Q3 2025

Q3 economic momentum has remained solid, despite the trade war and geopolitical risks. US growth has been revised upwards. Despite inflation falling far short of its target, the Fed cut rates, anticipating a slowdown in the labour market. In Europe, growth was more moderate whereas inflation is close to the ECB's target. Asia is still the most dynamic region, with China, India and Japan maintaining positive momentum. On the markets, the dollar stabilised after its sharp fall at the beginning of the year, while gold is breaking records. Equities and credit are performing well, with emerging markets outperforming significantly, and there is a divergence in interest rates, which are generally falling in the United States and rising in Europe.

Macro Economy

United States

Despite the shock of the trade war and the sometimes brutal decisions of the Trump administration, the momentum of the US economy surprised on the positive with an uptick in GDP growth of 3.8% in Q2, exceeding the previous estimate of 3.3% after the 0.5% contraction in Q1. Growth continued to be driven by consumption (rising retail sales) and productive investment. Leading indicators continue to point toward an extension of the cycle, particularly in the services sector. The labour market remains dynamic, even if signs of weakness in job creation are becoming more significant. The unemployment rate rose from 4.1% in June to 4.3% in August. Inflation measured using the consumer price index continued its rally. It reached 2.9% year-on-year in August, whereas it had fallen back to 2.3% in April. It was at the same level of 2.9% using the Federal Reserve's preferred measure — core PCE (Personal Consumption Expenditures). However, the impact of customs duties appears limited at this stage. The production prices index, after rising 0.9% in July, contracted by 0.1% in August.

The quarter was marked by the stand-off between Trump and the Federal Reserve, with the President of the United States judging monetary policy to be too restrictive. Following the surprise resignation of the Democrat Adriana Kugler, Trump nominated Stephen Miran to replace her. He is an economist close to the White House and in favour of rate cuts. He also removed governor Lisa Cook from office, on suspicion of tax fraud. At the Jackson Hole symposium, Jerome Powell, President of the Fed, indicated that the risk to employment was greater than a resumption of inflation. This turnaround materialised in September with a 25-basis point reduction to 4.25%. Although inflation is well above target, the Fed has nevertheless chosen to lower its rates, indicating that it is refocussing on its employment policy. Investors are now anticipating a new phase of rate cuts through to mid-2026.

Political tensions remain high and antagonisms are being exacerbated by violence. The Republicans' narrow majority puts them at the mercy of the budget vote being blocked for a new government shutdown.

Europe

Eurozone:

The return of growth to the eurozone was confirmed. Q2 GDP growth was revised upwards to 1.5% year-on-year, particularly driven by Spain where GDP grew by 0.8% in Q2. After several months of improvement in the manufacturing sector (particularly in Germany), the outlook stabilised at the end of the quarter, with the HCOB PMI manufacturing index falling back to 49.5 in September from 50.7 in August and 49.8 in July. On the other hand, the services sector posted a net gain, with the services PMI reaching 51.4 in September, compared to 50.5 in August and 51 in July. Unemployment remained steady over the quarter, at 6.2%, but there remained a strong disparity between economies with full employment, such as Germany, and those where there is still a high unemployment rate (France, Italy, Spain).

The European Commission reached a trade deal with the White House at the end of July, after difficult negotiations. While this deal restores visibility for European exporters, they will be subject to a maximum customs duty of 15%. Europe is in advanced negotiations with India, while the deal with MERCOSUR continues to create tensions.

Inflation stabilised around the European Central Bank's (ECB) target, with a positive contribution from food prices and a negative contribution from energy prices. The harmonised index of consumer prices (IPCH) stood at 2.3% in July, then 2.1% in August, year-on-year. Consensus estimates expect 2.2% in September. It should reach the 2% target at year-end 2025 and the start of 2026. However, there are stark differences between countries, with France posting inflation of less than 1% while in Spain the figure reached 2.9% year-on-year (August figures). Against this backdrop the ECB decided to maintain the status quo and its deposit rate at 2%, while leaving the door open for a rate cut by the end of the year.

United Kingdom:

Q2 GDP growth was revised upwards, to an annual variation of 1.4% . Inflation remained high, at 3.8% in July and August year-on-year (CPI) driven by a positive contribution from restaurants and hotels prices, but offset by a fall in air fares. Despite this inflation figure being a long way from the Bank of England's target, it decided to cut its headline rate over the summer by 25 basis points and to keep it at this level in September, leaving room for a future cut in November.

