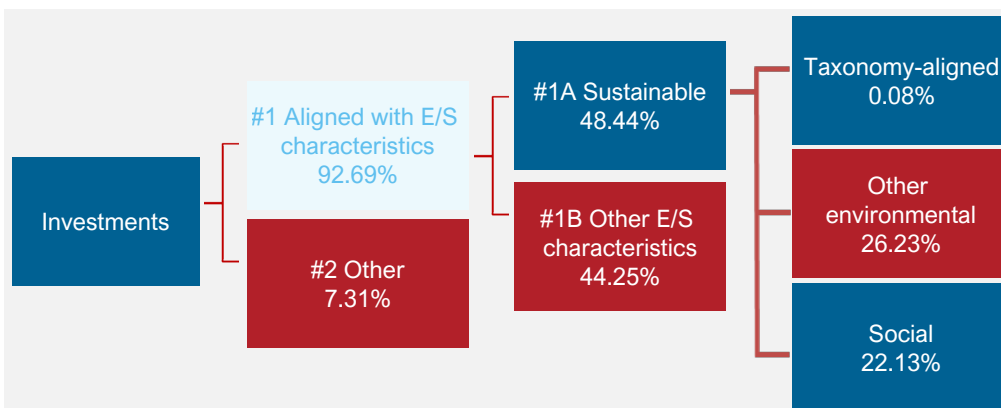

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 92.69%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 48.44% in sustainable investments of which 0.08% have an environmental objective (which is aligned with the EU Taxonomy), 26.23% have an environmental objective (which is not aligned with the EU Taxonomy) and 22.13% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.08%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0.03%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.05% based on Turnover, 0.02% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.05% based on Turnover, 0.02% based on CapEx and 0.0% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 26.23%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 22.13%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than its benchmark.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

How did this financial product perform compared with the broad market index?

Non Applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 59.54% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of assets with the lowest ESG ratings. ESG scores were determined by reference to ESG ratings.

ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 94.08%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund measured against the ESG score of its benchmark excluding 20% of assets with the lowest ESG ratings: 7.49 vs. 7.22

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 59.54%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 28.8%

iv) the percentage of the fund invested in sustainable investments with a social objective: 30.74%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 90.95%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 47.51%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 19.19%
- v) the percentage of the fund invested in sustainable investments with a social objective: 28.32%.

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 94.1%
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 57.92%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 27.13%
- (v) the percentage of the fund invested in sustainable investments with a social objective: 30.79%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 59.54% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	6.93%	TAIWAN

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 59.54% in sustainable investments.

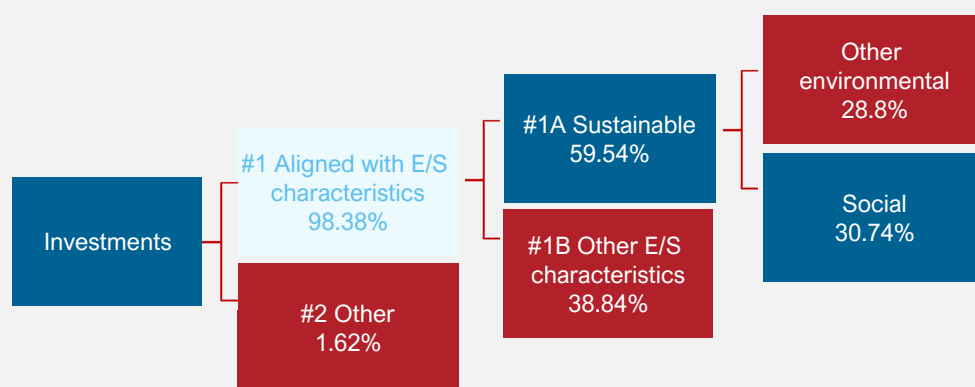

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 98.38%, which corresponds to the proportion of fund by achieving an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of securities with the lowest ESG rating. This included 59.54% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 28.8% have an environmental objective (which is not aligned with the EU Taxonomy) and 30.74% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

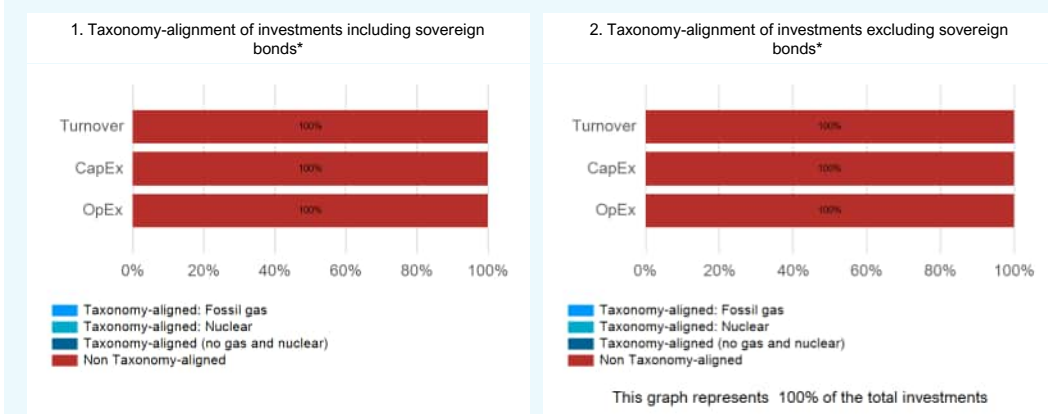

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.4% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

bonds) with an environmental objective aligned with the EU Taxonomy was 0.4% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.02% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.02% based on CapEx and 0.0% based on OpEx.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 28.8%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 30.74%.

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of assets with the lowest ESG ratings.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 50.43% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided below covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024.
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 88.72%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.03 vs. 6.48

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 50.43%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 18.67%

(iv) the percentage of the fund invested in sustainable investments with a social objective: 31.76%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

The fund was launched on 1 Feb 2023.

For the period 1 Feb 2023 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 85.58%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 41.19%.
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 19.25%
- v) the percentage of the fund invested in sustainable investments with a social objective: 21.33%.

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 92.82%
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 52.94%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 22.93%
- (v) the percentage of the fund invested in sustainable investments with a social objective: 30.02%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 50.43% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	10.27%	Taiwan
Samsung Electronics	Information Technology	4.87%	Korea (South)

Source of data: Fidelity International, as at 30 April 2025.

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 50.43% in sustainable investments.

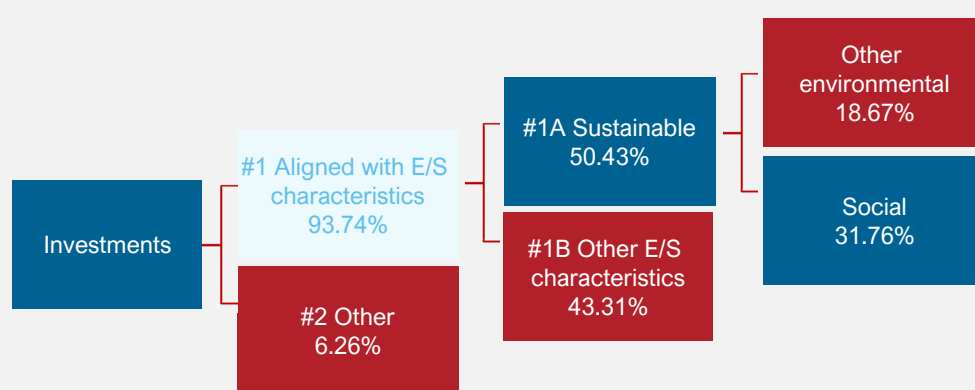

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 93.74%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 50.43% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 18.67% have an environmental objective (which is not aligned with the EU Taxonomy) and 31.76% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV

Source of data: Fidelity International, as at 30 April 2025.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include

comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

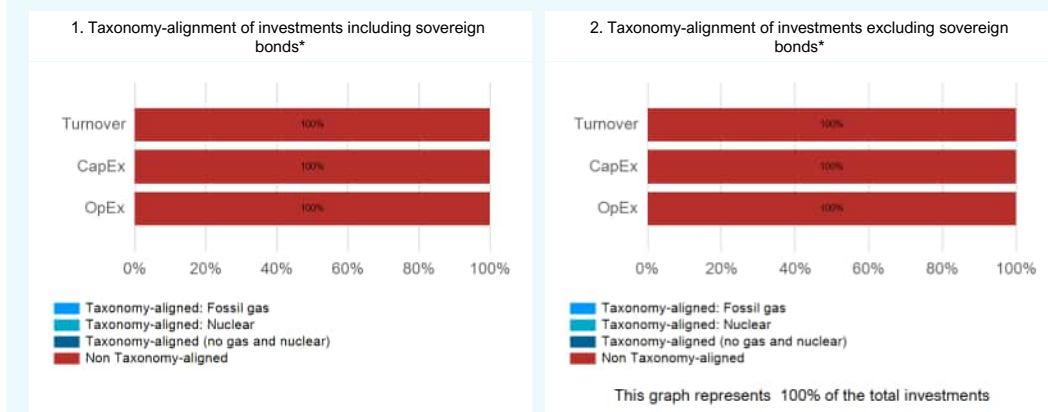

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The fund was launched on 1 Feb 2023.

For the period 1 Feb 2023 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.6% based on Turnover, 0.1% based on CapEx and 0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.6% based on Turnover, 0.1% based on CapEx and 0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.1% based on Turnover, 0.12% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.1% based on Turnover, 0.12% based on CapEx and 0.0% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 18.67%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 31.76%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Emerging Markets Fund

Legal entity identifier:
5493002DANCVJDN6B565

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 56.62% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided below covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024.
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 91.08%.

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.04 vs. 6.39

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 56.62%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 28.77%

iv) the percentage of the fund invested in sustainable investments with a social objective: 27.85%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 86.51%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 45.87%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 15.27%
- v) the percentage of the fund invested in sustainable investments with a social objective: 30.58%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 94.28%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 52.9%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 21.32%
- v) the percentage of the fund invested in sustainable investments with a social objective: 31.58%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 56.62% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Naspers	Consumer Discretionary	9.46%	South Africa
Taiwan Semiconductor Manufacturing	Information Technology	8.76%	Taiwan
HDFC Bank	Financials	4.09%	India
Samsung Electronics	Information Technology	3.78%	Korea (South)
ANTA Sports Products	Consumer Discretionary	2.89%	China
ICICI Bank ADR	Financials	2.76%	India
Kaspi.KZ ADR	Financials	2.69%	Kazakhstan
TRIP.COM GROUP	Consumer Discretionary	2.6%	China
Bank Central Asia	Financials	2.58%	Indonesia
NU Holdings /Cayman Islands (A)	Financials	2.44%	Brazil
OTP Bank	Financials	2.38%	Hungary

Source of data: Fidelity International, as at 30 April 2025.

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 56.62% in sustainable investments.

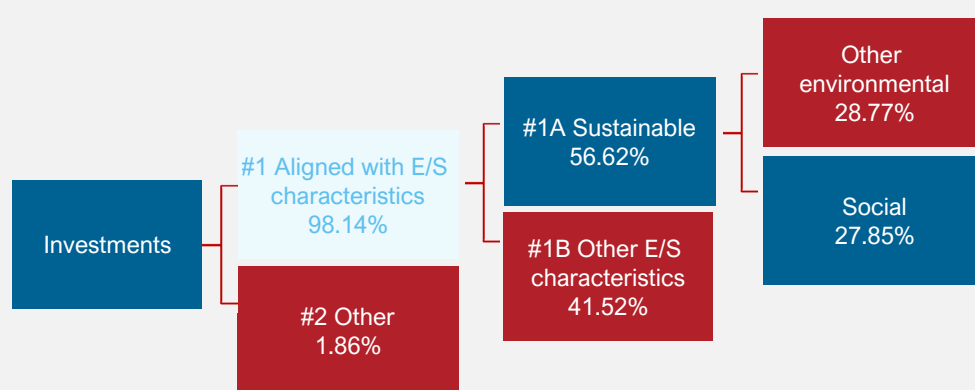

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 98.14%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 56.62% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 28.77% have an environmental objective (which is not aligned with the EU Taxonomy) and 27.85% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Media	1.88%

Source of data: Fidelity International, as at 30 April 2025.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

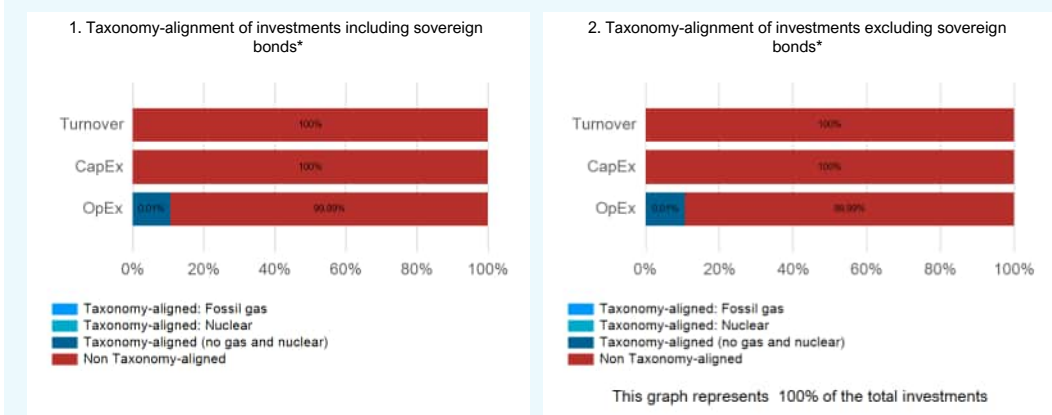

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.1% based on Turnover, 0.1% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.1% based on Turnover, 0.1% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.04% based on Turnover, 0.19% based on CapEx and 0.04% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.04% based on Turnover, 0.19% based on CapEx and 0.04% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 28.77%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 27.85%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Europe Equity ESG Fund

Legal entity identifier:
549300NM9ZITQTY7GU39

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 87.6% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024.
- the data 'High ESG rating', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics ESG including product safety, supply chain, health and safety and human rights. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 99.98%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with high ESG ratings: 96.44%

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 87.6%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy: 2.17%

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 43.94%

v) the percentage of the fund invested in sustainable investments with a social objective: 41.49%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 99.92%
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 66.77%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy: 1.35%
- v) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 30.72%
- vi) the percentage of the fund invested in sustainable investments with a social objective: 34.70%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 98.98 %
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 76.15 %
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy: 1.29 %
- v) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 36.86 %
- vi) the percentage of the fund invested in sustainable investments with a social objective: 38%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 87.6% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "[Sustainable investing framework](#)".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
AstraZeneca	Healthcare	4.76%	United Kingdom
RELX	Industrials	4.01%	United Kingdom

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 87.6% in sustainable investments.

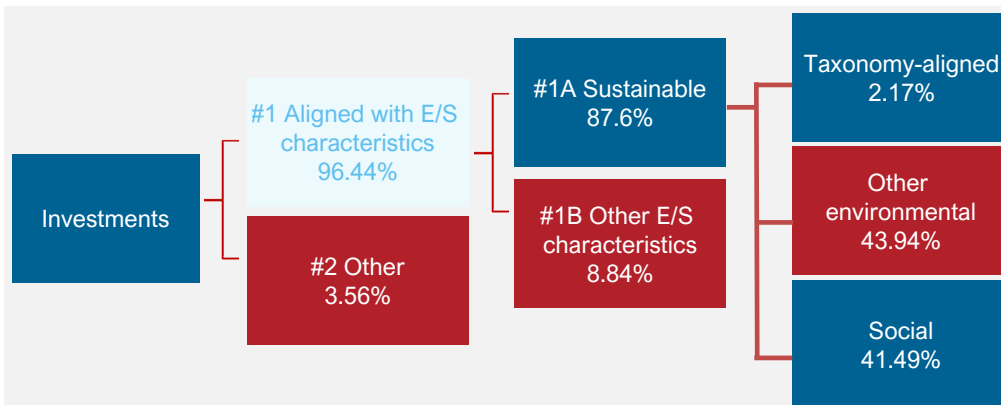

What was the asset allocation?

The proportion of the investments of the fund used to meet the sustainable investment objective, in accordance with the binding elements of the investment strategy of the financial product is 87.6% , which corresponds to the proportion of fund invested in sustainable investments. This included 2.17% have an environmental objective (which is aligned with the EU Taxonomy), 43.94% have an environmental objective (which is not aligned with the EU Taxonomy) and 41.49% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	1.52%
Consumer Discretionary	Textiles & Apparel	4.61%
	Speciality Retail	2.84%

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 2.17%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 1.06%
- 2) climate change adaptation: 0.13%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other

activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems.

To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

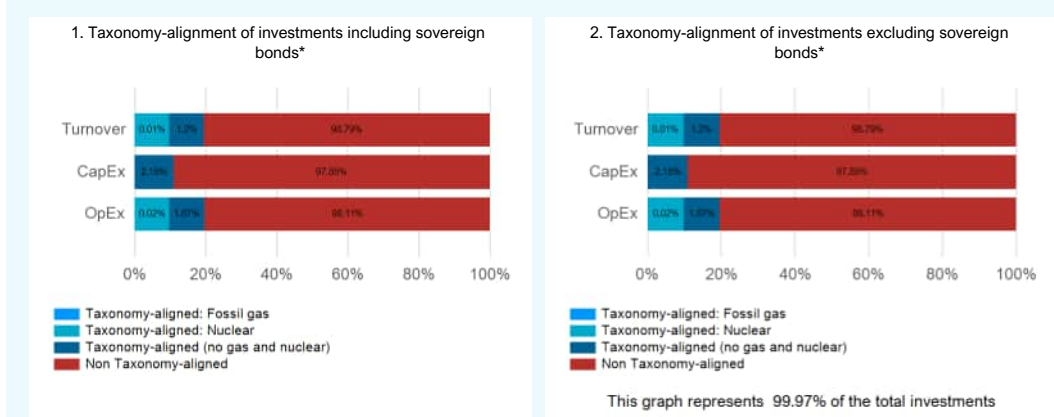

☒ Yes

☐ In fossil gas

☒ In nuclear energy

☐ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.01% for transitional activities and 0.87% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.1% based on Turnover, 2.7% based on CapEx and 1.7% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.1% based

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

on Turnover, 2.7% based on CapEx and 1.7% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.43% based on Turnover, 4.2% based on CapEx and 2.71% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.43% based on Turnover, 4.2% based on CapEx and 2.71% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 43.94%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 41.49%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - European Dynamic Growth Fund

Legal entity identifier:
549300YTXDJLT19R5058

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 84.97% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 94.94%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.88 vs. 7.19

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 84.97%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 33.3%

iv) the percentage of the fund invested in sustainable investments with a social objective: 50.96%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 97.8%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 70.08%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 20.78%
- v) the percentage of the fund invested in sustainable investments with a social objective: 49.27%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 96.28%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 78.58%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 25.54%
- v) the percentage of the fund invested in sustainable investments with a social objective: 52.87%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 84.97% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
- (vi) Investments in UCITS and UCIs - Fidelity referenced its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) were considering principal adverse impacts on sustainability factors. The fund relied on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considered principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
RELX	Industrials	5.61%	United Kingdom
Experian	Industrials	5.49%	Ireland

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 84.97% in sustainable investments.

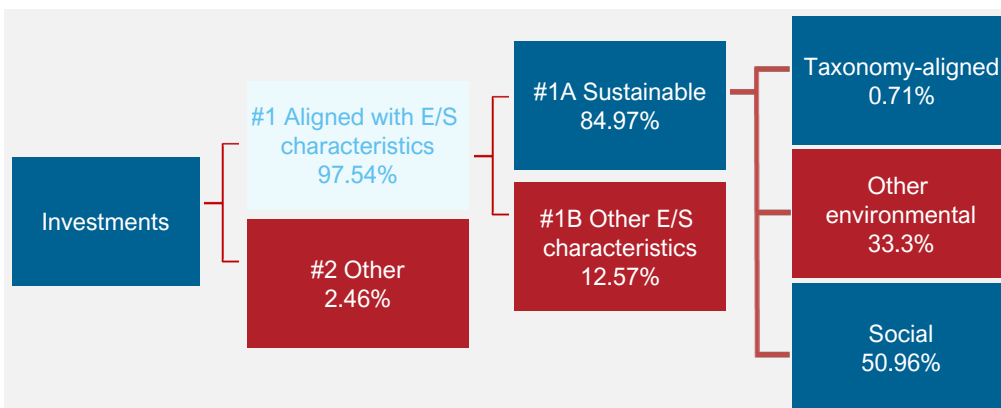

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 97.54%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 84.97% in sustainable investments of which 0.71% have an environmental objective (which is aligned with the EU Taxonomy), 33.3% have an environmental objective (which is not aligned with the EU Taxonomy) and 50.96% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.71%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0.28%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

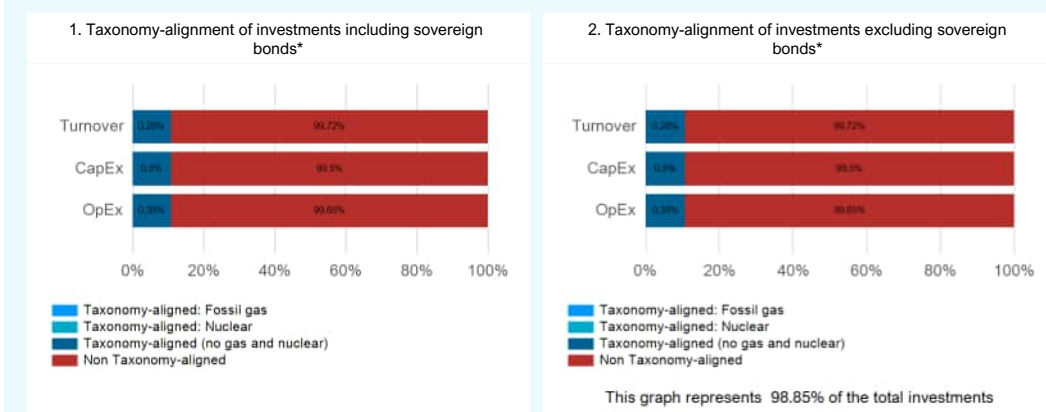

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0.27% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.2% based on Turnover, 0.2% based on CapEx and 0.9% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

bonds) with an environmental objective aligned with the EU Taxonomy was 0.2% based on Turnover, 0.2% based on CapEx and 0.9% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.12% based on Turnover, 0.46% based on CapEx and 0.36% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.12% based on Turnover, 0.46% based on CapEx and 0.36% based on OpEx.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 33.3%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 50.96%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - European Growth Fund

Legal entity identifier:
549300G4OINSKM9K3661

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 85.41% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided below covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 96.34%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.81 vs. 7.42

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 85.41%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 43.53%

iv) the percentage of the fund invested in sustainable investments with a social objective: 39.56%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 92.4%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 58.72%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 23.40%
- v) the percentage of the fund invested in sustainable investments with a social objective: 35.01%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 95.6%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 73.76%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 30.28%
- v) the percentage of the fund invested in sustainable investments with a social objective: 40.43%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 85.41% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Ferrovial SE	Industrials	4.4%	Netherlands
3i Group	Financials	3.84%	United Kingdom
Industria de Diseno Textil SA	Consumer Discretionary	3.79%	Spain
Ahold Delhaize	Consumer Staples	3.36%	Netherlands
TotalEnergies SE	Energy	3.2%	France
UniCredit (A)	Financials	2.92%	Italy
Sage Group	Information Technology	2.86%	United Kingdom
Kone (B)	Industrials	2.75%	Finland
Coca-Cola Europacific Partners	Consumer Staples	2.65%	United Kingdom
Allianz	Financials	2.59%	Germany
NatWest Group	Financials	2.57%	United Kingdom
KBC Group	Financials	2.57%	Belgium
AIB Group	Financials	2.43%	Ireland
Roche Holding AG	Healthcare	2.25%	Switzerland
Reckitt Benckiser Group	Consumer Staples	2.23%	United Kingdom

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 85.41% in sustainable investments.

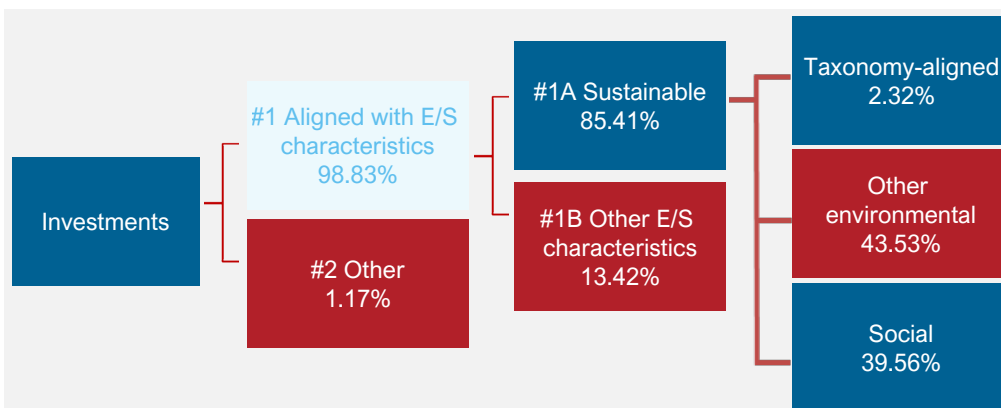

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 98.83%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 85.41% in sustainable investments of which 2.32% have an environmental objective (which is aligned with the EU Taxonomy), 43.53% have an environmental objective (which is not aligned with the EU Taxonomy) and 39.56% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	0.96%
Consumer Discretionary	Speciality Retail	3.79%
	Hotels Restaurants & Leisure	3.69%
	Media	1.89%
	Auto Components	1.82%
Consumer Staples	Food & Staples Retailing	4.93%
	Personal Products	3.52%
	Beverages	2.65%
	Household Products	2.23%
Energy	Oil, Gas & Consumable Fuels	3.2%
Financials	Diversified Financial Services	5.93%
	Commercial Banks	10.49%
	Insurance	10.08%
Healthcare	Pharmaceuticals	5.89%

Utilities	Multi-Utilities	1.92%
	Electric Utilities	1.5%

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 2.32%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 1.28%
- 2) climate change adaptation: 0.02%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

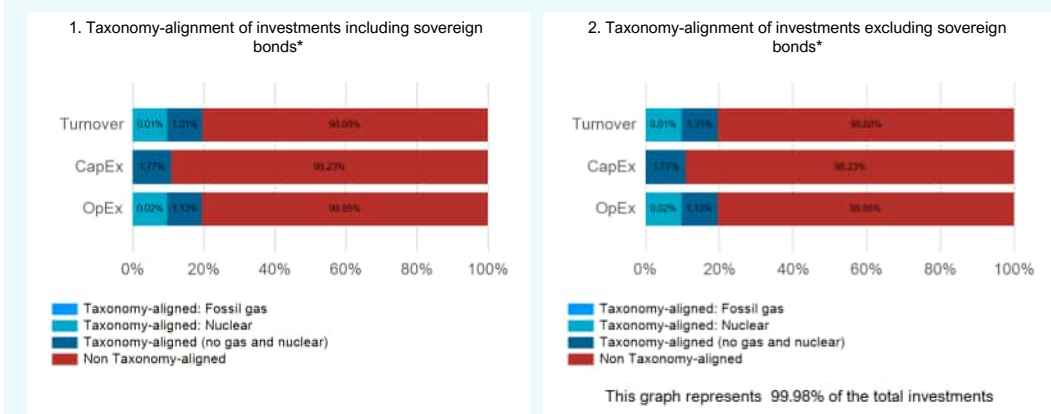

☒ Yes

☐ In fossil gas

☒ In nuclear energy

☐ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 1.16% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 3.0% based on Turnover, 5.6% based on CapEx and 3.8% based

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 3.0% based on Turnover, 5.6% based on CapEx and 3.8% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 3.04% based on Turnover, 5.08% based on CapEx and 4.75% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 3.04% based on Turnover, 5.08% based on CapEx and 4.75% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 43.53%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 39.56%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - European Larger Companies Fund

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 84.95% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided below covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 95.01%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.81 vs. 7.42

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 84.95%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 43.8%

iv) the percentage of the fund invested in sustainable investments with a social objective: 38.82%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 92.66%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 55.51%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 23.02%
- v) the percentage of the fund invested in sustainable investments with a social objective: 32.21%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 95.42%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 69.17%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 30.85%
- v) the percentage of the fund invested in sustainable investments with a social objective: 35.57%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 84.95% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Ferrovial SE	Industrials	4.34%	Netherlands
3i Group	Financials	3.85%	United Kingdom
Industria de Diseno Textil SA	Consumer Discretionary	3.78%	Spain
Ahold Delhaize	Consumer Staples	3.32%	Netherlands
TotalEnergies SE	Energy	3.14%	France
UniCredit (A)	Financials	2.9%	Italy
Sage Group	Information Technology	2.82%	United Kingdom
Kone (B)	Industrials	2.77%	Finland
Coca-Cola Europacific Partners	Consumer Staples	2.63%	United Kingdom
NatWest Group	Financials	2.59%	United Kingdom
KBC Group	Financials	2.58%	Belgium
Allianz	Financials	2.58%	Germany
AIB Group	Financials	2.57%	Ireland
Roche Holding AG	Healthcare	2.23%	Switzerland
SAP SE	Information Technology	2.21%	Germany

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 84.95% in sustainable investments.

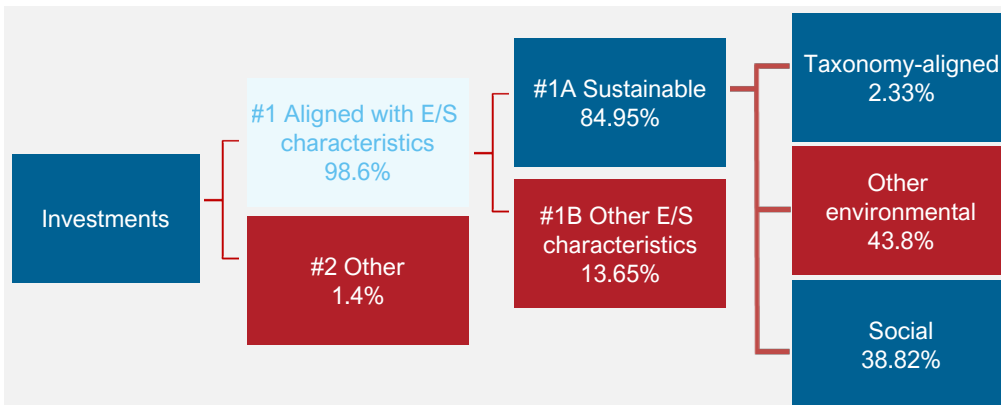

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 98.6%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 84.95% in sustainable investments of which 2.33% have an environmental objective (which is aligned with the EU Taxonomy), 43.8% have an environmental objective (which is not aligned with the EU Taxonomy) and 38.82% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	1%
Consumer Discretionary	Speciality Retail	3.78%
	Hotels Restaurants & Leisure	3.7%
	Media	1.9%
	Auto Components	1.84%
Consumer Staples	Food & Staples Retailing	4.9%
	Personal Products	3.46%
	Beverages	2.63%
	Household Products	2.2%
Energy	Oil, Gas & Consumable Fuels	3.14%

	Electric Utilities	1.48%

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 2.33%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 1.3%
- 2) climate change adaptation: 0.02%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

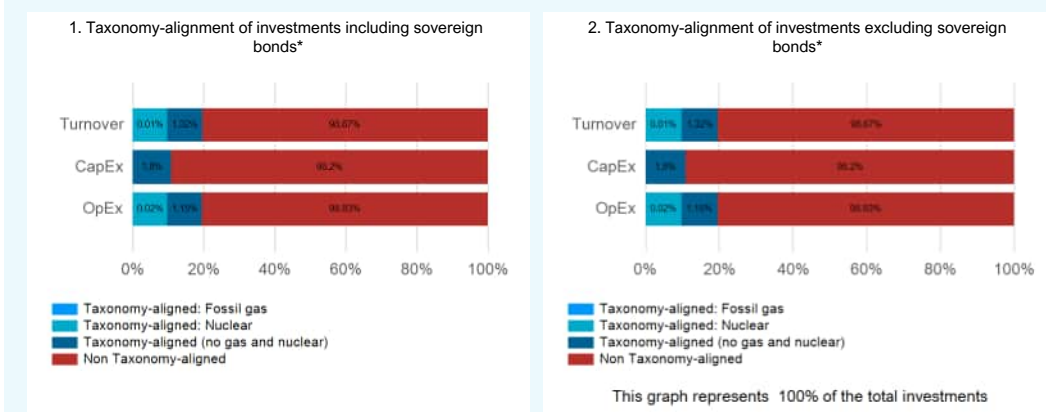

☒ Yes

☐ In fossil gas

☒ In nuclear energy

☐ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 1.16% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.4% based on Turnover, 2.7% based on CapEx and 1.8% based

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.4% based on Turnover, 2.7% based on CapEx and 1.8% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 2.75% based on Turnover, 4.8% based on CapEx and 4.38% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 2.75% based on Turnover, 4.8% based on CapEx and 4.38% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 43.8%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 38.82%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 51.79% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024.
- the data 'High ESG rating', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics ESG including product safety, supply chain, health and safety and human rights. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 93.03%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with high ESG ratings: 80.66%

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 51.79%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 32.04%

iv) the percentage of the fund invested in sustainable investments with a social objective: 17.84%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 85.87%

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 36.92%

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 17.24%

v) the percentage of the fund invested in sustainable investments with a social objective: 17.66%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 89.01%

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 39.16 %

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 21.69 %

v) the percentage of the fund invested in sustainable investments with a social objective: 15.98%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 51.79% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching “do no significant harm” requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "[Sustainable investing framework](#)".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Balfour Beatty	Industrials	2.41%	United Kingdom

Banca Generali (A)	Financials	1.33%	Italy

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 51.79% in sustainable investments.

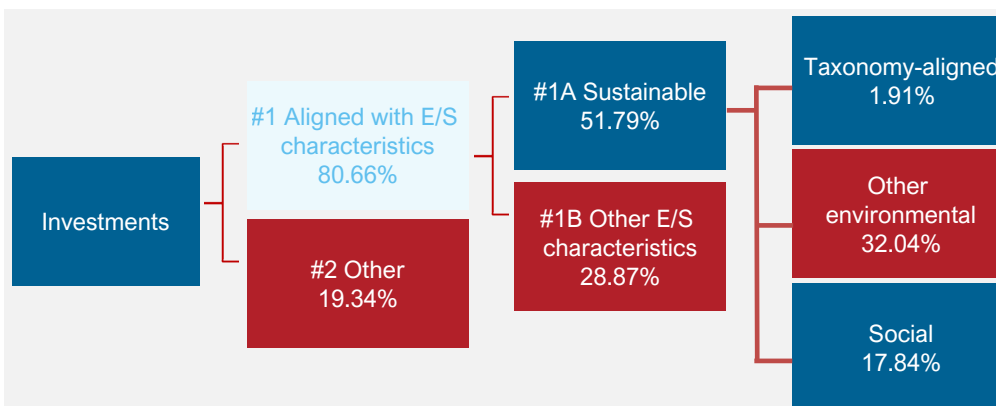

What was the asset allocation?

The proportion of the investments of the fund used to meet the sustainable investment objective, in accordance with the binding elements of the investment strategy of the financial product is 51.79% , which corresponds to the proportion of fund invested in sustainable investments. This included 1.91% have an environmental objective (which is aligned with the EU Taxonomy), 32.04% have an environmental objective (which is not aligned with the EU Taxonomy) and 17.84% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Closed Ended Fund	Closed End Fund	2.2%

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 1.91%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 1.12%
- 2) climate change adaptation: 0.55%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems.

To accommodate these additions, this year's reporting approach has been adjusted:

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

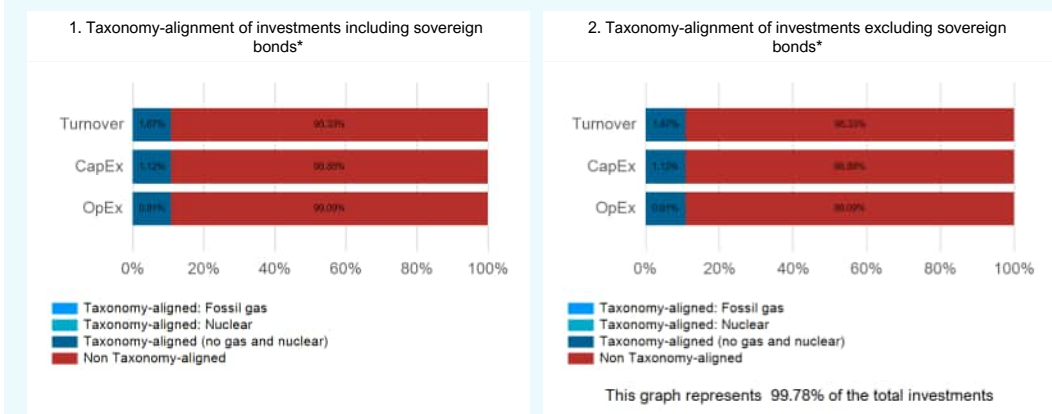

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0.75% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.6% based on Turnover, 0.7% based on CapEx and 1% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.6% based on Turnover, 0.7% based on CapEx and 1% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.98% based on Turnover, 0.82% based on CapEx and 0.9% based on OpEx. The quarterly average share of sustainable investments (excluding

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.98% based on Turnover, 0.82% based on CapEx and 0.9% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 32.04%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 17.84%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - FIRST All Country World Fund

Legal entity identifier:
549300AT2RPDETJ66407

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62.53% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided below covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 90.33%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.61 vs. 7.00

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 62.53%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 33.76%

iv) the percentage of the fund invested in sustainable investments with a social objective: 28.22%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 88.11%
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 51.6%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 23.53%
- v) the percentage of the fund invested in sustainable investments with a social objective: 28.07%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 91.31%
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 54.53%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 28.24%
- v) the percentage of the fund invested in sustainable investments with a social objective: 26.18%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 62.53% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Nvidia	Information Technology	4.02%	United States
Microsoft	Information Technology	4.01%	United States
Amazon.Com	Consumer Discretionary	2.84%	United States
Boston Scientific	Healthcare	2.77%	United States
Alphabet (A)	Information Technology	2.62%	United States
Centrica	Utilities	2.51%	United Kingdom
Fidelity Institutional Liquidity Fund - A-ACC-USD	Open Ended Fund	2.51%	Ireland
Taiwan Semiconductor Manufacturing	Information Technology	2.49%	Taiwan
Morgan Stanley	Financials	2.08%	United States
Makita	Industrials	1.95%	Japan
Wells Fargo &	Financials	1.92%	United States
JPMorgan Chase &	Financials	1.91%	United States
Axa SA (A)	Financials	1.9%	France
Kerry Group (A)	Consumer Staples	1.84%	Ireland
General Electric	Industrials	1.81%	United States

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 62.53% in sustainable investments.

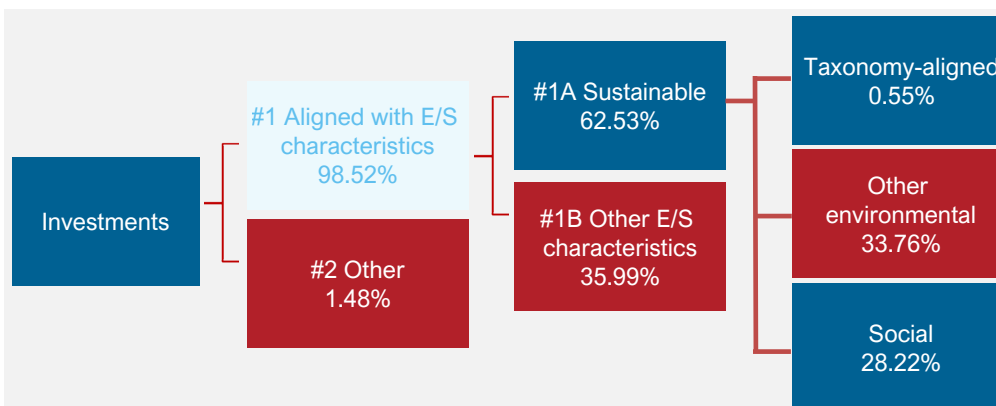

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 98.52%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 62.53% in sustainable investments of which 0.55% have an environmental objective (which is aligned with the EU Taxonomy), 33.76% have an environmental objective (which is not aligned with the EU Taxonomy) and 28.22% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Media	0.98%
Consumer Discretionary	Multiline Retail	3.62%
	Household Durables	2.18%

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.55%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0.29%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

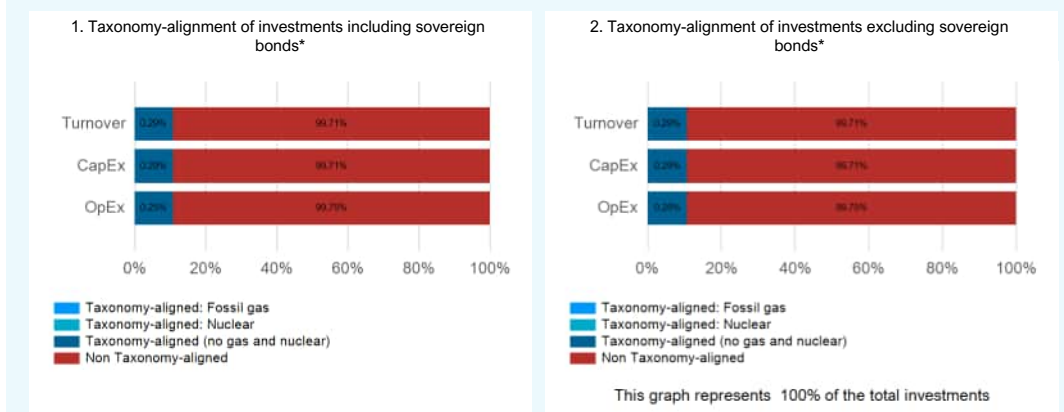

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.02% for transitional activities and 0.13% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.1% based on Turnover, 0.4% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.1% based on Turnover, 0.4% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.39% based on Turnover, 0.67% based on CapEx and 0.25% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.39% based on Turnover, 0.67% based on CapEx and 0.25% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 33.76%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 28.22%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than its benchmark.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Future Connectivity Fund

Legal entity identifier:

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 76.74% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework. The fund's approach towards promoting environmental and social characteristics was subsequently revised in accordance with the updated Fidelity Sustainable Investing Framework with effect from 28 March 2025, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024, 31 July 2024 to 27 March 2025 and additional information will be provided covering the period from 28 March 2025 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024.
- the data 'High ESG rating', which is new data adopted between 31 July 2024 and 27 March 2025, was compiled based on the monthly average of the data between 31 July 2024 and 27 March 2025
- the data 'ESG score', which is new data as from 28 March 2025, was compiled based on the fortnightly average of the data between 28 March 2025 and 30 April 2025.
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings.

ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

Between 31 July 2024 and 27 March 2025, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics ESG including product safety, supply chain, health and safety and human rights. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above.

As from 28 March 2025, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 94.15%

For the period 31 July 2024 - 27 March 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

ii) the percentage of the fund invested in securities of issuers with high ESG ratings: 87.13%

For the period 28 March 2025 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

ii) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.46 vs. 7.00

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 76.74%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 60.87%

(iv) the percentage of the fund invested in sustainable investments with a social objective: 15.87%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 92.65%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 46.55%.
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 31.4%
- v) the percentage of the fund invested in sustainable investments with a social objective: 14.95%.

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 94.04%
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 62.49%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 50.62%
- (v) the percentage of the fund invested in sustainable investments with a social objective: 11.22%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 76.74% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Apple	Information Technology	5.63%	United States
Microsoft	Information Technology	5.47%	United States
Alphabet	Information Technology	4.54%	United States
Amazon.com	Consumer Discretionary	4.35%	United States
Prosus	Consumer Discretionary	3.84%	Netherlands
NVIDIA	Information Technology	3.73%	United States
Meta Platforms (A)	Information Technology	3.66%	United States
Taiwan Semiconductor Manufacturing ADR	Information Technology	3.3%	Taiwan
Samsung Electronics	Information Technology	3.14%	Korea (South)
SAP SE	Information Technology	3.14%	Germany
Full Truck Alliance ADR	Industrials	3.14%	China
Alibaba Group Holding ADR	Consumer Discretionary	3.08%	China
Salesforce	Information Technology	3.04%	United States
Amadeus IT Group SA (A)	Consumer Discretionary	2.94%	Spain
MediaTek	Information Technology	2.92%	Taiwan

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 76.74% in sustainable investments.

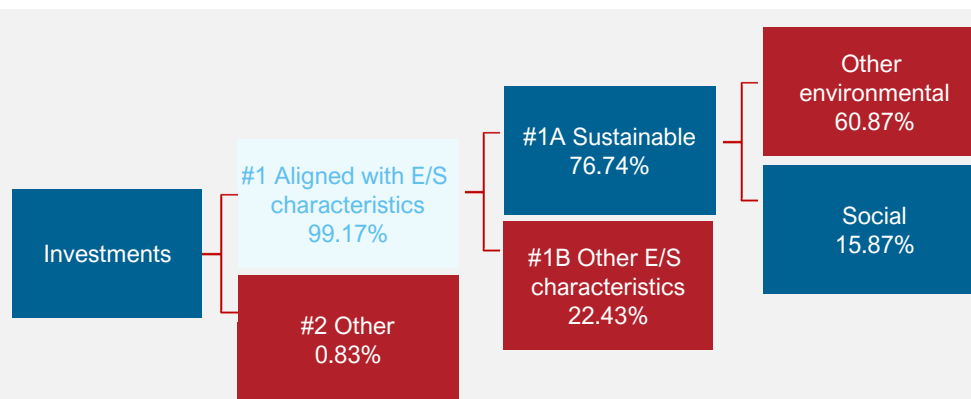

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 99.17%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 76.74% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 60.87% have an environmental objective (which is not aligned with the EU Taxonomy) and 15.87% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Hotels Restaurants & Leisure	5.07%
	Multiline Retail	13.84%
Financials	Diversified Financial Services	2.09%
Healthcare	Health Care Equipment & Supplies	1.97%
Industrials	Road & Rail	3.14%
	Electrical Equipment	2.32%
Information Technology	Computers & Peripherals	8.77%
	Internet Software & Services	8.2%
	Electronic Equipment Instruments & Components	6.04%
	Semiconductor Equipment & Products	26.86%
	Software	19.51%
	IT Services	1.5%
Open Ended Fund	Closed Ended Cash Fund	0.57%

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective

and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

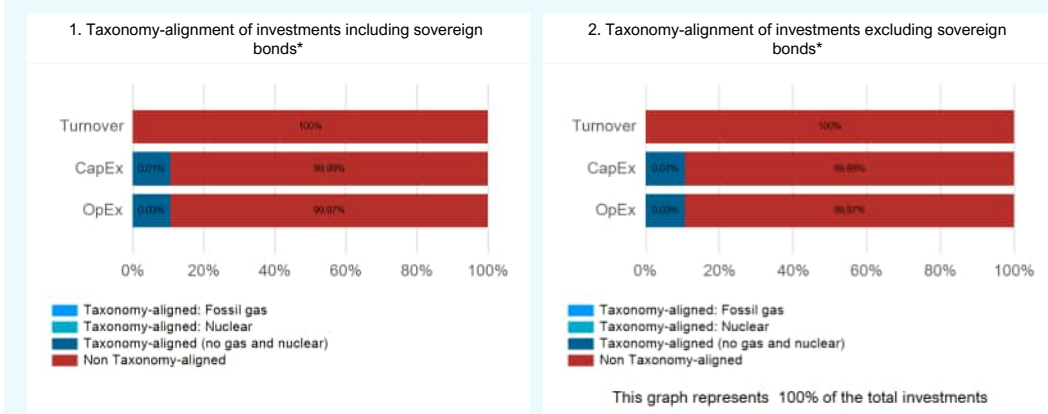

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.4% based on Turnover, 0.3% based on CapEx and 1.1% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.4% based on Turnover, 0.3% based on CapEx and 1.1% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.07% based on Turnover, 0.06% based on CapEx and 0.32% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.07% based on Turnover, 0.06% based on CapEx and 0.32% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 60.87%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 15.87%.

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 75.86% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 99.64%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.44 vs. 6.70

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 75.86%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 41.12%

iv) the percentage of the fund invested in sustainable investments with a social objective: 32.37%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, not applicable as this fund was uplifted to an Article 8 fund in 11 August 2023.

For the period 11 August 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 98.26%.

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 72.07%

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 33.7%

v) the percentage of the fund invested in sustainable investments with a social objective: 38.1%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 75.86% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
- (vi) Investments in UCITS and UCIs - Fidelity referenced its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) were considering principal adverse impacts on sustainability factors. The fund relied on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considered principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
SAP SE	Information Technology	9.92%	Germany
Deutsche Telekom AG	Communication Services	8.15%	Germany

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 75.86% in sustainable investments.

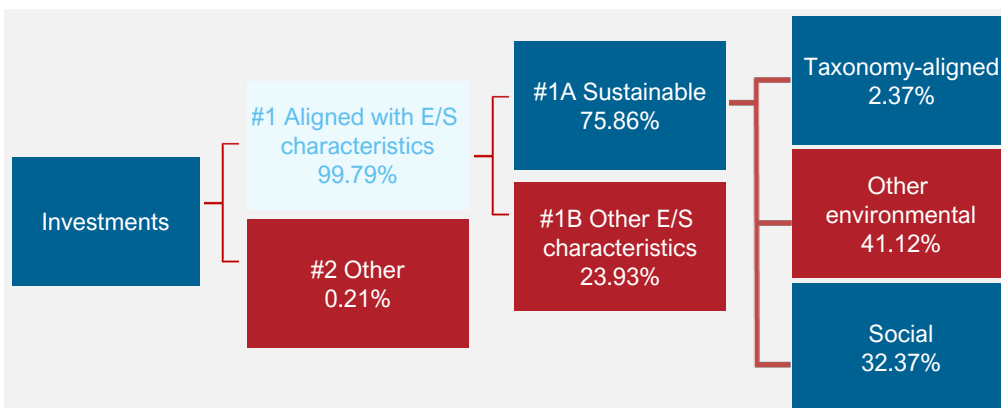

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 99.79%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 75.86% in sustainable investments of which 2.37% have an environmental objective (which is aligned with the EU Taxonomy), 41.12% have an environmental objective (which is not aligned with the EU Taxonomy) and 32.37% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 2.37%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 1.16%
- 2) climate change adaptation: 0.65%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety

and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

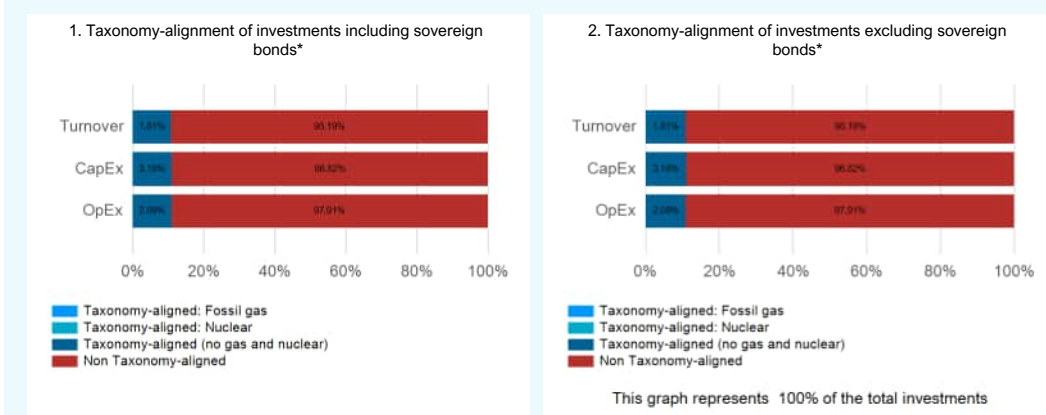

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.07% for transitional activities and 0.84% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, not applicable as this fund was uplifted to an

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

For the period 11 August 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.93% based on Turnover, 2.05% based on CapEx and 3.08% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.93% based on Turnover, 2.05% based on CapEx and 3.08% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 41.12%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 32.37%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Consumer Brands Fund

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 68.16% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework. The fund's approach towards promoting environmental and social characteristics was subsequently revised in accordance with the updated Fidelity Sustainable Investing Framework with effect from 28 March 2025, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024, 31 July 2024 to 27 March 2025 and additional information will be provided covering the period from 28 March 2025 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024.
- the data 'High ESG rating', which is new data adopted between 31 July 2024 and 27 March 2025, was compiled based on the monthly average of the data between 31 July 2024 and 27 March 2025.
- the data 'ESG score', which is new data as from 28 March 2025, was compiled based on the fortnightly average of the data between 28 March 2025 and 30 April 2025.
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings.

ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

Between 31 July 2024 and 27 March 2025, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics ESG including product safety, supply chain, health and safety and human rights. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above.

As from 28 March 2025, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 90.49%.

For the period 31 July 2024 - 27 March 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with high ESG ratings: 86.20%

For the period 28 March 2025 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.63 vs. 7.00

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 68.16%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy: 0%

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 47.88%

v) the percentage of the fund invested in sustainable investments with a social objective: 20.28%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 89.48%
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 61.72%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 46.91%
- v) the percentage of the fund invested in sustainable investments with a social objective: 14.81%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 91.07%
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 69.46%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 49.34%
- v) the percentage of the fund invested in sustainable investments with a social objective: 20.12%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 68.16% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Amazon.com	Consumer Discretionary	5.94%	United States
JPMorgan Chase & Co. Equity	Financials	5.1%	United States
Apple	Information Technology	4.73%	United States
Microsoft	Information Technology	4.64%	United States
Netflix	Communication Services	4.58%	United States
Meta Platforms (A)	Information Technology	3.97%	United States
NVIDIA	Information Technology	3.48%	United States
EssilorLuxottica SA (A)	Healthcare	3.41%	France
L'Oreal SA	Consumer Staples	3.32%	France
Cie Financiere Richemont SA	Consumer Discretionary	3.21%	Switzerland
Alphabet (A)	Information Technology	2.85%	United States
Morgan Stanley	Financials	2.38%	United States
Sony Group	Consumer Discretionary	2.2%	Japan
MoNCLer (A)	Consumer Discretionary	1.96%	Italy
Visa	Financials	1.92%	United States

Source of data: Fidelity International, as at 30 April 2025.

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 68.16% in sustainable investments.

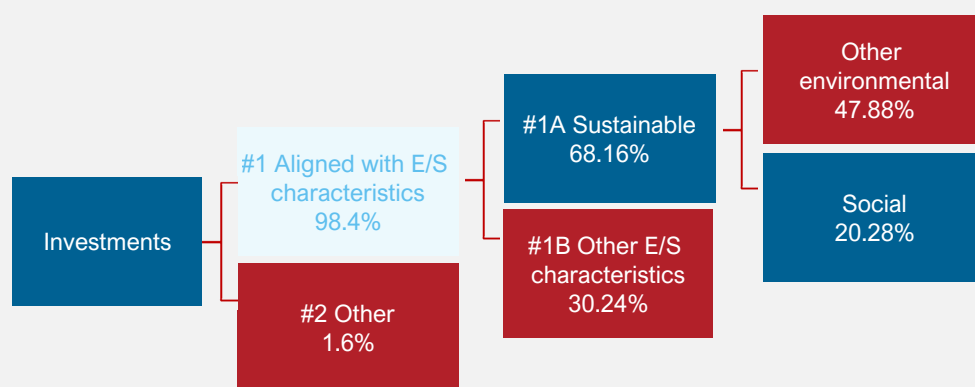

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 98.4%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 68.16% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 47.88% have an environmental objective (which is not aligned with the EU Taxonomy) and 20.28% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Media	5.04%
Consumer Discretionary	Hotels Restaurants & Leisure	8.81%
	Multiline Retail	6.27%

Source of data: Fidelity International, as at 30 April 2025.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other

activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

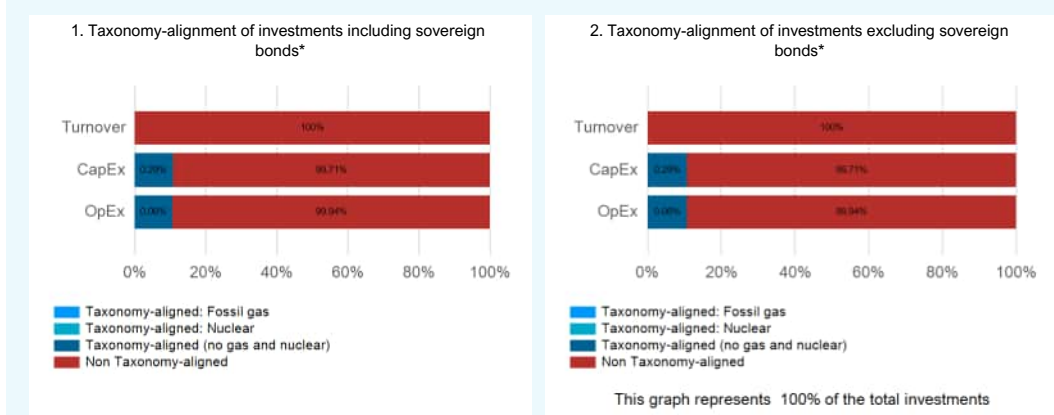

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.2% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

on Turnover, 0.2% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.02% based on Turnover, 0.75% based on CapEx and 0.14% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.02% based on Turnover, 0.75% based on CapEx and 0.14% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 47.88%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 20.28%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. Between 31 July 2024 and 27 March 2025, the fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings.
5. As from 28 March 2025, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024.
- the data 'High ESG rating', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics ESG including product safety, supply chain, health and safety and human rights. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 95.64%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with high ESG ratings: 93.76%

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 83.15%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 38.96%

iv) the percentage of the fund invested in sustainable investments with a social objective: 43.97%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 90.99%

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 72.29%

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 30.57%

v) the percentage of the fund invested in sustainable investments with a social objective: 40.27%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 97.03%

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 84.32 %

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 40.03 %

v) the percentage of the fund invested in sustainable investments with a social objective: 44.03%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 83.15% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching “do no significant harm” requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "[Sustainable investing framework](#)".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Microsoft	Information Technology	7%	United States
Amazon.com	Consumer Discretionary	6.77%	United States

Apple	Information Technology	3.95%	United States
Taiwan Semiconductor Manufacturing	Information Technology	3.9%	Taiwan
Alphabet (A)	Information Technology	3.29%	United States
NVIDIA	Information Technology	3.25%	United States
EssilorLuxottica SA (A)	Healthcare	3.18%	France
Visa	Financials	2.99%	United States
HDFC Bank	Financials	2.9%	India
Meta Platforms (A)	Information Technology	2.72%	United States
L'Oreal SA	Consumer Staples	2.63%	France
Keyence	Information Technology	2.5%	Japan
Air Liquide SA (A)	Materials	2.27%	France

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 83.15% in sustainable investments.

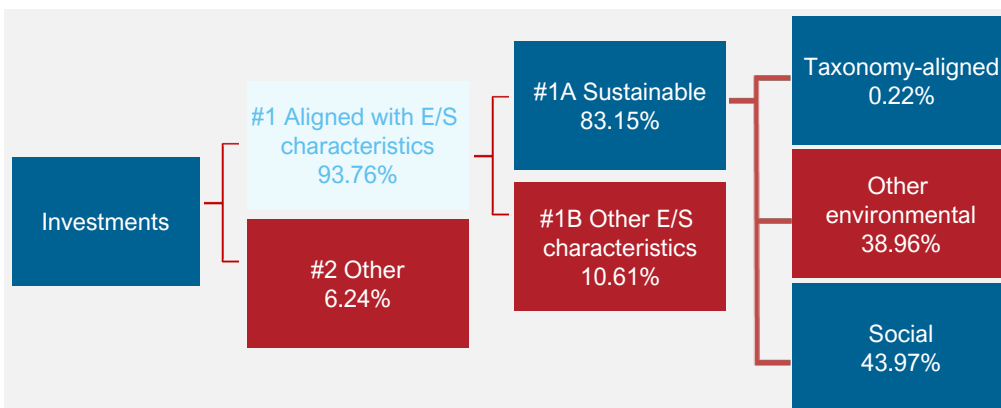

What was the asset allocation?

The proportion of the investments of the fund used to meet the sustainable investment objective, in accordance with the binding elements of the investment strategy of the financial product is 83.15% , which corresponds to the proportion of fund invested in sustainable investments. This included 0.22% have an environmental objective (which is aligned with the EU Taxonomy), 38.96% have an environmental objective (which is not aligned with the EU Taxonomy) and 43.97% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Media	0.62%
Consumer Discretionary	Multiline Retail	6.77%
	Textiles & Apparel	4.51%
	Speciality Retail	1.04%
	Hotels Restaurants & Leisure	0.92%
Consumer Staples	Personal Products	2.63%
	Food Products	0.49%

	Metals & Mining	1.96%
Open Ended Fund	Closed Ended Cash Fund	4.06%
Utilities	Electric Utilities	0.93%

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.22%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0.11%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems.

To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

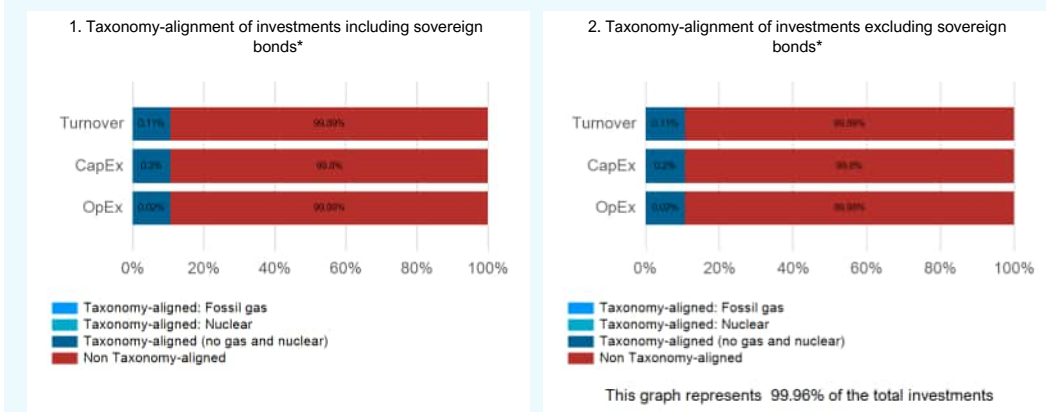

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0.01% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

the EU Taxonomy was 1.5% based on Turnover, 0.1% based on CapEx and 0.6% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.5% based on Turnover, 0.1% based on CapEx and 0.6% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.3% based on Turnover, 0.79% based on CapEx and 0.26% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.3% based on Turnover, 0.79% based on CapEx and 0.26% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 38.96%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 43.97%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 35.96% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided below covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024.
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 78.07%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.23 vs. 7.04

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 35.96%

iii) the percentage of the fund invested in sustainable investments with a social objective: 28.46%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 77.83%.

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 29.94%

iv) the percentage of the fund invested in sustainable investments with a social objective: 24.7%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 79.34%

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 33.19%

iv) the percentage of the fund invested in sustainable investments with a social objective: 25.68%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 35.96% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Berkshire Hathaway (B)	Financials	8.17%	United States
JPMorgan Chase &	Financials	8.06%	United States
Visa	Financials	4.73%	United States
Wells Fargo &	Financials	3.53%	United States
Mastercard (A)	Financials	3.41%	United States
Allianz	Financials	3.39%	Germany
Arthur J. Gallagher & Co.	Financials	2.62%	United States
Morgan Stanley	Financials	2.62%	United States
DBS Group Holdings	Financials	2.6%	Singapore
Muenchener Rueckversicherungs-Gesellschaft AG in Muenchen	Financials	2.59%	Germany
S&P Global	Financials	2.55%	United States
AXA SA (A)	Financials	2.51%	France

Mitsubishi UFJ Financial Group	Financials	2.39%	Japan
Interactive Brokers Group (A)	Financials	2.21%	United States

Source of data: Fidelity International, as at 30 April 2025.