ASIA

The summer was marked by the SCO (Shanghai Cooperation Organisations) conference which brought more than 20 heads of states and governments representing 3.4 billion people, around Xi Jin Ping. Significant was the presence of Vladimir Putin, Kim Jung Un and even the Indian prime minister Narendra Modi, whose relations with the US are particularly strained, due to the trade war.

China: The Chinese GDP growth rate stood at 5.2% year-on-year in Q2, however the deflationary background persists. The consumer price index stood at 0% in August, as in July, but year-on-year it contracted by 0.4% (0% in July). The production index continued to decline, to -3.6% in July and -2.9% in August, year-on-year. Real estate prices continued to fall, with new homes prices dropping by 2.8% in July (annual variation) and 2.5% in August. Although retail sales increased by 3.7% in July and 3.4% in August, worth highlighting is the over-production by Chinese manufacturers. Finally, unemployment rose over the quarter, starting at 5% in June and reaching 5.3% in August. Under these conditions the People's Bank of China continued with its monetary policy of easing. But the authorities made no major announcements aimed at jump-starting the economy.

Japan: A revision of the annual growth figure to 2.2% for Q2 confirmed the vitality of the Japanese economy. The consumer price index remains high, but slowed over the quarter. After an annual variation of 3.3% in June it fell to 2.7% in August. Unemployment decreased over the quarter, standing at 2.3% in July after four months at 2.5%. Against this background, despite persistent high inflation, the Japanese Central Bank retained its headline rate of 0.50% in July and September, to avoid bond market jitters. But still two members of the BoJ voted for an increase to 0.75%. Such disagreement is unusual for the Bank of Japan and heralds a rate rise by the end of the year.

India: India's dynamic growth continued with GDP surging to 7.8% in Q2 year-on-year. After nine months of falls, inflation ticked up again, with the consumer price index reaching 2.07% in August compared to 1.61 in July. This increase was largely due to the rise in food prices, which represent half of the CPI basket, but also to base effects. The Reserve Bank of India (RBI) then decided to reduce its key interest rate by 50 basis points in June, while remaining cautious in the face of the risks linked to customs duties and persistent underlying inflation. Under these circumstances the RBI chose to keep its headline rate at 5.5% at its 1 October meeting.

MARKETS

Equities markets:

Equities markets continued with their positive trajectory throughout Q3, bolstered by the United States, Japan and China. The signing of several trade agreements reassured investors whereas geopolitical tensions had little impact on risk premiums.

The MSCI ACWI USD index closed the month up 7.3% while emerging markets outperformed with the MSCI Emerging Markets index gaining 9.6%. The outlook for the AI sector and US monetary policy easing after Jerome Powell's speech at Jackson Hole, and the cut in rates in September, buoyed the market. The S&P500 gained ground by 7.8% and the Nasdaq 100 was up 8.8% over the quarter. Turning to mega-caps now, NVIDIA reported results slightly better than expectations, but posted more moderate data centre revenue growth amid a pause in sales of AI chips to China. The spectacular growth in Oracle's order book endorsed the sector's positive trend.

The figures stated in this report are historical and not necessarily indicative of future performance.

European stocks posted more moderate growth. The Eurostoxx 50 gained 4.3%, driven by the defence sector and banks. Despite political instability in France, the CAC 40 closed up 3%. In Germany the DAX 30 consolidated, declining slightly, by 0.1% over the quarter, but it has nevertheless remained strong since the start of the year, with a 19.9% gain.
In Asia, China and Japan were the outperformers over the quarter. The Nikkei 225 climbed 11%, driven by investors returning to this market that has been underweight for some time, whose outlook is improving. China saw an outstanding quarter, with the HSCEI gaining 10% and retaining its place as a top performer in 2025, with a 31.1% annual gain.