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 35.96% in sustainable investments.

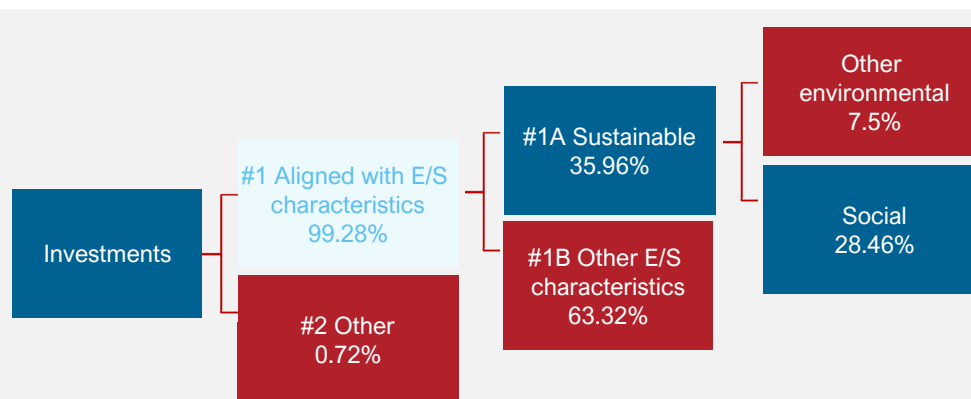

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 99.28%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 35.96% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 7.5% have an environmental objective (which is not aligned with the EU Taxonomy) and 28.46% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Financials	Diversified Financial Services	42.47%
	Commercial Banks	34.29%
	Insurance	21.64%
	Consumer Finance	0.52%
Industrials	Professional Services	0.99%
Open Ended Fund	Closed Ended Cash Fund	0.12%

Source of data: Fidelity International, as at 30 April 2025.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the

Enabling activities
directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities
are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

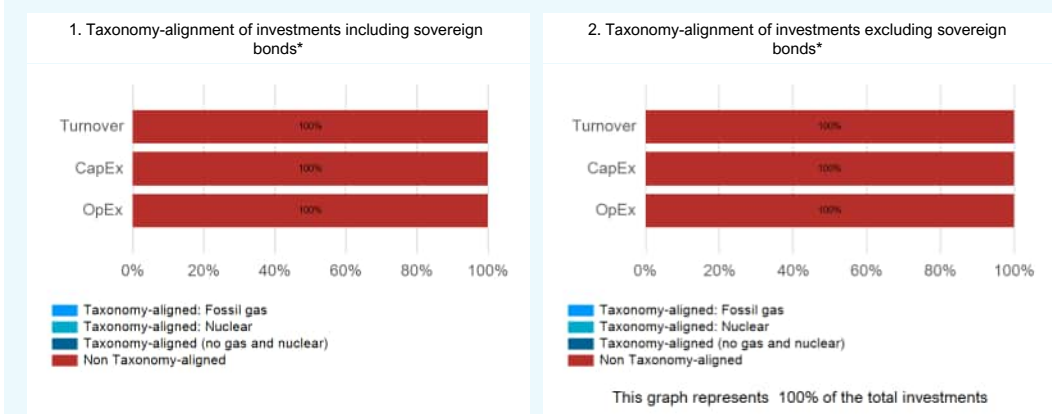

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes
☐ In fossil gas ☐ In nuclear energy
☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.1% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.1% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.17% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.17% based on CapEx and 0.0% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 7.5%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 28.46%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 69.49% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided below covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 89.42%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.48 vs. 7.00

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 69.49%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 41.08%

iv) the percentage of the fund invested in sustainable investments with a social objective: 28.26%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 83.06%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 54.69%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 30.61%
- v) the percentage of the fund invested in sustainable investments with a social objective: 23.97%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 86.65%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 64.29%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 34.51%
- v) the percentage of the fund invested in sustainable investments with a social objective: 29.59%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 69.49% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Microsoft	Information Technology	7.23%	United States
Lam Research	Information Technology	5.29%	United States
Broadcom	Information Technology	4.81%	United States
ANSYS	Information Technology	4.54%	United States
Intuit	Information Technology	3.81%	United States
Adobe	Information Technology	3.75%	United States
Meta Platforms (A)	Information Technology	3.45%	United States
NVIDIA	Information Technology	2.99%	United States
Amazon.com	Consumer Discretionary	2.9%	United States
Blackrock	Financials	2.45%	United States
Airbus SE	Industrials	2.43%	France
Apple	Information Technology	2.38%	United States
Arthur J Gallagher &	Financials	2.15%	United States

HDFC Bank	Financials	2.02%	India

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 69.49% in sustainable investments.

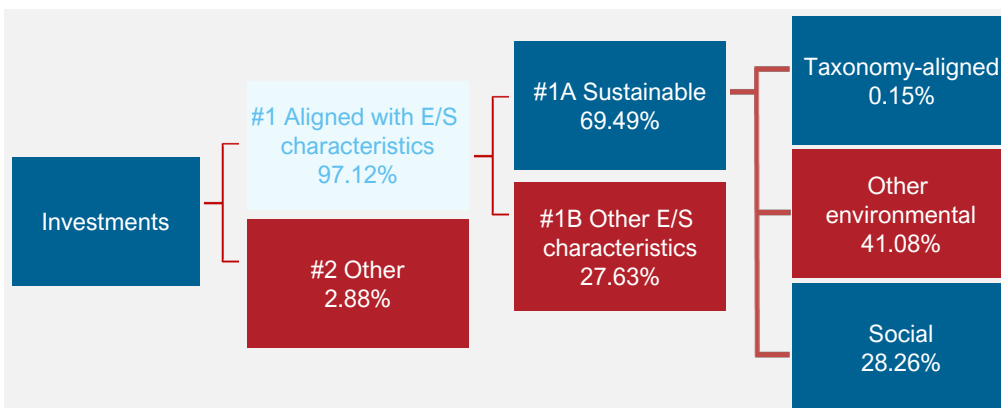

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 97.12%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 69.49% in sustainable investments of which 0.15% have an environmental objective (which is aligned with the EU Taxonomy), 41.08% have an environmental objective (which is not aligned with the EU Taxonomy) and 28.26% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Multiline Retail	3.95%
	Hotels Restaurants & Leisure	0.88%
	Textiles & Apparel	0.39%
	Speciality Retail	0.33%
	Auto Components	0.28%
	Household Durables	0.25%

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.15%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0.09%
- 2) climate change adaptation: 0%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end

of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

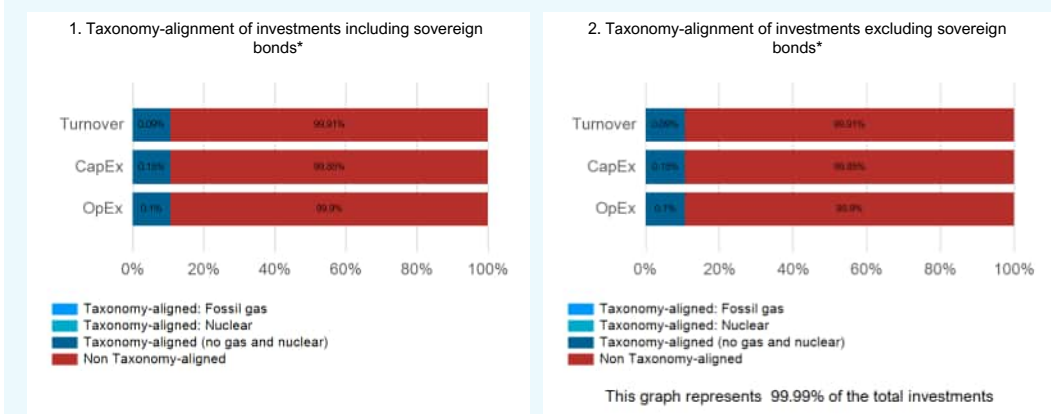

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0.08% for enabling activities, measured by Turnover.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.3% based on Turnover, 0.3% based on CapEx and 0.1% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.3% based on Turnover, 0.3% based on CapEx and 0.1% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.48% based on Turnover, 0.23% based on CapEx and 0.18% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.48% based on Turnover, 0.23% based on CapEx and 0.18% based on OpEx.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 41.08%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 28.26%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Healthcare Fund

Legal entity identifier:
549300Z8HWYC400OQA29

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 96.91% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024.
- the data 'High ESG rating', which is new data adopted between 31 July 2024 and 27 March 2025, was compiled based on the monthly average of the data between 31 July 2024 and 27 March 2025.
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing directly or indirectly in securities of issuers with favourable ESG characteristics and/or in UCITS and/or UCIs which either promote environmental/social characteristics or have a sustainable investment objective. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

Between 31 July 2024 and 27 March 2025, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics ESG including product safety, supply chain, health and safety and human rights. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above.

As from 28 March 2025, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in equities of companies that are involved in the design, manufacture, or sale of products and services used in connection with health care, medicine or biotechnology. The fund partially intended to make sustainable investments.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 91.35%

For the period 31 July 2024 - 27 March 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with high ESG ratings: 89.54%

For the period 28 March 2025 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund used to meet the environmental or social characteristics promoted by the fund: 97.51%

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 96.91%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 0.29%

iv) the percentage of the fund invested in sustainable investments with a social objective: 96.62%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 93.24%
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 84.28%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 0.8%
- v) the percentage of the fund invested in sustainable investments with a social objective: 83.48%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 97.58%
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 95.26%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 0.56%
- (v) the percentage of the fund invested in sustainable investments with a social objective: 94.7%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 96.91% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
- (vi) Investments in UCITS and UCIs - Fidelity referenced its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) were considering principal adverse impacts on sustainability factors. The fund relied on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considered principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "[Sustainable investing framework](#)".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Eli Lilly &	Healthcare	9.38%	United States
Boston Scientific	Healthcare	7.64%	United States
Roche Holding AG	Healthcare	5.95%	Switzerland

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 96.91% in sustainable investments.

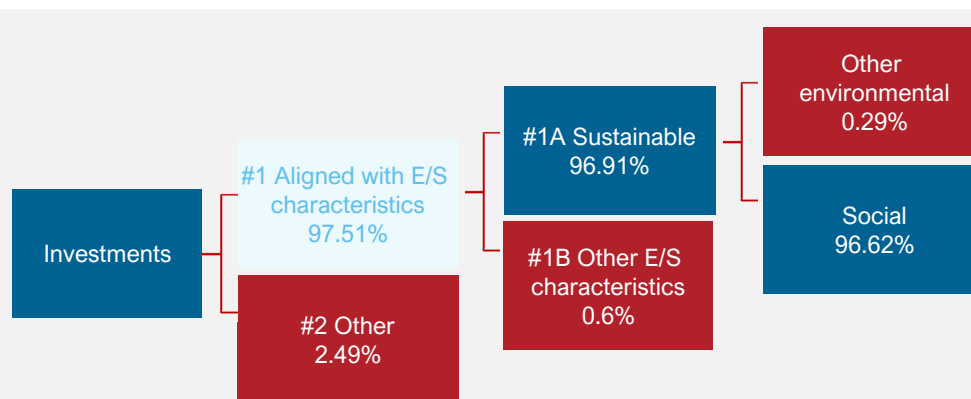

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 97.51%, which corresponds to the proportion of fund meeting the environmental or social characteristics promoted by the fund. This included 96.91% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 0.29% have an environmental objective (which is not aligned with the EU Taxonomy) and 96.62% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Healthcare	Pharmaceuticals	32.42%
	Health Care Equipment & Supplies	28.14%
	Life Sciences Tools & Services	15.08%
	Health Care Providers & Services	12.45%
	Biotechnology	10.2%
Open Ended Fund	Closed Ended Cash Fund	1.05%

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the

Enabling activities
directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities
are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

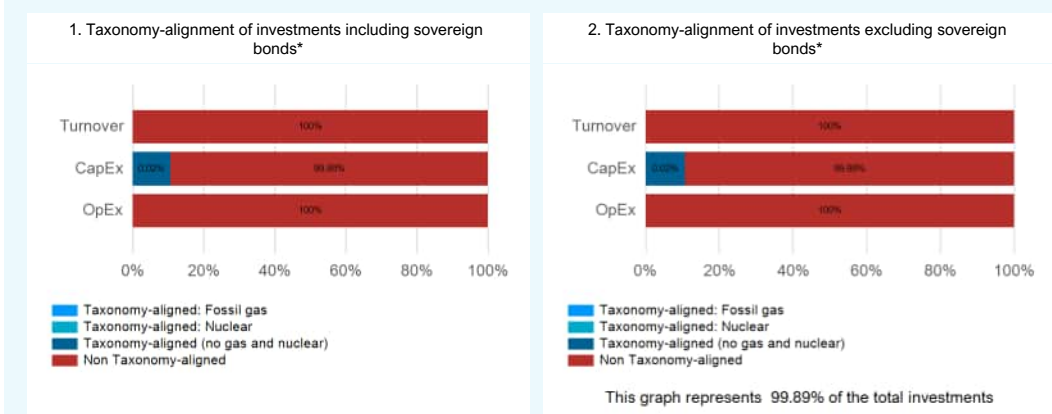

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0% based on Turnover, 0% based on CapEx and 0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

bonds) with an environmental objective aligned with the EU Taxonomy was 0% based on Turnover, 0% based on CapEx and 0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0% based on Turnover, 0.04% based on CapEx and 0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0% based on Turnover, 0.04% based on CapEx and 0% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 0.29%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 96.62%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. Between 31 July 2024 and 27 March 2025, the fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings.
5. As from 28 March 2025, the fund promoted environmental and social characteristics by aligning to the fund's sustainability theme.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Technology Fund

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 97.05%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.47 vs. 6.04

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 71.25%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 58.08%

iv) the percentage of the fund invested in sustainable investments with a social objective: 12.93%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 91.02%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 54.4%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 38.57%
- v) the percentage of the fund invested in sustainable investments with a social objective: 15.6%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 94.44%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 59.62%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 46.28%
- v) the percentage of the fund invested in sustainable investments with a social objective: 13.25%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 71.25% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
- (vi) Investments in UCITS and UCIs - Fidelity referenced its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) were considering principal adverse impacts on sustainability factors. The fund relied on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considered principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	7.1%	Taiwan
Microsoft	Information Technology	5.65%	United States
Apple	Information Technology	4.17%	United States

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 71.25% in sustainable investments.

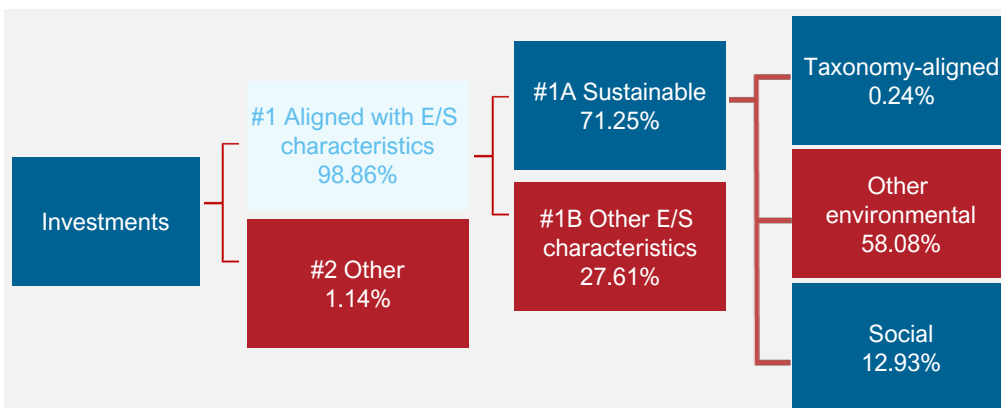

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 98.86%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 71.25% in sustainable investments of which 0.24% have an environmental objective (which is aligned with the EU Taxonomy), 58.08% have an environmental objective (which is not aligned with the EU Taxonomy) and 12.93% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.24%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0.08%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

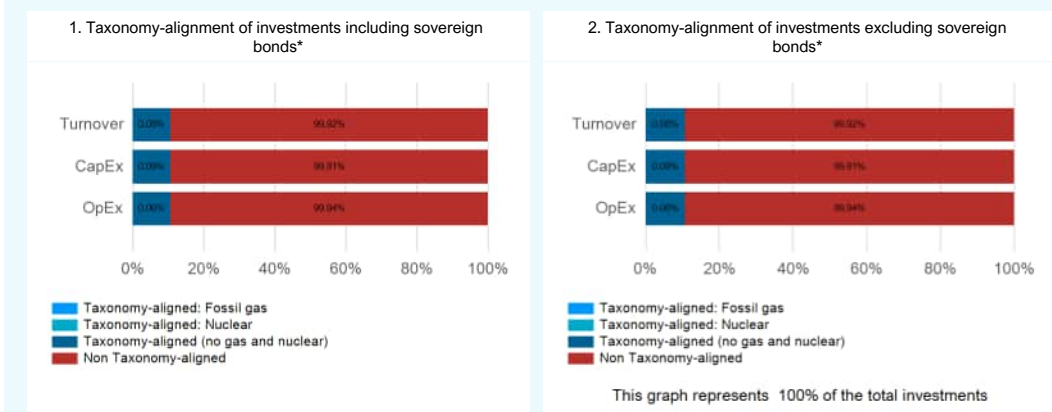

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0.08% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.3% based on Turnover, 0.1% based on CapEx and 0.4% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

bonds) with an environmental objective aligned with the EU Taxonomy was 0.3% based on Turnover, 0.1% based on CapEx and 0.4% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.01% based on Turnover, 0.08% based on CapEx and 0.05% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.01% based on Turnover, 0.08% based on CapEx and 0.05% based on OpEx.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 58.08%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 12.93%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Thematic Opportunities Fund

Legal entity identifier:
5493007VVU2XBPB4GZ92

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 68.5% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing directly or indirectly in securities of issuers with favourable ESG characteristics and/or in UCITS and/or UCIs which either promote environmental/social characteristics or have a sustainable investment objective.

Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental

and social characteristics by adhering to specific Fidelity multi asset ESG criteria which integrated minimum ESG ratings requirements. Environmental and social characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. When investing in UCITS or UCIs managed by third parties, the fund relied on ESG methodology and exclusion policies used by third-party asset managers and index providers as well as their engagement and voting policies and practices.

The Fidelity multi asset ESG criteria required that a minimum of 70% of the fund's assets complied with the following:

- Direct securities with a Fidelity ESG rating of C or above (or in the absence of a Fidelity ESG rating, an MSCI ESG rating of BB or above);
- Internal investment strategies separately managed by Fidelity that have a Fidelity Multi Asset Manager Research ESG rating of C or above;
- Third-party managed UCITS or UCIs with a Fidelity Multi Asset Manager Research Rating of C or above, or a Fidelity ESG rating of C or above;
- Government debt securities that were subject to negative screening based on the Investment Manager's internal sovereign exclusion framework which concentrates on three principles relating to governance, respect for human rights and foreign policy. Sovereigns failing to meet the standards of the framework are identified based on a proprietary assessment. To support this assessment the Investment Manager makes reference to international recognised indicators such as the World Bank's Worldwide Governance Indicators and UN Security Council sanctions.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 94.2%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the investments of the fund which complies with the Fidelity multi asset ESG criteria: 99.36%

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 68.5%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 41.26%

iv) the percentage of the fund invested in sustainable investments with a social objective: 25.86%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 81.36%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 59.89%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 25.31%
- v) the percentage of the fund invested in sustainable investments with a social objective: 31.59%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 94.29%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 70.89%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 39.67%
- v) the percentage of the fund invested in sustainable investments with a social objective: 28.95%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 68.5% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
- (vi) Investments in UCITS and UCIs - Fidelity referenced its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) were considering principal adverse impacts on sustainability factors. The fund relied on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considered principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Microsoft	Information Technology	3.83%	United States
Nvidia	Information Technology	3.43%	United States
Alphabet (A)	Information Technology	2.31%	United States
US Treasury Bill 03/07/2025	Government	1.98%	United States
US Treasury Bill 12/06/2025	Government	1.98%	United States
Fidelity Institutional Liquidity Fund - A-Acc-USD	Open Ended Fund	1.94%	Ireland
Siemens Energy AG	Industrials	1.86%	Germany
Visa	Financials	1.56%	United States
JPMorgan Chase &	Financials	1.53%	United States
US Treasury Bill 17/06/2025	Government	1.51%	United States
US Treasury Bill 20/06/2025	Government	1.51%	United States
Taiwan Semiconductor Manufacturing	Information Technology	1.43%	Taiwan
Amazon.Com	Consumer Discretionary	1.4%	United States
Apple	Information Technology	1.08%	United States
Boston Scientific	Healthcare	0.96%	United States

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 68.5% in sustainable investments.