Bond markets:
We witnessed a divergence in interest rate trends, with contraction in the United States and an increase in Europe. The 2-year US rate lost 11 basis points, closing the quarter at 3.61%, while the 10-year US Treasury yield posted a decline of 8 basis points to 4.15% This decrease reflects monetary policy easing, with rates anticipating the cut in September even before the Fed's official announcement. The 30-year US Treasury yield was no exception, and posted a slight drop of 4 basis points to close at 4.73%, but remains at historically high levels — a return to 2007.
In Europe the trend was rather the opposite, as markets expected an increase in German issues to finance infrastructure projects. Germany posted a rise of 16 basis points on its 2-year bond (closing at 2.02%) and the 10-year Bund backed up the trend, rising 10 basis points to 2.71%. France, where the 2026 budget vote remains in the balance, saw its 2-year OAT rate rise 11 bp to 2.25% and its 10-year yield increase 28 bp to close at 3.53%. In this environment of easing European rates, the 10-year rate spreads vis-à-vis Germany have contracted; Spain has seen its rate tighten by 9 bp compared to those of Germany and Italy, 5 bp. France, facing political instability, saw its spread rise 15 bp reaching 82 bp.
Foreign exchange, gold and oil:
The dollar stagnated against the euro over the quarter, with the EURUSD rate at 1.173 (down 0.4%) and rose against the Yen with the USDJPY rate at 148 (up 2.7%) following the trend since the start of the year and thanks, in part, to the Fed's rate cut. Against this backdrop gold continued its meteoric rise and closed the quarter up 16.8%, reaching its highest level at $3859 per ounce. Oil ended the quarter close to its June-end price, closing at $67 (down 0.67%).

Q4 2025

Global economic momentum remained positive despite the tense geopolitical environment. In the United States, inflation remains high, but the downturn in the labour market convinced the Fed to cut interest rates. In Europe, weak growth and inflation persist, but the ECB has kept its key interest rates unchanged. In Asia, China continues to grapple with deflation, while in Japan growth is contracting and inflation remains high, prompting the Bank of Japan to raise its key interest rate. Equity markets have risen, driven by the technology sector and Japan, and interest rates have stabilised. The dollar remains stable, gold is rising and oil prices are falling, partly due to hopes for peace in Ukraine.

Macro Economy
United States
In the fourth quarter, the trade war between the United States and China continued to dominate international news. Following China's announcement of a tax on rare earths and the United States response of targeted tariffs, tensions eased during the meeting between Donald Trump and Xi Jinping at the APEC conference in South Korea, where they agreed to suspend their decisions.
Domestically, the country experienced the longest shutdown in its history, lasting 43 days and ending on 12 November with Trump signing a budget agreement which was approved by Congress. The closure of federal agencies delayed the release of economic indicators. Nevertheless, the available indicators remained positive. The initial estimate of third-quarter GDP surprised significantly on the upside, with growth reaching 4.3%, fuelled by consumption and continued investment in the artificial intelligence sector. Leading indicators show expansion in both the manufacturing and services sectors, despite a slowdown in the latter. Industrial production remained stable over the quarter, rising 0.2% in November compared to the previous month (0.1% in October). The labour market showed signs of weakness. In September, the unemployment rate rose to 4.6% in November, and job creation was weak and mainly concentrated in the healthcare sector. Retail sales were disappointing throughout the quarter: after reaching 0.2% in September, they stagnated in October on a monthly basis, a sign of the continued decline in consumer purchasing power.
Inflation remains well above the Federal Reserve's (Fed) target, but has slowed more than expected. The consumer price index (CPI) fell from 3% year-on-year in September to 2.7% in November. Anticipating a downturn in the labour market, the Fed continued the cycle of rate cuts it initiated in September with 25 basis points (bps) in October and December, reaching a range of 3.50%-3.75%. However, the positive surprise in growth reduced the likelihood of rate cuts in 2026.