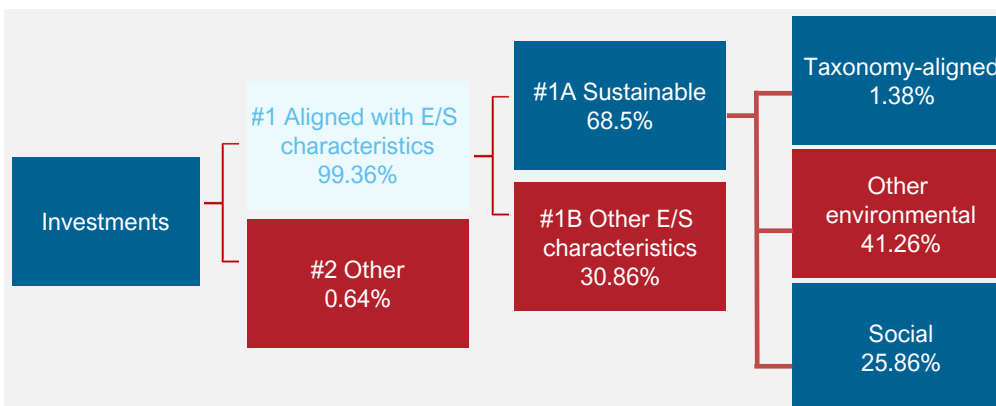

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 99.36%, which corresponds to the proportion of fund complying with the Fidelity multi asset ESG criteria. This included 68.5% in sustainable investments of which 1.38% have an environmental objective (which is aligned with the EU Taxonomy) and 41.26% have an environmental objective (which is not aligned with the EU Taxonomy) and 25.86% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official

accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 1.38%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0.89%
- 2) climate change adaptation: 0.01%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

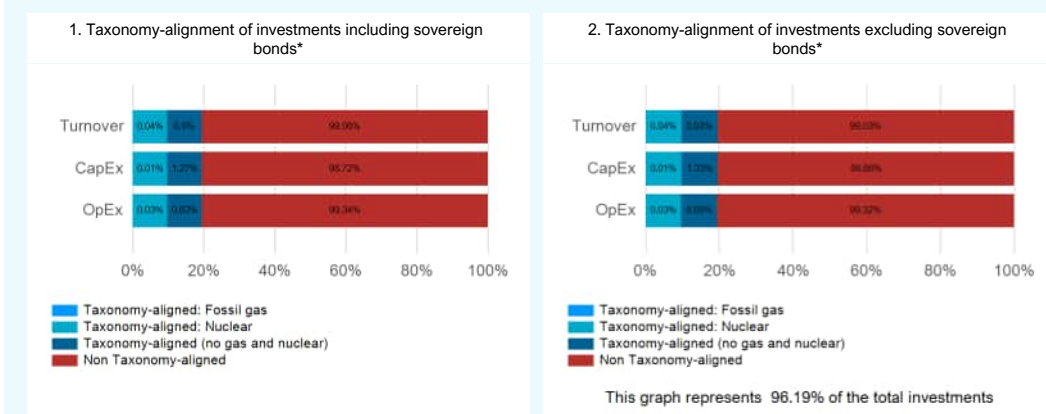

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☒ Yes
- ☐ In fossil gas ☒ In nuclear energy
- ☐ No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.01% for transitional activities and 0.65% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 4.9% based on Turnover, 1.8% based on CapEx and 1.6% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 5.1% based on Turnover, 1.8% based on CapEx and 1.7% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 2.95% based on Turnover, 2.49% based on CapEx and 1.79% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 3% based on Turnover, 2.56% based on CapEx and 1.84% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 41.26%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 25.86%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by adhering to specific Fidelity multi asset ESG criteria which integrated minimum ESG ratings requirements.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Greater China Fund

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 48.11% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024.
- the data 'High ESG rating', which is new data adopted between 31 July 2024 and 27 March 2025, was compiled based on the monthly average of the data between 31 July 2024 and 27 March 2025.
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing directly or indirectly in securities of issuers with favourable ESG characteristics and/or in UCITS and/or UCIs which either promote environmental/social characteristics or have a sustainable investment objective. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 83.01%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.20 vs. 4.70

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 48.11%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 40.69%

iv) the percentage of the fund invested in sustainable investments with a social objective: 7.42%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 86%
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 35.93%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 16.33%
- v) the percentage of the fund invested in sustainable investments with a social objective: 19.59%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 81.3%
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 33.97%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 20.88%
- (v) the percentage of the fund invested in sustainable investments with a social objective: 13.09%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 48.11% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
- (vi) Investments in UCITS and UCIs - Fidelity referenced its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) were considering principal adverse impacts on sustainability factors. The fund relied on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considered principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "[Sustainable investing framework](#)".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Tencent Holdings	Information Technology	9.89%	CHINA
Taiwan Semiconductor Manufacturing	Information Technology	9.16%	TAIWAN
Alibaba Group Holding	Consumer Discretionary	9.1%	CHINA
MediaTek	Information Technology	4.02%	TAIWAN
China Construction Bank (H)	Financials	3.54%	CHINA
TRIP.COM GROUP	Consumer Discretionary	3.14%	CHINA
Hong Kong Exchanges & Clearing	Financials	3.04%	HONG KONG
China Merchants Bank (H)	Financials	2.38%	CHINA
NetEase	Consumer Discretionary	2.16%	CHINA
PDD Holdings	Consumer Discretionary	2.08%	IRELAND
ASUSTeK Computer	Information Technology	2.04%	TAIWAN
Industrial & Commercial Bank of China (H)	Financials	1.85%	CHINA
BYTEDANCE	Information Technology	1.72%	CHINA
Contemporary Amperex Technology (A)	Industrials	1.7%	CHINA
Meituan (B)	Consumer Discretionary	1.7%	CHINA

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 48.11% in sustainable investments.

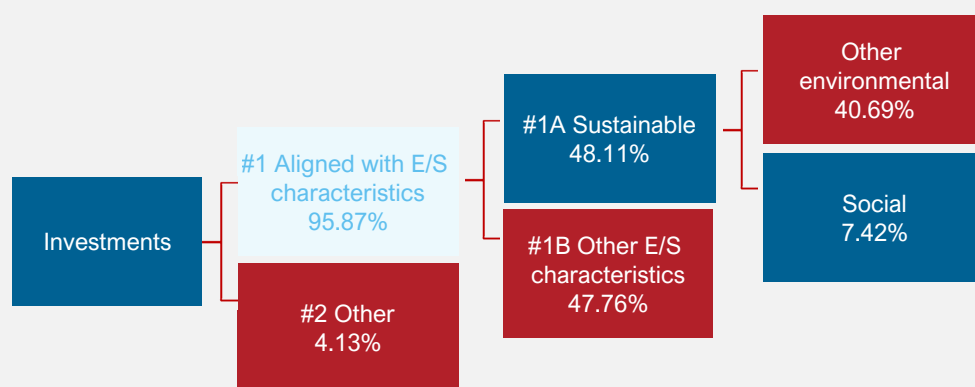

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 95.87%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 48.11% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 40.69% have an environmental objective (which is not aligned with the EU Taxonomy) and 7.42% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For

nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

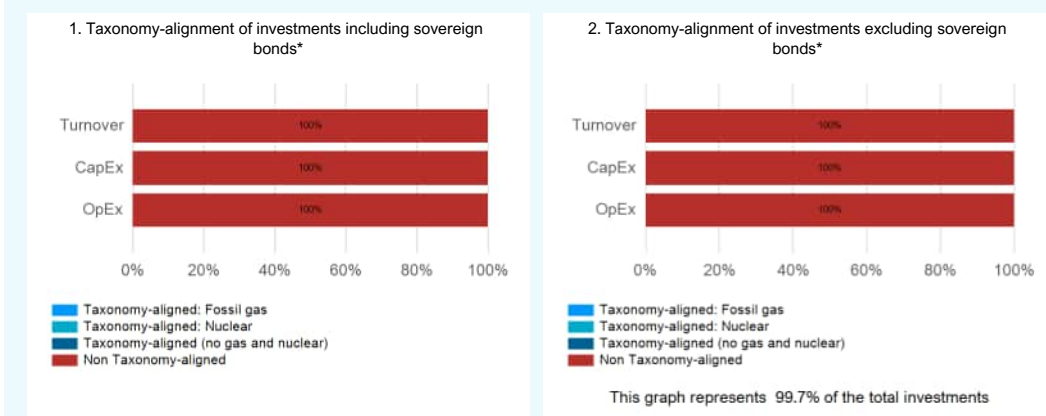

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.2% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.2% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 40.69%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 7.42%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 47.79% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 82.33%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.20 vs. 4.70

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 47.79%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 40.52%

(iv) the percentage of the fund invested in sustainable investments with a social objective: 7.27%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 85.45%
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 35.51%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 16.30%
- v) the percentage of the fund invested in sustainable investments with a social objective: 19.2%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 80.82%
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 33.88%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 20.66%
- (v) the percentage of the fund invested in sustainable investments with a social objective: 13.22%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 47.79% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
- (vi) Investments in UCITS and UCIs - Fidelity referenced its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) were considering principal adverse impacts on sustainability factors. The fund relied on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considered principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Tencent Holdings	Information Technology	9.86%	CHINA
Taiwan Semiconductor Manufacturing	Information Technology	9.17%	TAIWAN
Alibaba Group Holding	Consumer Discretionary	8.97%	CHINA
MediaTek	Information Technology	3.97%	TAIWAN
China Construction Bank (H)	Financials	3.63%	CHINA
Hong Kong Exchanges & Clearing	Financials	3.03%	HONG KONG
TRIP.COM GROUP	Consumer Discretionary	3.02%	CHINA
China Merchants Bank (H)	Financials	2.47%	CHINA
NetEase	Consumer Discretionary	2.15%	CHINA
PDD Holdings	Consumer Discretionary	2.06%	IRELAND
ASUSTeK Computer	Information Technology	1.99%	TAIWAN
Industrial & Commercial Bank of China (H)	Financials	1.78%	CHINA
Meituan (B)	Consumer Discretionary	1.69%	CHINA
Contemporary Amperex Technology (A)	Industrials	1.68%	CHINA
BYTEDANCE	Information Technology	1.61%	CHINA

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 47.79% in sustainable investments.

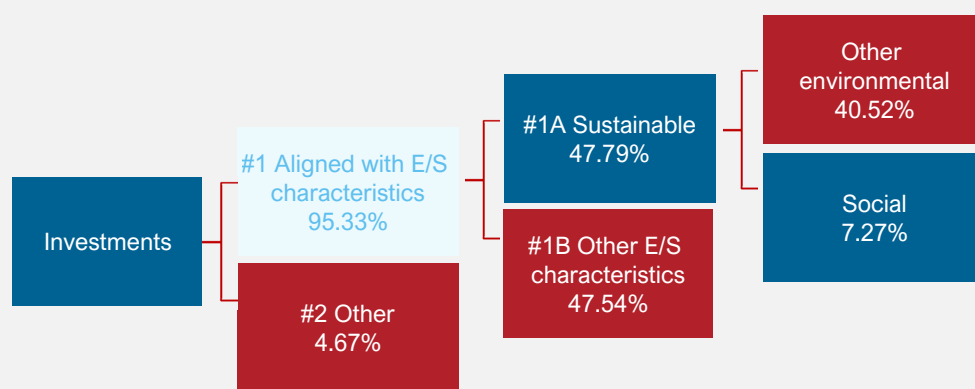

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 95.33%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 47.79% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 40.52% have an environmental objective (which is not aligned with the EU Taxonomy) and 7.27% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Wireless Telecommunication Services	1.38%
Consumer Discretionary	Hotels Restaurants & Leisure	4.71%
	Media	2.15%
	Multiline Retail	11.03%
	Auto Components	1.69%
	Household Durables	1.52%
	Diversified Consumer Services	0.87%
	Automobiles	0.83%
	Textiles & Apparel	0.82%
Consumer Staples	Food Products	1.35%
	Beverages	1.29%
	Personal Products	0.83%
Energy	Oil, Gas & Consumable Fuels	0.71%
Equity Linked Notes	Equity Linked Notes	0.71%

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For

nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

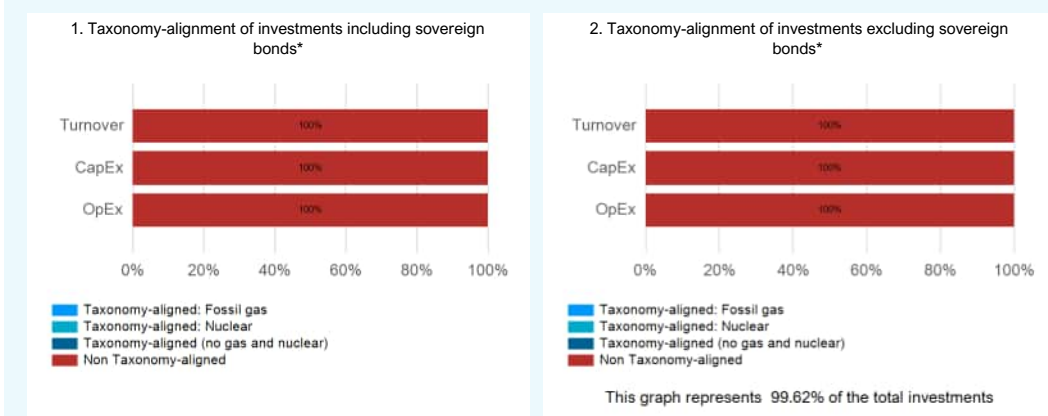

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy'?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.3% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.3% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 40.52%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 7.27%.

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Iberia Fund

Legal entity identifier:
549300C6GMKNSN647A81

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 58.46% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 86.88%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 6.84 vs. 6.73

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 58.46%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 41.43%

iv) the percentage of the fund invested in sustainable investments with a social objective: 7.49%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 88.83%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 55.6%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 32.27%
- v) the percentage of the fund invested in sustainable investments with a social objective: 16.96%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 86.39%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 56.95%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 41.92%
- v) the percentage of the fund invested in sustainable investments with a social objective: 11.95%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 58.46% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
- (vi) Investments in UCITS and UCIs - Fidelity referenced its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) were considering principal adverse impacts on sustainability factors. The fund relied on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considered principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Banco Santander SA (A)	Financials	9.21%	Spain
Iberdrola SA (A)	Utilities	7.89%	Spain
Industria de Diseno Textil SA	Consumer Discretionary	6.71%	Spain
Amadeus IT Group SA (A)	Consumer Discretionary	5.63%	Spain
Banco Comercial Portugues SA	Financials	4.25%	Portugal
Redeia Corp SA (A)	Utilities	4.09%	Spain
BBVAentaria SA (A)	Financials	3.95%	Spain
Aena SME SA (A)	Industrials	3.77%	Spain
Indra Sistemas SA (A)	Information Technology	3.56%	Spain
Grenergy Renovables SA	Utilities	3.3%	Spain
Cellnex Telecom SA (A)	Communication Services	3.17%	Spain
Endesa SA (A)	Utilities	3.15%	Spain
Jeronimo Martins SGPS SA	Consumer Staples	3%	Portugal
Laboratorios Farmaceuticos Rovi SA	Healthcare	2.89%	Spain
Galp Energia SGPS SA (A)	Energy	2.84%	Portugal

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 58.46% in sustainable investments.

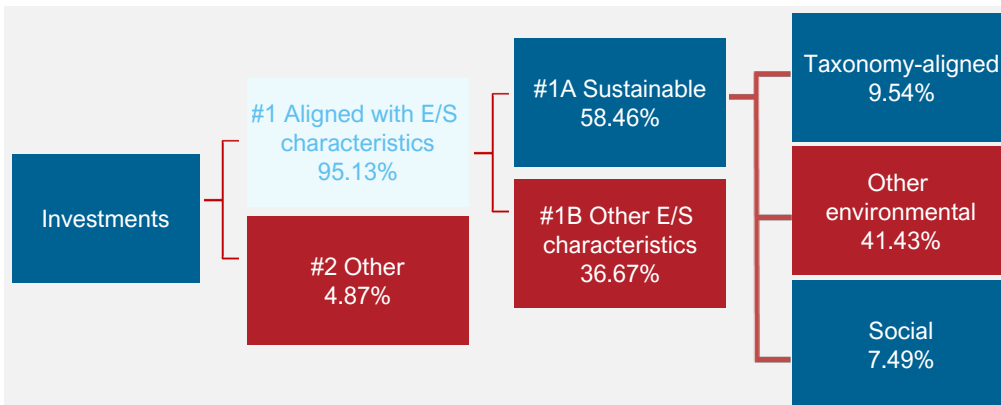

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 95.13%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 58.46% in sustainable investments of which 9.54% have an environmental objective (which is aligned with the EU Taxonomy), 41.43% have an environmental objective (which is not aligned with the EU Taxonomy) and 7.49% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	3.17%
Consumer Discretionary	Speciality Retail	6.71%
	Hotels Restaurants & Leisure	6.48%
	Auto Components	1.57%
	Household Durables	0.79%
Consumer Staples	Food & Staples Retailing	3.55%
	Food Products	3.32%
Energy	Oil, Gas & Consumable Fuels	2.84%
	Energy Equipment & Services	1.26%
Financials	Commercial Banks	23.6%
Healthcare	Pharmaceuticals	4.2%
	Biotechnology	1.57%
	Health Care Providers & Services	0.65%
Industrials	Transportation Infrastructure	3.77%
	Machinery	2.59%
	Construction & Engineering	1.91%
Information Technology	IT Services	3.56%
Open Ended Fund	Closed Ended Cash Fund	2.71%
Real Estate	Real Estate Investment Trusts (Reits)	2.41%
	Equity - Common Stock - Real Est Mgt & Dev - Real	0.89%
Utilities	Independent Power Producers & Energy Traders	4.25%
	Electric Utilities	15.13%

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 9.54%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 6.99%
- 2) climate change adaptation: 0.16%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

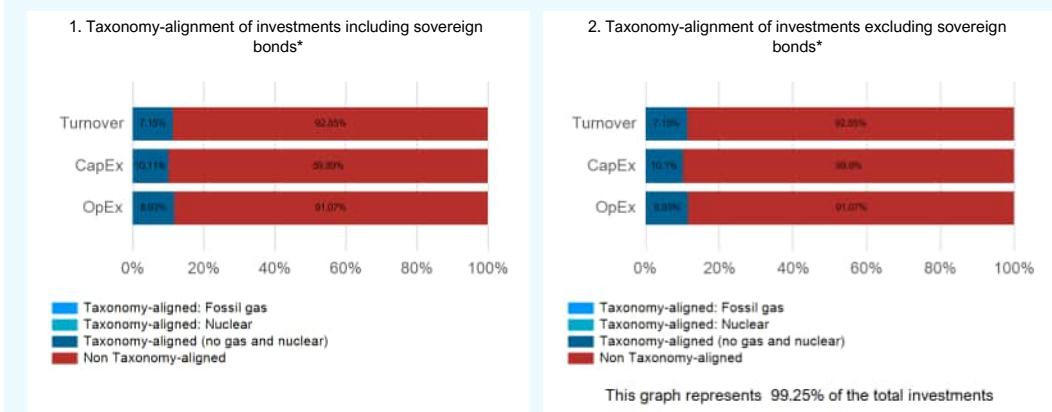

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes
☐ In fossil gas ☐ In nuclear energy
☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 4.65% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 2% based on Turnover, 3.2% based on CapEx and 5.3% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 2% based on Turnover, 3.2% based on CapEx and 5.3% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

the EU Taxonomy was 5.84% based on Turnover, 9.9% based on CapEx and 6.95% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 5.84% based on Turnover, 9.9% based on CapEx and 6.95% based on OpEx.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 41.43%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 7.49%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - India Focus Fund

Legal entity identifier:
549300H5IORI7FHCNE34

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 49.88% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided below covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024.
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 85.20%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.05 vs. 6.06

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 49.88%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 13.38%

iv) the percentage of the fund invested in sustainable investments with a social objective: 36.5%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 84.84%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 47%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 6.73%
- v) the percentage of the fund invested in sustainable investments with a social objective: 40.26%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 86.59%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 47.84%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 12.78%
- v) the percentage of the fund invested in sustainable investments with a social objective: 35.06%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 49.88% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
ICICI Bank	Financials	9.97%	India
HDFC Bank	Financials	5.16%	India
HDFC Bank	Financials	4.68%	India
HCL Technologies	Information Technology	4.62%	India
Axis Bank	Financials	4.58%	India
Fortis HealthCARE	Healthcare	3.38%	India
Infosys ADR	Information Technology	3.33%	India
Maruti Suzuki India	Consumer Discretionary	2.92%	India
Bharti Airtel	Communication Services	2.91%	India
Fidelity Institutional Liquidity Fund - A-ACC-USD	Open Ended Fund	2.7%	Ireland
Godrej Consumer Products	Consumer Staples	2.48%	India
Havells India	Industrials	2.08%	India
Eicher Motors	Consumer Discretionary	2.07%	India
Five-Star Business Finance	Financials	1.96%	India
ICICI Lombard General Insurance (A)	Financials	1.92%	India

Source of data: Fidelity International, as at 30 April 2025.

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 49.88% in sustainable investments.