Europe
The war in Ukraine has been the focus of concern for European policymakers, who want to avoid an US-Russia agreement being reached that is detrimental to their interests. Negotiations have continued, with several plans being put forward by the parties, but the issues of security guarantees for Ukraine and territorial concessions remained unresolved. Political instability in France added another source of uncertainty with a renewed deadlock over the budget.
Eurozone:
The positive but limited momentum of the European economy continued. Eurozone GDP grew by 0.2% in the third quarter. Expansion in the eurozone was largely driven by public spending and investment, while private consumption remained relatively weak, indicating signs of a slowdown. Q3 growth was up 1.4% year-on-year (1.6% in Q2), supported by Ireland (+10.9%, driven by activity in the pharmaceutical sector, which exported to the United States in anticipation of customs duties), Spain (up 2.8%) and Portugal (up 2.4%). French growth surprised on the upside and grew moderately (0.9%). German growth remained below the eurozone average (0.3%) in Q3 year-on-year.
Leading indicators point to a contraction in the manufacturing sector in October-November-December, while the services sector continues to improve. The unemployment rate remained at 6.4% in October, close to its historic lows.
Inflation in the eurozone is now close to the European Central Bank's (ECB) target: the harmonised index of consumer prices (HICP) was up 2.1% in both October and November year-on-year, driven by services, energy and food products. However, national disparities are still marked: the HICP, year-on-year, reached 3.2% in October-November in Spain, 2.6% in Germany in November (2.3% in October), 1.1% in Italy in November (1.3% in October) and 0.8% in France for October-November. Against this backdrop, the ECB has maintained the status quo since June with a deposit rate of 2% and confirmed that it is not ready to resume a cycle of rate cuts.
United Kingdom:
In the UK, the quarter was marked by the presentation of the budget on 26 November. It includes a £26 billion tax increase, following last year's £40 billion hike, to reduce the deficit and put public finances on a path to bring the public debt-to-GDP ratio below 100% by the end of the decade. Economic momentum remains mixed. GDP growth stood at 1.3% year-on-year in Q3. Retail sales disappointed, rising only 0.2% in October and 0.9% in November, both below expectations. Surveys showed improvement in the manufacturing sector in November and December after its contraction in October. The services sector, expanded at a moderate pace. Inflation continues to approach the Bank of England's (BoE) target, but remains well above 2%: the CPI for November reached 3.2% (compared to 3.6% in October and 3.8% in September). After leaving it unchanged in September and November, the BoE decided to lower its key interest rate by 25 basis points to 3.75% in December to support activity, despite inflation being a long way from its target.

ASIA
Following the resignation of Japanese Prime Minister Shigeru Ishiba in early October, Sanae Takaichi, a member of the Liberal Democratic Party and former member of Shinzo Abe's government, succeeded him, becoming the first female Prime Minister in Japan's history. Diplomatic tensions between Japan and China escalated after the new Prime Minister said that armed operations against Taiwan could justify Japanese military intervention to defend the island. Since then, China has launched a new series of military exercises around Taiwan in a show of force that the People's Liberation Army describes as a 'warning to independence forces'. This initiative comes just weeks after Taipei signed a major arms deal with the United States.

The figures stated in this report are historical and not necessarily indicative of future performance.

Japan:
In Japan, the economic outlook has deteriorated significantly, mainly due to weak private residential investment and a decline in exports following the trade war initiated by the United States. GDP growth has been revised downward and fell by 2.3% in Q3 2025 (compared to Q3 2024). This decline reinforces the Prime Minister's call for a massive fiscal stimulus package. Inflation remains stubbornly high with the national CPI reaching 2.9% in November (3% in October and 2.9% in September). After keeping its key rate unchanged in September and October, which was not unanimously approved, the Bank of Japan (BoJ) decided to raise its key interest rate by 25 basis points to 0.75%, the highest level in 30 years, leading to an increase in both short- and long-term interest rates.
China:
In China, economic data remained disappointing. GDP growth reached 4.8% year-on-year in the third quarter. Domestic demand remains weak, while many sectors are experiencing overproduction. Deflationary pressures therefore persist, but appear to be easing on consumer prices. Indeed, the CPI rose 0.7% year-on-year in November, after rising 0.2% in October and falling 0.3% in September. The producer price index (PPI) continued to decline, falling 2.2% in November, after falling 2.3% in September and 2.1% in October. Real estate remains the sector in greatest difficulty: new housing prices fell 2.4% year-on-year in November (down 2.2% in September-October). In light of this, China is considering new measures to support its property market, notably by granting mortgage subsidies to new buyers and increasing income tax refunds for borrowers. Against this backdrop, the People's Bank of China kept its rates unchanged (one-year preferential rate at 3.0% and five-year rate at 3.50%) for the seventh consecutive month — at historically low levels.
India:
In India, the quarter was marked by the rapprochement between Prime Minister Narendra Modi and Vladimir Putin regarding trade agreements, following the breakdown of negotiations with the United States. Strong growth momentum continued, with GDP growing by 8.2% year-on-year in the third quarter (after 7.8% in Q2). Leading indicators confirm the expansion of the manufacturing and services sectors. Inflation is trending downward: the consumer price index (CPI) rose by 0.7% in November (0.3% in October and 1.54% in September). Against a backdrop of strong growth but low inflation, after holding rates steady in October, the Reserve Bank of India (RBI) decided to lower its key rate by 25 basis points in December, bringing it to 5.25%.