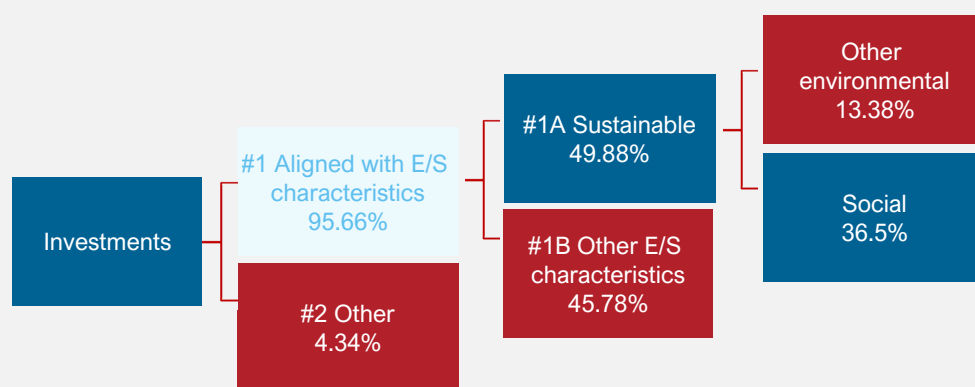

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 95.66%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 49.88% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 13.38% have an environmental objective (which is not aligned with the EU Taxonomy) and 36.5% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Wireless Telecommunication Services	2.91%
Consumer Discretionary	Automobiles	6.26%
	Textiles & Apparel	4.04%
	Hotels Restaurants & Leisure	3.86%
	Auto Components	1.6%
Consumer Staples	Personal Products	2.48%
	Food Products	1.37%
	Food & Staples Retailing	0.33%
Energy	Oil, Gas & Consumable Fuels	1.8%
Financials	Consumer Finance	5.1%
	Insurance	3.97%
	Commercial Banks	24.47%
	Diversified Financial Services	0.7%
Healthcare	Health Care Providers & Services	4.81%
	Pharmaceuticals	3.92%
	Life Sciences Tools & Services	1.43%
	Health Care Technology	0.36%
	Biotechnology	0%

	Chemicals	1.11%
Open Ended Fund	Closed Ended Cash Fund	2.7%
Real Estate	Equity - Common Stock - Real Estate - Office Reits	1.3%
	Equity - Common Stock - Real Est Mgt & Dev - Real	0.92%

Source of data: Fidelity International, as at 30 April 2025.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0.02% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.3% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.3% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 13.38%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 36.5%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Italy Fund

Legal entity identifier:
549300KCMWWQDPOVF030

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 30.04% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 74.48%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 6.32 vs. 6.08

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 30.04%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy: 3.52%

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 13.4%

v) the percentage of the fund invested in sustainable investments with a social objective: 13.12%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 78.26%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 28.74%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy: 4.36%
- v) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 15.01%
- vi) the percentage of the fund invested in sustainable investments with a social objective: 9.37%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 72.65%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 29.95%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy: 4.34%
- v) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 15.81%
- vi) the percentage of the fund invested in sustainable investments with a social objective: 9.79%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 30.04% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
- (vi) Investments in UCITS and UCIs - Fidelity referenced its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) were considering principal adverse impacts on sustainability factors. The fund relied on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considered principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
UniCredit (A)	Financials	9.49%	Italy
Enel (A)	Utilities	6.98%	Italy
Intesa Sanpaolo	Financials	6.24%	Italy
Banca Monte dei Paschi di Siena (A)	Financials	4.82%	Italy

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 30.04% in sustainable investments.

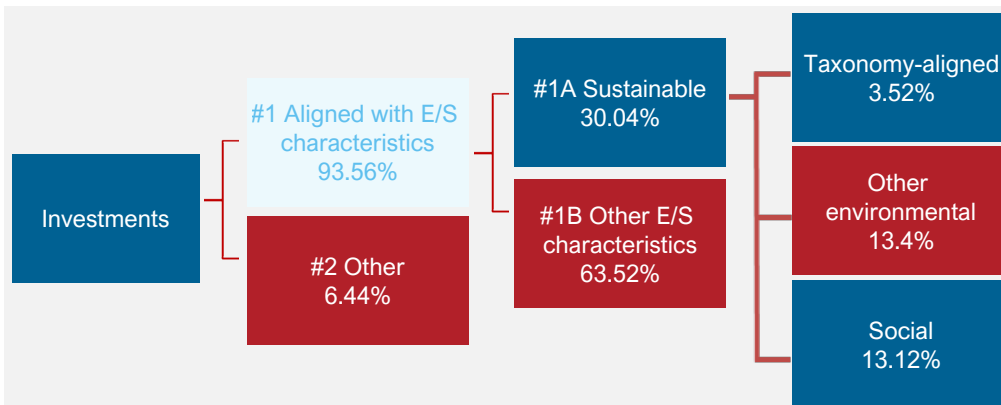

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 93.56%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 30.04% in sustainable investments of which 3.52% have an environmental objective (which is aligned with the EU Taxonomy), 13.4% have an environmental objective (which is not aligned with the EU Taxonomy) and 13.12% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	3.04%
Consumer Discretionary	Hotels Restaurants & Leisure	3.51%

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 3.52%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 2.85%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded

substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

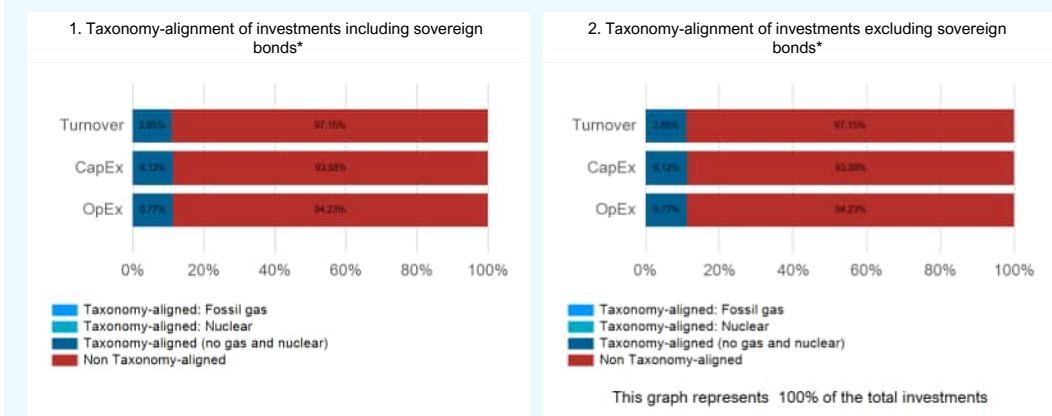

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 1.12% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 4.5% based on Turnover, 10.1% based on CapEx and 7.2% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 4.5% based on Turnover, 10.1% based on CapEx and 7.2% based on OpEx.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 4.61% based on Turnover, 12.15% based on CapEx and 9.73% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 4.61% based on Turnover, 12.15% based on CapEx and 9.73% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 13.4%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 13.12%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Japan Equity ESG Fund

<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024.
- the data 'High ESG rating', which is new data adopted between 31 July 2024 and 27 March 2025, was compiled based on the monthly average of the data between 31 July 2024 and 27 March 2025.
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing directly or indirectly in securities of issuers with favourable ESG characteristics and/or in UCITS and/or UCIs which either promote environmental/social characteristics or have a sustainable investment objective. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

Between 31 July 2024 and 27 March 2025, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with high ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics ESG including product safety, supply chain, health and safety and human rights. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 95.16%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with high ESG ratings: 98.1%

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 54.38%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 38.24%

iv) the percentage of the fund invested in sustainable investments with a social objective: 16.14%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 89.13%.

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 54.97%

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 27.60%

v) the percentage of the fund invested in sustainable investments with a social objective: 27.26%.

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 92.79%

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 56.44%

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 33.21%

v) the percentage of the fund invested in sustainable investments with a social objective: 22.82%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 54.38% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching “do no significant harm” requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 54.38% in sustainable investments.

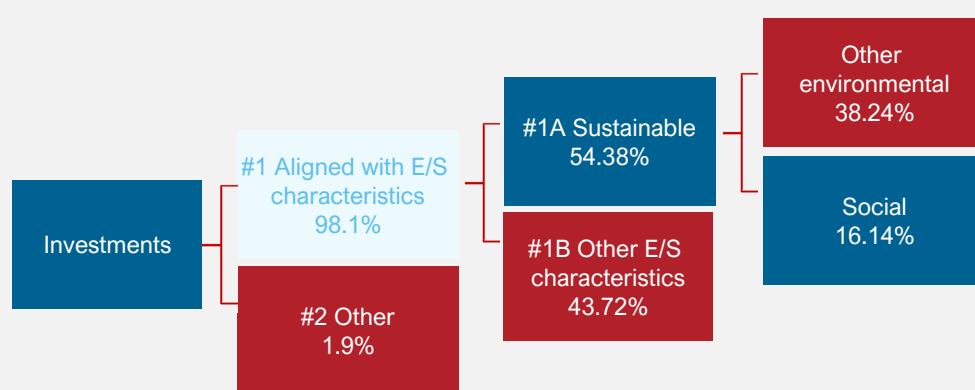

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 98.1%, which corresponds to the proportion of fund invested in securities with high ESG ratings. This included 54.38% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 38.24% have an environmental objective (which is not aligned with the EU Taxonomy) and 16.14% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%
- 2) climate change adaptation: 0%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end

of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available..

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

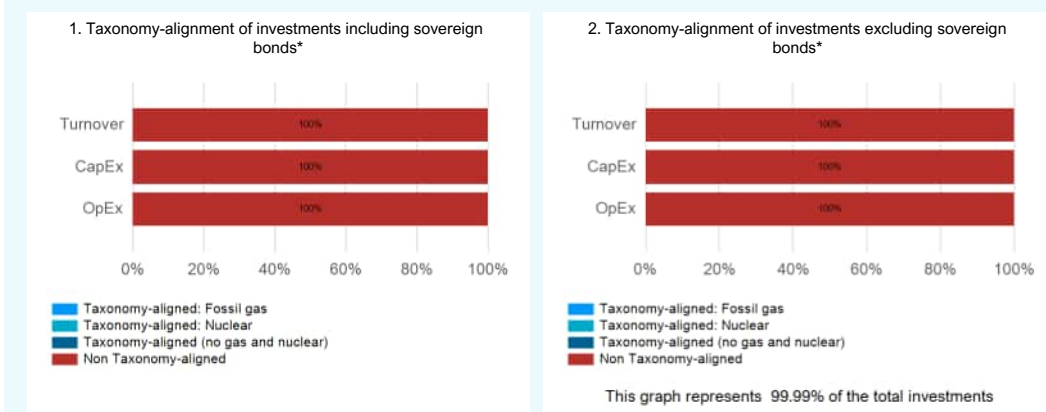

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.6% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.6% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 38.24%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 16.14%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Japan Growth Fund

Legal entity identifier:
549300HZWG6GBKD16L77

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 33.55% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 64.15%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.00 vs. 5.86

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 33.55%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 21.92%

(iv) the percentage of the fund invested in sustainable investments with a social objective: 11.63%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, not applicable as this fund was uplifted to an Article 8 fund on 11 August 2023.

For the period 11 August 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 56.6%

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 23.85%

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 17.87%

(v) the percentage of the fund invested in sustainable investments with a social objective: 5.98%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 33.55% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching “do no significant harm” requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
- (vi) Investments in UCITS and UCIs - Fidelity referenced its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) were considering principal adverse impacts on sustainability factors. The fund relied on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considered principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Ryohin Keikaku	Consumer Discretionary	7.02%	JAPAN
Toyota Industries	Industrials	5.24%	JAPAN
Sony Group	Consumer Discretionary	3.67%	JAPAN
Osaka Soda	Materials	3.36%	JAPAN
Mizuho Financial Group	Financials	3.34%	JAPAN
Recruit Holdings	Industrials	3.23%	JAPAN
Keyence	Information Technology	3.23%	JAPAN
Hitachi	Industrials	3.15%	JAPAN
Yonex	Consumer Discretionary	2.7%	JAPAN
IHI	Industrials	2.59%	JAPAN

Riken Keiki	Information Technology	2.07%	JAPAN
Olympus	Healthcare	2.07%	JAPAN
Sanrio	Consumer Discretionary	1.66%	JAPAN
Credit Saison	Financials	1.63%	JAPAN

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 33.55% in sustainable investments.

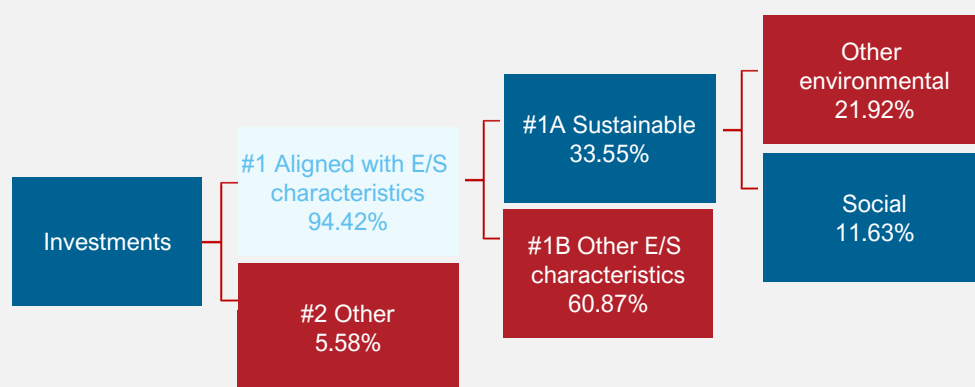

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 94.42%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 33.55% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 21.92% have an environmental objective (which is not aligned with the EU Taxonomy) and 11.63% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective

on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

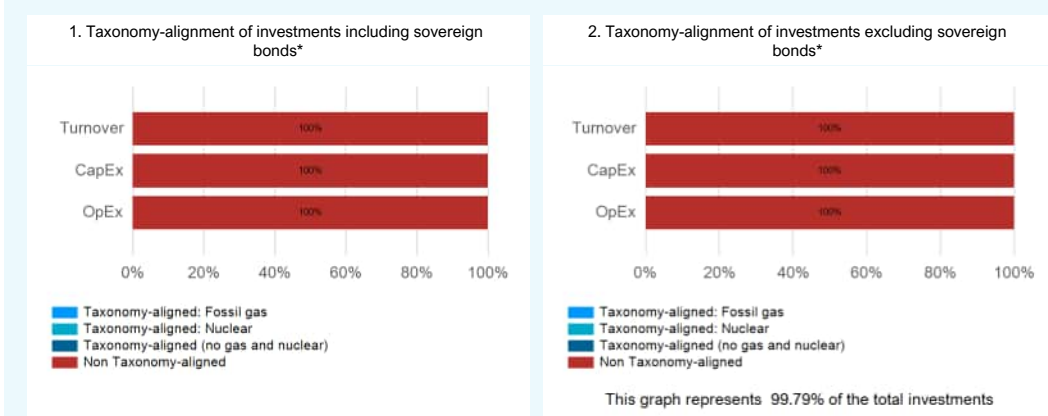

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, not applicable as this fund was uplifted to an Article 8 fund on 11 August 2023.

For the period 11 August 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.01% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.01% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 21.92%.

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 11.63%.

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Japan Value Fund

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 41.66% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided below covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024.
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 87.62%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.30 vs. 7.17

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 41.66%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 31.66%

iv) the percentage of the fund invested in sustainable investments with a social objective: 10%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

The fund was uplifted to an Article 8 in August 11, 2023.

For the period 11 August 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 80.58%.

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 37.18%

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 28.7%

v) the percentage of the fund invested in sustainable investments with a social objective: 8.23%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 41.66% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching “do no significant harm” requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Hitachi	Industrials	5.17%	Japan
Toyota Industries	Industrials	4.91%	Japan
Sumitomo Mitsui Financial Group	Financials	4.78%	Japan
NEC	Information Technology	4.18%	Japan
Mitsubishi UFJ Financial Group	Financials	3.99%	Japan
ITOCHU	Industrials	3.97%	Japan
Sony Group	Consumer Discretionary	3.76%	Japan
Kinden	Industrials	3.57%	Japan
Ryohin Keikaku	Consumer Discretionary	3.2%	Japan
Obayashi	Industrials	3.16%	Japan
Tokio Marine Holdings	Financials	3.09%	Japan
Concordia Financial Group	Financials	2.98%	Japan
Shimamura	Consumer Discretionary	2.7%	Japan
KDDI	Communication Services	2.59%	Japan
T&D Holdings	Financials	2.24%	Japan

Source of data: Fidelity International, as at 30 April 2025.

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 41.66% in sustainable investments.

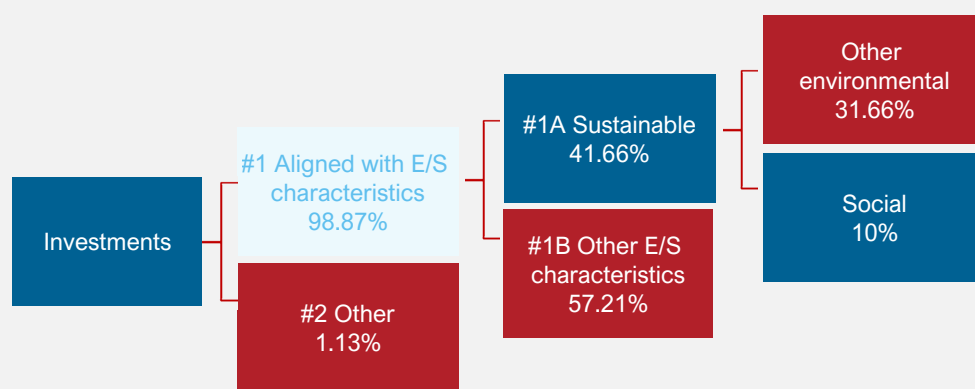

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 98.87%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 41.66% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 31.66% have an environmental objective (which is not aligned with the EU Taxonomy) and 10% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Wireless Telecommunication Services	3.08%
Consumer Discretionary	Household Durables	4.87%
	Multiline Retail	3.2%
	Speciality Retail	2.7%
	Automobiles	2.06%
	Auto Components	1.71%

	Electric Utilities	0.97%

Source of data: Fidelity International, as at 30 April 2025.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

1) climate change mitigation: 0%

power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

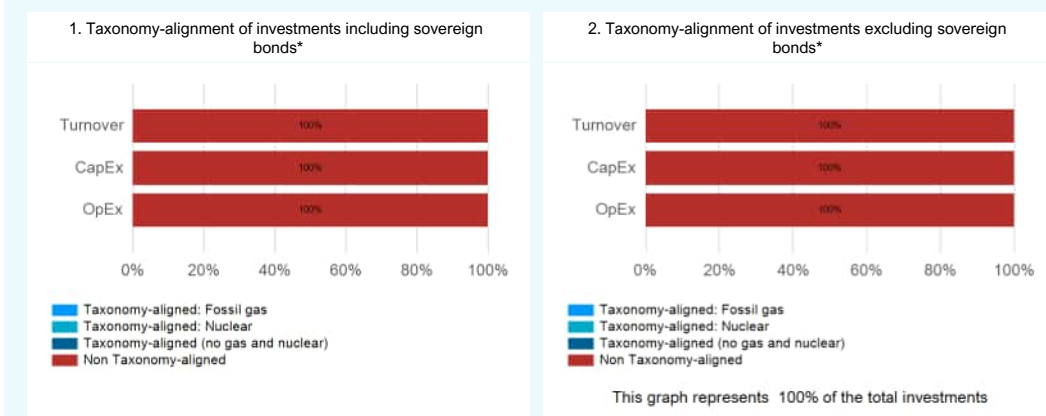

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities,

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The fund was uplifted to an Article 8 in August 11, 2023.

For the period 11 August 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.23% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.23% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 31.66%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 10%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 49.52% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework. The fund's approach towards promoting environmental and social characteristics was subsequently revised in accordance with the updated Fidelity Sustainable Investing Framework with effect from 28 March 2025, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024, 31 July 2024 to 27 March 2025 and additional information will be provided covering the period from 28 March 2025 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the monthly average of the from 31 July 2024 to 27 March 2025 to represent the fund's environmental and social characteristics promoted during the period. Additionally, the data 'ESG score' representing the fund's environmental and social characteristics promoted between 28 March 2025 and 30 April 2025 was compiled based on the fortnightly average of the data between 28 March 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG

characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

Between 31 July 2024 to 27 March 2025, the fund was not able to meet the environmental and social characteristics target it promoted as defined in the SFDR precontractual disclosure for the period. The fund aimed to promote environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation.

Due to the small cap bias of the portfolio's investment strategy, using the ESG score of the benchmark for comparison with the ESG score of the portfolio was misaligned to the portfolio's investment strategy. Due to this special circumstance, the environmental and social characteristics that the fund aimed to promote were reviewed and adjusted in the interest of the shareholders.

As from 28 March 2025, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of the fund's investment universe. The investment universe comprised equities of companies listed or traded on stock exchanges in Denmark, Finland, Norway and Sweden.

ESG scores were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the investment universe.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the fund's investment universe using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 90.77%

For the period 31 July 2024 - 27 March 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.04 vs. 7.50. The fund was not able to meet the environmental and social characteristics target. This has been remediated by 28 March 2025 in the interest of the shareholders.

For the period 28 March 2025 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of the fund's investment universe: 7.29 vs. 6.91

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 49.52%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 36.56%

iv) the percentage of the fund invested in sustainable investments with a social objective: 12.37%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 81.89%.

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 32.35%

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 18.77%

v) the percentage of the fund invested in sustainable investments with a social objective: 13.14%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 88.59%.

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 32.76%

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 23.24%

v) the percentage of the fund invested in sustainable investments with a social objective: 9.28%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 49.52% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching “do no significant harm” requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Telefonaktiebolaget LM Ericsson (B)	Information Technology	4.61%	Sweden
Swedbank	Financials	4.16%	Sweden
Telenor (A)	Communication Services	3.78%	Norway
Evolution (B)	Consumer Discretionary	3.69%	Sweden
Carlsberg AS (B)	Consumer Staples	3.63%	Denmark
Tele2 (B)	Communication Services	3.56%	Sweden
Securitas (B)	Industrials	3.21%	Sweden
Mowi (A)	Consumer Staples	3.1%	Norway
Elekta (B)	Healthcare	3.09%	Sweden
Vestas Wind Systems	Industrials	2.89%	Denmark
Storebrand (A)	Financials	2.75%	Norway
SUBSea 7 SA (A)	Energy	2.73%	United Kingdom
Stolt-Nielsen	Industrials	2.71%	United Kingdom
Autoliv	Consumer Discretionary	2.65%	Sweden
Loomis (B)	Industrials	2.61%	Sweden

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 49.52% in sustainable investments.

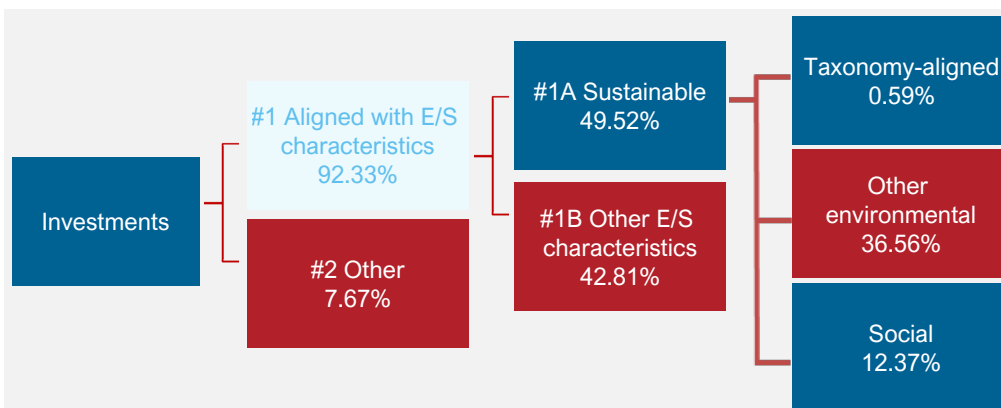

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 92.33%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 49.52% in sustainable investments of which 0.59% have an environmental objective (which is aligned with the EU Taxonomy), 36.56% have an environmental objective (which is not aligned with the EU Taxonomy) and 12.37% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	3.78%
	Wireless Telecommunication Services	3.56%
Consumer Discretionary	Hotels Restaurants & Leisure	3.69%
	Auto Components	3.46%
	Household Durables	3.21%
	Multiline Retail	2.11%
	Speciality Retail	1.77%
	Diversified Consumer Services	1.35%
	Distributors	0.65%
Consumer Staples	Food Products	5.55%
	Beverages	4.05%
Energy	Oil, Gas & Consumable Fuels	9.3%
	Energy Equipment & Services	5.13%
Financials	Insurance	5.07%
	Commercial Banks	4.16%
	Diversified Financial Services	1.16%
Healthcare	Health Care Equipment & Supplies	3.09%
Industrials	Commercial Services & Supplies	6.3%
	Machinery	5.54%
	Electrical Equipment	2.89%
	Marine	2.71%
	Construction & Engineering	1.2%
	Trading Companies & Distributors	0.68%
Information Technology	Communications Equipment	4.61%
	IT Services	0.97%

	Chemicals	3.43%
	Paper & Forest Products	2.32%
	Copper	1.64%
Utilities	Electric Utilities	1.73%

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.59%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 1.27%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☒ Yes

☐ In fossil gas

☒ In nuclear energy

☐ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0.98% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.8% based on Turnover, 3.8% based on CapEx and 2% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.8% based on Turnover, 3.8% based on CapEx and 2% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 3.3% based on Turnover, 4.87% based on CapEx and 3.04% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 3.3% based on Turnover, 4.87% based on CapEx and 3.04% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 36.56%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 12.37%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. Between 31 July 2024 and 27 March 2025, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.
5. As from 28 March 2025, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of the fund's investment universe.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Pacific Fund

Legal entity identifier:
549300VW1XD85M3GUB26

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 20.27% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 65.92%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 6.52 vs. 5.42

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 20.27%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 10.29%

iv) the percentage of the fund invested in sustainable investments with a social objective: 9.89%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 61.08%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 20.15%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 6.22%
- v) the percentage of the fund invested in sustainable investments with a social objective: 13.9%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 65.35%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 18.09%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 8.52%
- v) the percentage of the fund invested in sustainable investments with a social objective: 9.45%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 20.27% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
- (vi) Investments in UCITS and UCIs - Fidelity referenced its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) were considering principal adverse impacts on sustainability factors. The fund relied on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considered principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	2.85%	Taiwan

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 20.27% in sustainable investments.

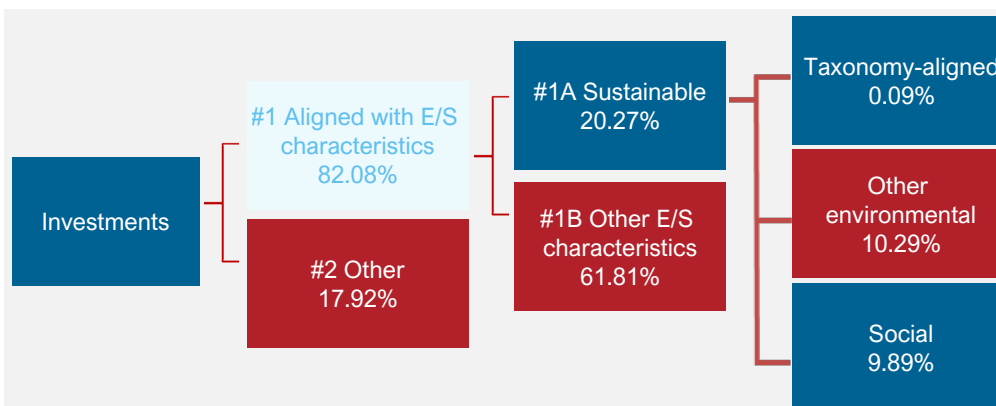

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 82.08%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 20.27% in sustainable investments of which 0.09% have an environmental objective (which is aligned with the EU Taxonomy), 10.29% have an environmental objective (which is not aligned with the EU Taxonomy) and 9.89% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.09%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%

of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

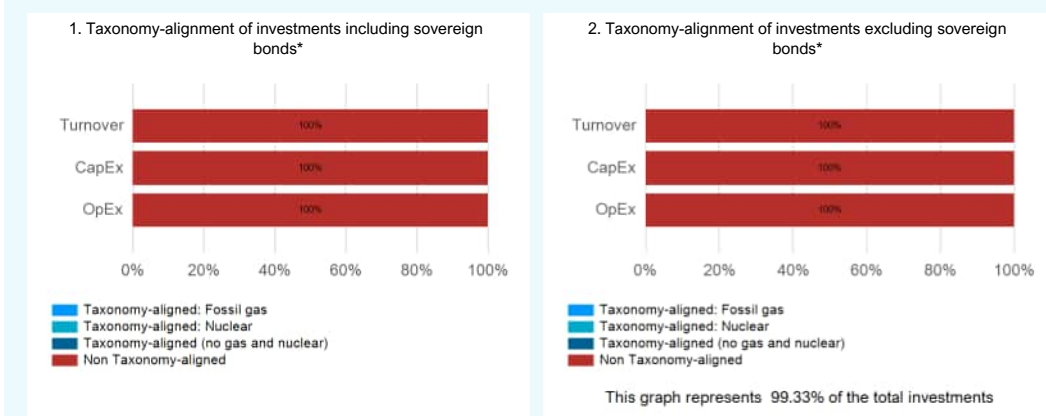

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.11% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.11% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 10.29%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 9.89%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 9(1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Sustainable Asian Focus Fund

Legal entity identifier:
254900ZH0Z8VWSBW0D79

Sustainable investment objective

Did this financial product have a sustainable investment objective ?	
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 34.51% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 64.32%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

With effect from 31 July 2024, the fund's approach towards sustainable investment objectives was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. While the fund now operates under the updated framework, there is no change in how the fund met the sustainable investment objective.

The Fund met the sustainable investment objective as defined in the SFDR precontractual disclosure for the period. The fund aimed to achieve capital growth over the long term by investing in sustainable investments.

The fund determined sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
- (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives; provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The Investment Manager selected issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website:

<https://sdgs.un.org/goals>. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the sustainable investment objective of the fund:

- i) the percentage of the fund invested in sustainable investments: 98.83%
- ii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 34.51%
- iii) the percentage of the fund invested in sustainable investments with a social objective: 64.32%
- iv) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

The fund was launched on 11 April 2023, for the period 11 April 2023 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in sustainable investments: 98.61%
- ii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 35.37%
- iii) the percentage of the fund invested in sustainable investments with a social objective: 62.64%
- iv) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in sustainable investments: 98.29%
- ii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 31.37%
- iii) the percentage of the fund invested in sustainable investments with a social objective: 66.92%
- iv) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "[Sustainable investing framework](#)".

What were the top investments of this financial product?

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 98.83% in sustainable investments.

What was the asset allocation?

The proportion of the investments of the fund used to meet the sustainable investment objective, in accordance with the binding elements of the investment strategy of the financial product is 98.83% , which corresponds to the proportion of fund invested in sustainable investments. This included 0% have an environmental objective (which is aligned with the EU Taxonomy), 34.51% have an environmental objective (which is not aligned with the EU Taxonomy) and 64.32% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems.

To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation and adaptation,' the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

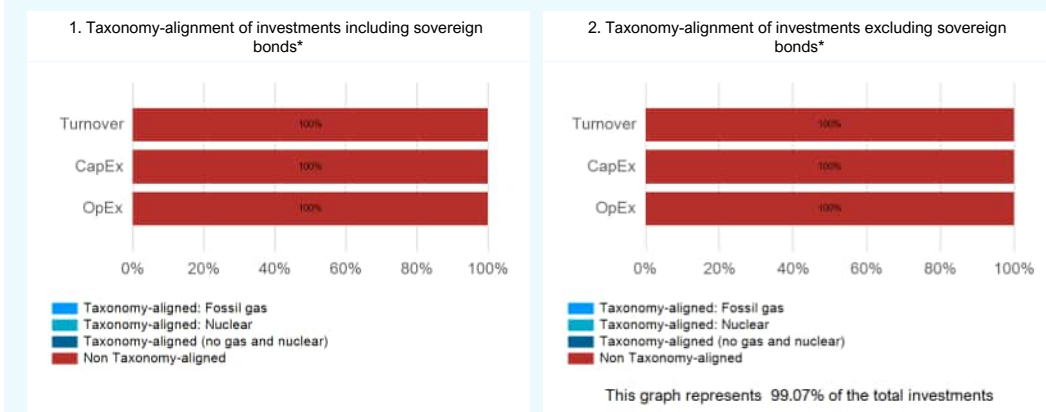

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The fund was launched on 11 April 2023, for the period 11 April 2023 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.6% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.6% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.0% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 34.51%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 64.32%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to attain the sustainable investment objective during the reference period?

The fund took the following actions to meet the sustainable investment objective:

1. The fund made sustainable investments.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative ESG characteristics.
3. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 9(1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective ?	
<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> Yes	<input type="checkbox"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 56.81% <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 42.7%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

With effect from 31 July 2024, the fund's approach towards sustainable investment objectives was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. While the fund now operates under the updated framework, there is no change in how the fund met the sustainable investment objective.

The Fund met the sustainable investment objective as defined in the SFDR precontractual disclosure for the period. The fund aimed to achieve capital growth over the long term by investing in sustainable investments.

The fund determined sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
- (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives; provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The Investment Manager selected issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website:

<https://sdgs.un.org/goals>. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the sustainable investment objective of the fund:

- i) the percentage of the fund invested in sustainable investments: 99.51%
- ii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy: 3.48%
- iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 53.33%
- iv) the percentage of the fund invested in sustainable investments with a social objective: 42.7%
- v) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, not applicable as this fund was uplifted to an Article 9 fund on 3 August 2023.

For the period 3 August 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the sustainable investment objective of the fund:

- i) the percentage of the fund invested in sustainable investments: 98.87%
- ii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy: 4.26%
- iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 53.56%
- iv) the percentage of the fund invested in sustainable investments with a social objective: 41.05%
- v) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
SAP SE	Information Technology	6.95%	Germany
Allianz	Financials	5.12%	Germany
Siemens AG	Industrials	4.78%	Germany
L'Oreal SA	Consumer Staples	4.69%	France
Hermes International SCA	Consumer Discretionary	4.28%	France
Schneider Electric SE	Industrials	3.77%	France
EssilorLuxottica SA (A)	Healthcare	3.75%	France
Air Liquide SA (A)	Materials	3.56%	France
Commerzbank AG	Financials	3.53%	Germany
BBVAentaria SA (A)	Financials	3.51%	Spain
BioMerieux	Healthcare	3.49%	France

Deutsche Boerse AG	Financials	2.98%	Germany
RELX	Industrials	2.66%	United Kingdom

Source of data: Fidelity International, as at 30 April 2025.

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 99.51% in sustainable investments.

What was the asset allocation?

The proportion of the investments of the fund used to meet the sustainable investment objective, in accordance with the binding elements of the investment strategy of the financial product is 99.51%, which corresponds to the proportion of fund invested in sustainable investments. This included 3.48% have an environmental objective (which is aligned with the EU Taxonomy), 53.33% have an environmental objective (which is not aligned with the EU Taxonomy) and 42.7% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV

	Semiconductor Equipment & Products	3.71%
	It Services	1.11%
Materials	Chemicals	6.03%
Utilities	Electric Utilities	3.45%

Source of data: Fidelity International, as at 30 April 2025.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 3.48%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 2.74%
- 2) climate change adaptation: 0%

of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

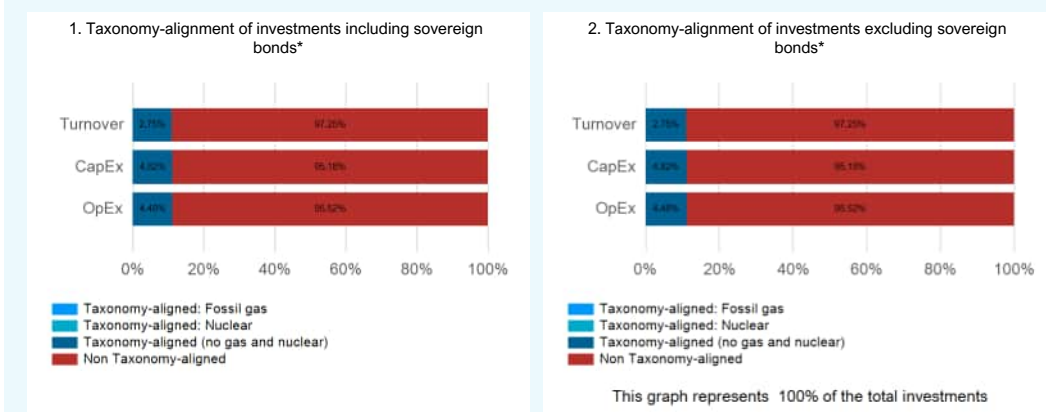

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0.01% for transitional activities and 2.25% for enabling activities, measured by Turnover.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, not applicable as this fund was uplifted to an Article 9 fund on 3 August 2023.

For the period 3 August 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 6.05% based on Turnover, 7.67% based on CapEx and 5.95% based on OpEx.

The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 6.05% based on Turnover, 7.67% based on CapEx and 5.95% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 53.33%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 42.7%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to attain the sustainable investment objective during the reference period?

The fund took the following actions to meet the sustainable investment objective:

1. The fund made sustainable investments.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative ESG characteristics.
3. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

Sustainable investment objective

Did this financial product have a sustainable investment objective ?	
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 43.21% <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 53.86%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

With effect from 31 July 2024, the fund's approach towards sustainable investment objectives was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. While the fund now operates under the updated framework, there is no change in how the fund met the sustainable investment objective.

The Fund met the sustainable investment objective as defined in the SFDR precontractual disclosure for the period. The fund aimed to achieve capital growth over the long term by investing in sustainable investments.

The fund determined sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
- (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives; provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The Investment Manager selected issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website:

<https://sdgs.un.org/goals>. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the sustainable investment objective of the fund:

- i) the percentage of the fund invested in sustainable investments: 97.07%
- ii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 41.3%
- iii) the percentage of the fund invested in sustainable investments with a social objective: 53.86%
- iv) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in sustainable investments: 97.87%
- ii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 38.75%
- iii) the percentage of the fund invested in sustainable investments with a social objective: 54.5%
- iv) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the sustainable investment objective of the fund:

- i) the percentage of the fund invested in sustainable investments: 96.92%
- ii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 39.48%
- iii) the percentage of the fund invested in sustainable investments with a social objective: 55.85%
- iv) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Microsoft	Information Technology	4.47%	United States
Taiwan Semiconductor Manufacturing	Information Technology	3.85%	Taiwan
Boston Scientific	Healthcare	3.77%	United States
SSE	Utilities	3.56%	United Kingdom
Salesforce	Information Technology	2.96%	United States
NextEra Energy	Utilities	2.94%	United States
Alphabet (A)	Information Technology	2.93%	United States
Elevance Health	Healthcare	2.7%	United States
Epiroc (B)	Industrials	2.68%	Sweden
Wise (A)	Financials	2.64%	United Kingdom
RenaissanceRe Holdings	Financials	2.58%	Bermuda
Haleon	Healthcare	2.38%	United Kingdom
UnitedHealth Group	Healthcare	2.35%	United States
Danaher	Healthcare	2.27%	United States
NVIDIA	Information Technology	2.12%	United States

Source of data: Fidelity International, as at 30 April 2025.

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 97.07% in sustainable investments.

What was the asset allocation?

The proportion of the investments of the fund used to meet the sustainable investment objective, in accordance with the binding elements of the investment strategy of the financial product is 97.07%, which corresponds to the proportion of fund invested in sustainable investments. This included 1.91% have an environmental objective (which is aligned with the EU Taxonomy), 41.3% have an environmental objective (which is not aligned with the EU Taxonomy) and 53.86% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV

Source of data: Fidelity International, as at 30 April 2025.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 1.91%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0.74%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

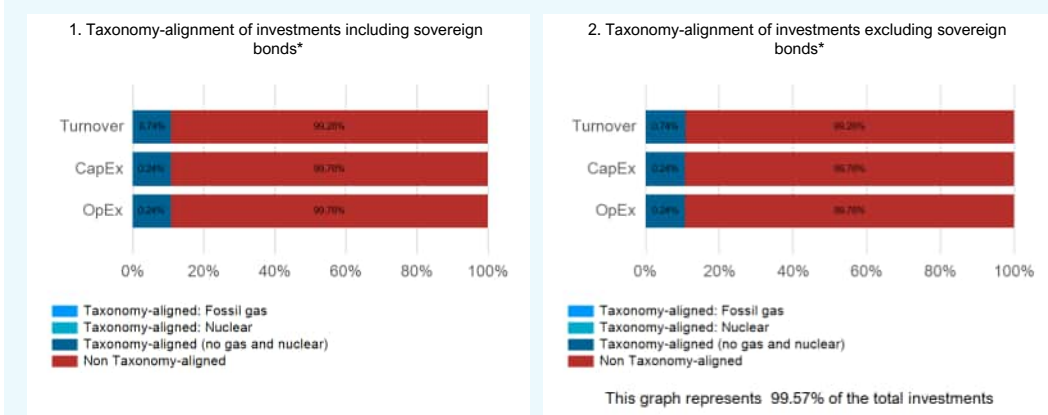

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0.42% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 3.5% based on Turnover, 4.1% based on CapEx and 1.9% based on OpEx.

The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 3.5% based on Turnover, 4.1% based on CapEx and 1.9% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.88% based on Turnover, 2.46% based on CapEx and 1.21% based on OpEx.

The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.88% based on Turnover, 2.46% based on CapEx and 1.21% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 41.3%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 53.86%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to attain the sustainable investment objective during the reference period?

The fund took the following actions to meet the sustainable investment objective:

1. The fund made sustainable investments.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative ESG characteristics.
3. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 9(1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Sustainable US Equity Fund

Sustainable investment objective

Did this financial product have a sustainable investment objective ?	
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 37.46% <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 60.22%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

With effect from 31 July 2024, the fund's approach towards sustainable investment objectives was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. While the fund now operates under the updated framework, there is no change in how the fund met the sustainable investment objective.

The Fund met the sustainable investment objective as defined in the SFDR precontractual disclosure for the period. The fund aimed to achieve capital growth over the long term by investing in sustainable investments.

The fund determined sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
- (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives; provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The Investment Manager selected issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website:

<https://sdgs.un.org/goals>. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

The Fund systematically applied the exclusions as defined in the SFDR precontractual disclosure

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the sustainable investment objective of the fund:

- i) the percentage of the fund invested in sustainable investments: 97.68%
- ii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 36.03%
- iii) the percentage of the fund invested in sustainable investments with a social objective: 60.22%
- iv) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, not applicable as this fund was uplifted to an Article 9 fund on 3 August 2023.