MARKETS
Equity markets:
Equity markets were broadly up in the fourth quarter, buoyed by Japan and emerging markets despite weakness in China. The MSCI ACWI (in USD) rose 3% in Q4, and the MSCI EM gained 4.2%, ending the year up 30.3%.
US equities were benefitted from the Fed's rate cuts and improved growth prospects for 2026. The S&P 500 and the Nasdaq 100 both ended Q4 up 2.3% lifted by the promise of AI. The Russell 2000 finished up 1.9%, a sign that small and mid caps were also in demand.
In Europe, the Eurostoxx 50 outperformed the MSCI ACWI, rising by 4.7%. Spain was the big winner of the quarter, with the IBEX gaining 11.8%. This strong performance can be explained by economic growth that was well above the eurozone average and by the performance of the banking sector, which has a significant weighting in the index. The CAC 40 rose more moderately, up 3.2%, as did the DAX (up 2.6%). European banks maintained a positive trend, gaining 12.8% over the quarter (and projected to rise 80.3% over 2025 as a whole). Small and mid-caps were more sought-after and outperformed (Stoxx Europe 600 up 6.2%).
In Asia, Japan ended the quarter at the top of the table, with the Nikkei 225 gaining 12%. Extensive profit-taking in China led to underperformance, with the HSCEI closing the quarter down 6.7%.

Bond markets:
In the United States, interest rates generally declined over the quarter due to the end of quantitative tightening, the Fed's rate cuts and the announcement of a resumption of balance sheet expansion. The yield on the 10-year Treasury note rose by 2 bps to end the quarter at 4.17%. The 2-year US Treasury yield fell significantly — 14 bps to 3.47%, impacted by the Fed's key interest rate cycle. The yield on the 30-year US Treasury note, still affected by the Fed's independence and higher long-term inflation, closed up 11 bps at 4.84%, leading to a further steepening of the yield curve.
In Europe, interest rate trajectories have been mixed. German rates trended upward due to the financing of its stimulus package. The 10-year Bund rose by 14 bps to 2.86% and the 2-year also closed higher, reaching 2.12% (up 10 bps). In France, rates remained stable despite a new phase of political uncertainty: the 10-year OAT rose slightly, by 3 bps to 3.56% and the 2-year was up 7 bps to 2.32%. Spreads with Germany narrowed significantly during the quarter: the 10-year OAT spread relative to the 10-year Bund decreased by 11 bps to 71 bps, while Italy saw its spread reach 70 bps (a decrease of-13 bps), its lowest level since August 2008.
In Japan, the stimulus package announced by Sanae Takaichi, high inflation, a weak yen and the BoJ's interest rate hike led to a surge in long-term rates. The Japanese 10-year yield rose by 42 bps to 2.06% and the 30-year yield closed at 3.40% (up 25 bps), returning to levels not seen since the 1990s.

Currencies, gold and oil:
After a period of recovery, the dollar remained stable against the euro at the end of the quarter, with EUR/USD closing at 1.17, up 0.1%. The pound sterling also remained stable against the dollar, with GBP/USD ending up 0.2% at 1.34. In Japan, the yen weakened significantly during the fourth quarter, with USD/JPY closing at 157, up 6.0%. Gold continued its surge due to the geopolitical context and the instability of the dollar: the price of gold ended at a record high of $4,319, up 11.9% over the quarter (64.6% over the year). The price of silver followed the same trend, rising 53% over three months. In the energy market, weak Chinese demand, increased OPEC production and expectations of a potential return to Russian production weighed on oil prices: Brent closed at £61/barrel, down -9.2%.