For the period 3 August 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the sustainable investment objective of the fund:

- i) the percentage of the fund invested in sustainable investments: 97.3%
- ii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy: 30.58%
- iii) the percentage of the fund invested in sustainable investments with a social objective: 65.91%
- iv) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below): 0%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics.

This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions helped to mitigate PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Source of data: Fidelity International, as at 30 April 2025.

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 97.68% in sustainable investments.

What was the asset allocation?

The proportion of the investments of the fund used to meet the sustainable investment objective, in accordance with the binding elements of the investment strategy of the financial product is 97.68%, which corresponds to the proportion of fund invested in sustainable investments. This included 1.43% have an environmental objective (which is aligned with the EU Taxonomy), 36.03% have an environmental objective (which is not aligned with the EU Taxonomy) and 60.22% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments

In which economic sectors were the investments made?

Source of data: Fidelity International, as at 30 April 2025.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 1.43%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0.63%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

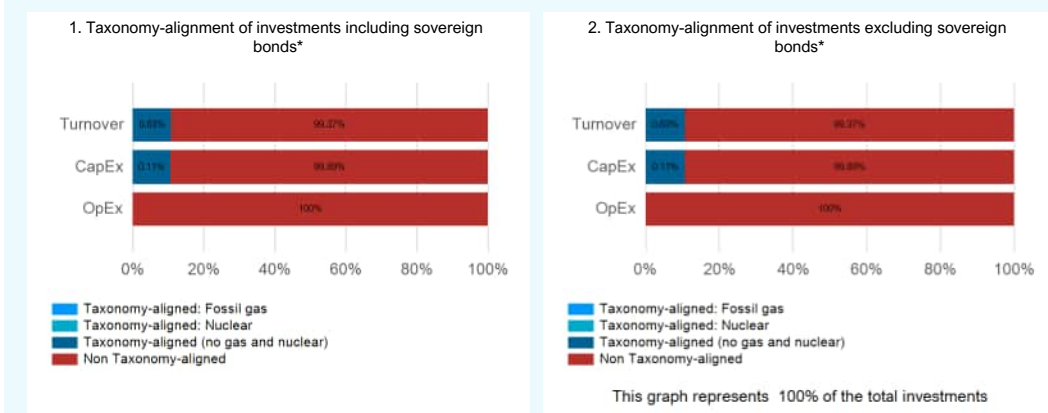

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0.49% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, not applicable as this fund was uplifted to an Article 9 fund on 3 August 2023.

For the period 3 August 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.43% based on Turnover, 1.08% based on CapEx and 0.0% based on OpEx.

The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 1.43% based on Turnover, 1.08% based on CapEx and 0.0% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 36.03%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 60.22%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to attain the sustainable investment objective during the reference period?

The fund took the following actions to meet the sustainable investment objective:

1. The fund made sustainable investments.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative ESG characteristics.
3. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Switzerland Fund

5493001N8Q97TPZUYT12

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?

☒ ☐ Yes

☒ ☐ No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 68.29% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
---	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 98.12%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 7.40 vs. 7.23

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 68.29%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 29.81%

iv) the percentage of the fund invested in sustainable investments with a social objective: 38.23%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 92.27%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 66.47%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 21.98%
- v) the percentage of the fund invested in sustainable investments with a social objective: 43.61%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 94.41%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 63.94%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 23.68%
- v) the percentage of the fund invested in sustainable investments with a social objective: 40.14%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 68.29% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
- (vi) Investments in UCITS and UCIs - Fidelity referenced its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) were considering principal adverse impacts on sustainability factors. The fund relied on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considered principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Roche Holding AG	Healthcare	9.26%	Switzerland
Nestle SA	Consumer Staples	8.24%	Switzerland
Swiss Re AG	Financials	6.15%	Switzerland
Novartis AG	Healthcare	5.92%	Switzerland
VZ Holding AG	Financials	4.98%	Switzerland
Zurich Insurance Group AG	Financials	4.36%	Switzerland
UBS Group AG	Financials	4.25%	Switzerland
Aryzta AG	Consumer Staples	4.06%	Switzerland
Givaudan SA	Materials	3.95%	Switzerland
Sika AG	Materials	3.63%	Switzerland
Partners Group Holding AG	Financials	3.54%	Switzerland
Schindler Holding AG	Industrials	3.53%	Switzerland
Cie Financiere Richemont SA	Consumer Discretionary	3.44%	Switzerland
Lonza Group AG	Healthcare	3.24%	Switzerland
DKSH Holding AG	Industrials	3%	Switzerland

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 68.29% in sustainable investments.

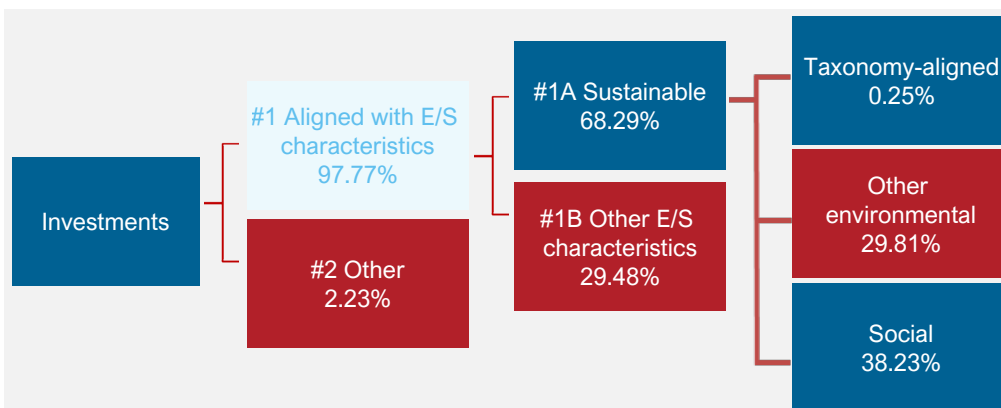

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 97.77%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 68.29% in sustainable investments of which 0.25% have an environmental objective (which is aligned with the EU Taxonomy), 29.81% have an environmental objective (which is not aligned with the EU Taxonomy) and 38.23% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Textiles & Apparel	3.44%
	Speciality Retail	1.82%
Consumer Staples	Food Products	12.3%
Financials	Diversified Financial Services	8.52%
	Capital Markets	4.25%
	Insurance	10.51%
Healthcare	Life Sciences Tools & Services	4.82%
	Health Care Equipment & Supplies	4.08%
	Pharmaceuticals	20.85%
Industrials	Electrical Equipment	4.23%
	Machinery	4.19%
	Trading Companies & Distributors	3%
	Building Products	1.71%
Information Technology	Electronic Equipment Instruments & Components	0.89%
	Semiconductor Equipment & Products	0.5%
Materials	Chemicals	7.58%
	Containers & Packaging	2.37%

Source of data: Fidelity International, as at 30 April 2025

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.25%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0.13%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31

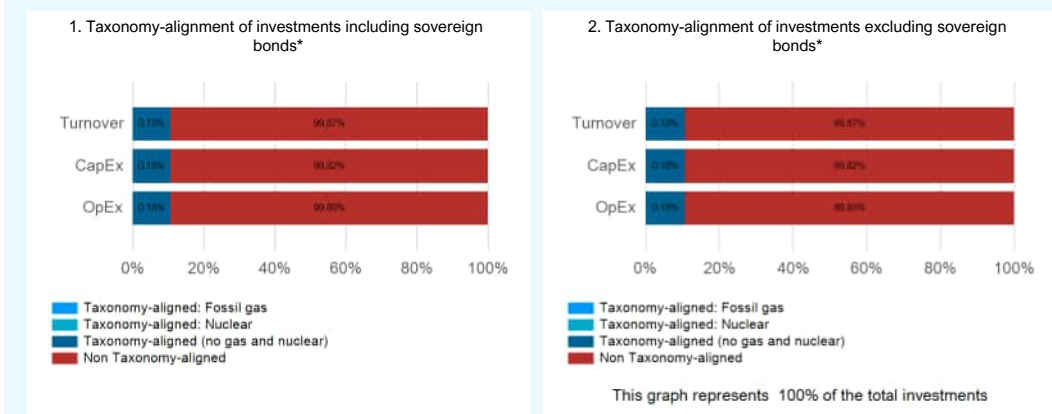

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0.13% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the period 1 May 2022 - 30 April 2023, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.1% based on Turnover, 0.6% based on CapEx and 0.3% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.1% based on Turnover, 0.6% based on CapEx and 0.3% based on OpEx.

For the period 1 May 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.19% based on Turnover, 0.51% based on CapEx and 0.32% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.19% based on Turnover, 0.51% based on CapEx and 0.32% based on OpEx.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 29.81%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 38.23%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Non Applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 17.63% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided below covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024.
- the data 'ESG score', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025.

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores were determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities were established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values were aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio was measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at [Sustainable investing framework](#) and may be updated from time to time.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 80.28%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark: 6.27 vs. 5.98

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 17.63%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 3.62%

iv) the percentage of the fund invested in sustainable investments with a social objective: 14.01%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

... and compared to previous periods?

The fund was uplifted to an Article 8 in August 11, 2023.

For the period 11 August 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 83.99%.

ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

iii) the percentage of the fund invested in sustainable investments: 19.94%

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 1.09%

v) the percentage of the fund invested in sustainable investments with a social objective: 18.85%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 17.63% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
PTT	Energy	9.34%	Thailand
CP ALL	Consumer Staples	8.1%	Thailand
Advanced Info Service	Communication Services	7.56%	Thailand
Bangkok Dusit Medical Services	Healthcare	6.5%	Thailand
Gulf Development	Utilities	5.1%	Thailand
Delta Electronics Thailand	Information Technology	4.92%	Thailand
Central Pattana	Real Estate	4.46%	Thailand
PTT Exploration & Production	Energy	3.62%	Thailand
Thai Beverage	Consumer Staples	3.28%	Thailand
Kasikornbank	Financials	3.02%	Thailand
Krung Thai Bank	Financials	2.57%	Thailand

Wattanaapat Hospital Trang	Healthcare	1.58%	Thailand
Delta Electronics	Information Technology	1.57%	Taiwan

Source of data: Fidelity International, as at 30 April 2025.

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 17.63% in sustainable investments.

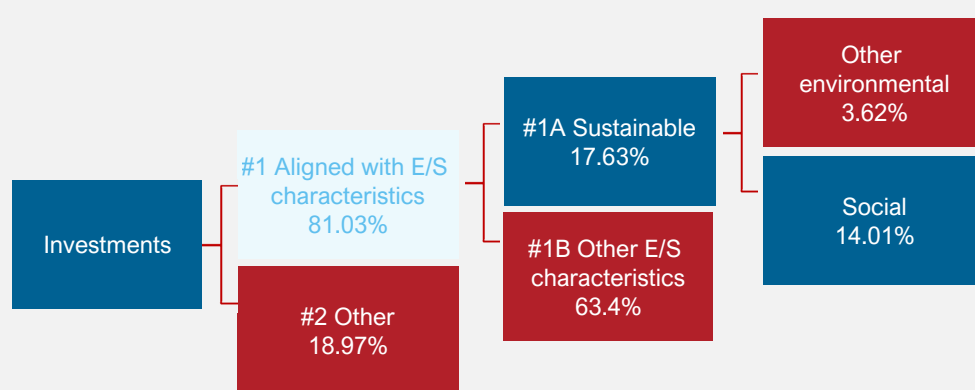

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is 81.03%, which corresponds to the proportion of fund achieving an ESG score of its portfolio greater than the ESG score of its benchmark. This included 17.63% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 3.62% have an environmental objective (which is not aligned with the EU Taxonomy) and 14.01% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Wireless Telecommunication Services	7.56%
	Diversified Telecommunication Services	1.5%
	Media	1.02%
Consumer Discretionary	Diversified Consumer Services	2.25%
	Textiles & Apparel	2.18%
	Auto Components	2.15%
	Hotels Restaurants & Leisure	1.91%
Consumer Staples	Food & Staples Retailing	8.1%
	Beverages	3.28%
	Food Products	1.99%
Energy	Oil, Gas & Consumable Fuels	15.35%
	Energy Equipment & Services	1%
Financials	Commercial Banks	6.49%
	Consumer Finance	1.04%

Real Estate	Equity - Common Stock - Real Est Mgt & Dev - Real	4.46%
Utilities	Independent Power Producers & Energy Traders	6.48%

Source of data: Fidelity International, as at 30 April 2025.

The sector breakdown of the investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. This is currently covered through a different fossil fuels grouping.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%. This contributed to the following environmental objectives:

- 1) climate change mitigation: 0%
- 2) climate change adaptation: 0%
- 3) protection of water and marine resources: 0%
- 4) transition to a circular economy: 0%
- 5) pollution prevention and control : 0%
- 6) protection and restoration of biodiversity and ecosystems: 0%

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

underlying investments of the fund is measured by turnover.

This is the first year we are including contributions to the EU Taxonomy's expanded environmental objectives, which now cover the protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. To accommodate these additions, this year's reporting approach has been adjusted:

For 'climate change mitigation' and 'climate change adaptation', the approach was unchanged and data has been compiled based on the quarterly average of the data at the end of the calendar as of 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025.

For the new objectives ('protection of water and marine resources,' 'transition to a circular economy,' 'pollution prevention and control,' and 'protection and restoration of biodiversity and ecosystems'), we have used the quarterly average of data as of 31 January 2025 and 30 April 2025 due to the limited timeframe that this data has been available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Source of data: Moody's, quarterly average over the reference period.

The above data has been compiled through static data from our trading and compliance system and enriched through an external data source Moody's. The data has been compiled based on the last day of close of calendar quarterly data and averaged for the reference period. There may be variations in the EU Taxonomy figures disclosed due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulation is 0% for transitional activities and 0% for enabling activities, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The fund was uplifted to an Article 8 in August 11, 2023.

For the period 11 August 2023 - 30 April 2024, the quarterly average share of sustainable investments (including sovereign bonds) with an environmental objective

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

aligned with the EU Taxonomy was 0.06% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx. The quarterly average share of sustainable investments (excluding sovereign bonds) with an environmental objective aligned with the EU Taxonomy was 0.06% based on Turnover, 0.0% based on CapEx and 0.0% based on OpEx.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The quarterly average share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 3.62%

Economic activities that are not recognised by the EU Taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

What was the share of socially sustainable investments?

The quarterly average share of sustainable investments with a social objective was 14.01%

This contributed towards the socially-focused SDG objectives, as explained in the answer on the objectives of the sustainable investments above.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. Until 30 July 2024, the fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.
4. As from 31 July 2024, the fund promoted environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than its benchmark.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated to measure whether the fund attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Non Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Non Applicable

How did this financial product perform compared with the reference benchmark?

Non Applicable

How did this financial product perform compared with the broad market index?

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 70.39% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With effect from 30 July 2024, the fund's approach towards promoting environmental and social characteristics was revised in accordance with the updated Fidelity Sustainable Investing Framework, as detailed in the fund's precontractual disclosure. Accordingly, where reporting values have been impacted by this update, values disclosed in this report will reflect the reporting period from 1 May 2024 to 30 July 2024 and additional information will be provided covering the period from 31 July 2024 to 30 April 2025.

Based on this circumstance, this year's reporting was adapted as follows:

- the data 'Favourable ESG characteristics', which is typically reported as a quarterly average of the data at the end of the calendar, was adapted as at 30 July 2024.
- the data 'alignment to sustainability theme', which is new data as from 31 July 2024, was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'sustainable investments' and its variations, was unchanged and was compiled based on the quarterly average of the data as at 31 July 2024, 31 October 2024, 31 January 2025 and 30 April 2025
- the data 'top investments' and 'sector' were unchanged and reported as of the year end 30 April 2025

Prior to 30 July 2024, the fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

As from 31 July 2024, the fund met the environmental and social characteristics it promoted as

defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by aiming to make investments in companies that are involved in the design, manufacture, or sale of products and services used in connection with the water and waste themes. The fund partially intended to make sustainable investments.

The fund systematically applied the exclusions as defined in the SFDR precontractual disclosure.

How did the sustainability indicators perform?

For the period 1 May 2024 - 30 July 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 94.25%

For the period 31 July 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with high ESG ratings: 96.75%

For the period 1 May 2024 - 30 April 2025, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

i) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.

ii) the percentage of the fund invested in sustainable investments: 70.39%

iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy: 6.48%

iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 47.23%

v) the percentage of the fund invested in sustainable investments with a social objective: 16.68%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

For the period 1 May 2022 - 30 April 2023, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 88.67%
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 57.24%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy: 4.65%
- v) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 32.05%
- vi) the percentage of the fund invested in sustainable investments with a social objective: 20.54%

For the period 1 May 2023 - 30 April 2024, the following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the fund:

- i) the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with the Fidelity's Sustainable Investing Framework: 94.16%.
- ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions: 0.00%.
- iii) the percentage of the fund invested in sustainable investments: 4.68%
- iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy): 39.65%
- v) the percentage of the fund invested in sustainable investments with a social objective: 19.6%

These sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 70.39% of sustainable investments. The sustainable investments had an environmental and social objective.

The fund determines sustainable investments as investments in securities of:

- (a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
 - (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
 - (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
 - (b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
 - (c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;
- provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The contribution to the EU Taxonomy objectives is displayed under the question 'To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?'

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators are used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determine that the issuer was not breaching “do no significant harm” requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens will be applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, will not be considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors (referred to as principal adverse impacts) were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) ESG rating - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (ii) Exclusions - When investing directly in corporate issuers, the fund applied the Exclusions to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions included PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.
- (iii) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating principal adverse impacts. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (iv) Voting - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.
- (v) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
- (vi) Investments in UCITS and UCIs - Fidelity referenced its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) were considering principal adverse impacts on sustainability factors. The fund relied on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considered principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

Fidelity took into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators were subject to data availability and may evolve with improving data quality and availability.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "[Sustainable investing framework](#)".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2024 - 30/04/2025

Largest investments	Sector	% Assets	Country
Severn Trent	Utilities	5.56%	United Kingdom
Veolia Environnement SA	Utilities	4.28%	France
Xylem NY	Industrials	3.66%	United States
Clean Harbors	Industrials	3.64%	United States
Smurfit WestRock	Materials	3.53%	Ireland
Crown Holdings	Materials	3.33%	United States
Tetra Tech	Industrials	3.33%	United States
Waste Connections	Industrials	3.09%	Canada
Pentair	Industrials	3.01%	United Kingdom
Cia de Saneamento Basico do Estado de Sao Paulo SABESP	Utilities	2.98%	Brazil
STERIS	Healthcare	2.96%	United States
Veralto	Industrials	2.93%	United States
AECOM	Industrials	2.8%	United States
Graphic Packaging Holding	Materials	2.74%	United States
Ecol	Materials	2.72%	United States

Source of data: Fidelity International, as at 30 April 2025

The largest investments (excluding derivatives) and their classifications are based on official accounting data and are based on the last day of the reference period. Any percentage differences with the financial statement portfolios result from a rounding difference.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 70.39% in sustainable investments.

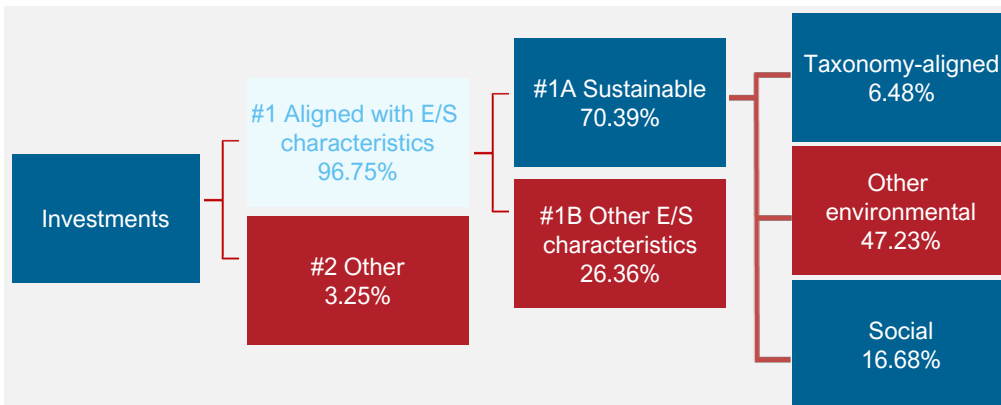

What was the asset allocation?

The proportion of the investments of the fund used to meet the sustainable investment objective, in accordance with the binding elements of the investment strategy of the financial product is 70.39% , which corresponds to the proportion of fund invested in sustainable investments. This included 6.48% have an environmental objective (which is aligned with the EU Taxonomy), 47.23% have an environmental objective (which is not aligned with the EU Taxonomy) and 16.68% have a social objective.

The EU Taxonomy data is sourced from a third-party data provider. The assessment on EU Taxonomy alignment is conducted with reported data from investee companies. The methodology applied by the third-party data provider assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards.

The remaining proportion of the investments is mainly used as described under the question: "What investments are included under " #2 Other", what is their purpose and are there any minimum environmental or social safeguards?"

This asset allocation, including the compliance to the EU Taxonomy, was not subject to an assurance provided by an auditor or a review by a third party.