Q1 2026

The quarter was overshadowed by geopolitical tensions. Up to the end of February, global momentum was positive worldwide, with inflation slowing and investors banking on central banks continuing to cut rates, while leading indicators (PMIs) and the labour market were showing positive trends in both the United States and Europe. The war in Iran and the oil shock changed those opinions in March. Financial markets saw two phases: January and February saw the dollar and interest rates fall, with European and Asian equities outperforming relative to the United States. In March, however, the outbreak of hostilities in Iran reversed these trends, triggering a sharp hike in volatility and an energy shock likely to challenge the trajectory of inflation, growth and monetary policies.
GEOPOLITICS
The first days of the year were marked by the capture of the Venezuelan president, Nicolas Maduro by US special forces. Delcy Rodriguez took over as interim president and Donald Trump announced that US oil companies would invest in its infrastructure and exploit Venezuela's significant oil reserves.
The US president then expressed his desire to take control of Greenland by threatening NATO allies with the use of military force, and subsequently, punitive tariffs against Denmark and other European countries that opposed the move. These threats were ultimately withdrawn in the face of European opposition and after negotiations regarding US military installations on the island.
Tensions mounted steadily in February between Iran and the United States as negotiations over the military nuclear programme stalled. Washington initially deployed its largest military force since 2003 to the region, in order to strengthen its position and increase pressure on Iran. On February 28, joint strikes led by Israel caught several Iranian leaders off guard, notably resulting in the deaths of Supreme Leader Ali Khamenei, and numerous civilians and military leaders of the regime, including the Minister of Defence and the commander of the Revolutionary Guards. Tehran appointed Mojtaba, son of Ali Khamenei, its new Supreme Leader. At the beginning of March, Iran retaliated, aiming to foment chaos in the Middle East, by bombarding infrastructures in the Gulf countries and blockading the strait of Hormuz. Lebanese Hezbollah and Israel are in direct confrontation, while Iraqi militias are reported as targeting US bases. The conflict was ongoing at the end of March despite multiple signals from Washington that it had achieved its objectives. This conflict has led to an historic rise in the price of oil.
The situation on the ground in Ukraine has changed little but the risk of an oil shortage has put Russia in a position of strength and sanctions on Russian oil exports have been partially lifted.
Faced with trade-related instability from the United States, the European Union and India have reached an agreement aimed at eliminating €4 billion in customs duties

– which represents 96.6% of EU exports to India – which could double European exports — while exempting sensitive products (dairy, sugar, and certain meats). This agreement follows the Mercosur deal, the ratification of which is a source of tension among member states.

Macro Economy

United States

Economic indicators in the US are contradictory. Growth in Q4 2025 was revised down sharply (0.7% versus a forecast of 1.4%) marking a slowdown compared to 4.4% growth in Q3 2025. This slackening can be attributed to the US federal shutdown, which affected government spending (a one percent reduction in US GDP according to the Bureau of Economic Analysis ("BEA"). A decline in consumer consumption is also affecting growth, partially compensated by corporate investment. Leading indicators (PMIs) however remained positive. The Manufacturing ISM rose well above the 50 mark which signals expansion (52.4 in February, 52.7 in March). The Services ISM continued its upward progression since September 2025, reaching 56.1 in February. Industrial production grew and retail sales were up by 3.2% y-on-y in January. Despite short-term volatility in economic statistics, the labour market remains resilient, with unemployment hovering between 4.3 and 4.4%.

US inflation continued to slow, ahead of the probable impact of the price of oil in Q2. Prior to the Iran war, falling fuel prices and the slowdown in housing costs eased pressure on the consumer price index (CPI), while core inflation, excluding food and energy, reached its lowest level in nearly five years. The CPI moved to 2.4% in January and February and core CPI came in at 2.5% in the same months, (versus 2.6% in December 2025). The Federal Reserve's preferred measure, PCE (Personal Consumption Expenditures) remained high at 3.1% for its core component. Inflation expectations were unsettled by the Supreme Court's decision to quash the customs tariffs announced by Trump in April 2025. The White House immediately used other legislative frameworks to maintain this key policy of the Republican administration. Despite the fall in inflation and labour market resilience, the Fed maintained the status quo by keeping the key rate range at 3.50-3.75%. Kevin Warsh's nomination to replace Jerome Powell was well received by markets that had feared a more unorthodox choice. The market was expecting two to three rate cuts by the Fed in 2026 but after the outbreak of war with Iran it is now forecasting only a 25-bps cut by the end of the year.

Europe

Eurozone

European growth slowed slightly. In Q4, GDP was up 0.2% but below expectations. Over the course of 2025, Eurozone growth stood at 1.2% (compared to 1.4% annualised in Q3), led by Spain (2.8%), Ireland (12.3%), and Portugal (1.9%). Leading indicators remained positive in services (HCOB Services 51.9 in February), likewise in the manufacturing sector (HCOB Manufacturing 50.8 in February). Unemployment came back down to 6.1% in January. European industry was no doubt affected by the sharp hike in oil and gas prices in March. The German government revised its GDP projection down to 1% for 2026 (compared to 1.3% previously) and 1.3% for 2027 (versus 1.4% previously). The French prime minister, Lecornu, survived several confidence votes and the 2026 budget was finally adopted in February with the deficit reduced to 5% of GDP.

Eurozone inflation had already begun to show signs of ticking upwards before the start of hostilities in the Middle East. It fell 1.7% in January ((harmonised measure), below the 2% target set by the European Central Bank (ECB), but unexpectedly rose again in February to 1.9% with core inflation climbing to 2.4%, driven by services (3.4% in February as against 3.2% in January). Inflation then surged in March, the spike in energy prices caused by the Iran war drove price increases to their highest level in two years. But inflation looks the same across the Eurozone area. Despite this the ECB kept its deposit rate at 2%.

United Kingdom

The UK economy is showing mixed momentum: consumer consumption is holding up relatively well, but this is not enough to sustain robust growth. The Office for Budget Responsibility (OBR) revised its growth expectations for 2026 downwards, to 1.1%, reflecting moderate domestic demand and investment. Inflation is beginning to ease – a positive sign for purchasing power – but remaining sensitive to external shocks, with the hike in energy prices being a source of uncertainty which could reignite inflationary pressures. On the employment front, indicators remain favourable overall (a solid labour market), but the first signs of weakening are beginning to appear (a slowdown in job creation/moderate salary trends) and could end up weighing on consumption. The Bank of England adopted a cautious tone, keeping the base rate at 3.75% whilst at the same time leaving the door open for an accommodating adjustment if inflation continues to decline. This option is now contingent on trends in energy prices, inflation and activity data.

ASIA

Japan

In February the new Prime Minister, Sanae Takaichi called a general election which her party won with a large majority, thus giving her a free hand to promote growth-friendly and inflation-calming policies. She appointed candidates to the Bank of Japan who favour monetary stimulus and low rates and oppose normalisation efforts. Growth was weak at the start of the year but leading indicators remained positive (Manufacturing PMI at 53 in February compared to 51.5 in January and the Composite PMI at 53.9 (versus 53.1) suggesting positive activity dynamics. The Manufacturing PMI then fell back to 51.6 in March, thereby standing below the market consensus of 52.8. We see good progress in exports, to 16.8% in January on an annualised basis, supported by yen weakness. Imports were down 2.4%, a sign of weak domestic demand. The Japanese Services PMI by S&P Global retreated to 52.8 in March, as against 53.8 in the previous month. This is its lowest level since December, in part reflecting concerns over the ongoing conflict in the Middle East. The labour market remains structurally tight (labour shortage), but wages growth is moderate. Inflation continued to slow. National CPI came in at 1.5% in January on an annualised basis (compared to 2.1% in December), while core inflation stood at 2.0% (2.4% previously). The Bank of Japan kept its key rates unchanged.

China

The Chinese economy continued to grow, albeit at a slower pace. Beijing set a growth target of around 4.5-5% for 2026. Economic indicators improved. The NBS Manufacturing PMI moved from 49 in February to 50.4 in March. But there are persistent vulnerabilities: private consumption remains a weak point in the recovery, the real estate sector is being slow to normalise and regional institutional indebtedness remains restrictive. The authorities are prioritising support targeting households and investment, without significantly reigniting financial risks. The labour market is showing signs of improvement, but these are insufficient to revive domestic demand in the long term. The trade war and rebalancing of supply chains are prompting exporters to reposition themselves; nevertheless, China's trade surplus continues to surprise on the upside.

In February inflation exceeded expectations (1.3% y-o-y) while production prices were still contracting, although less markedly (down 0.9% in February). The central bank is maintaining an accommodative monetary stance, combining liquidity support and policies aimed at stimulating demand whilst attempting to contain imbalances.

MARKETS

Equities markets

The outbreak of war in Iran weighed heavily on the equities markets. Outside the United States markets globally continued to rise, up until 27 February, led by Japan and Europe, but this outperformance was then reversed. Markets fear stagflation and less cooperative monetary policies, leading to an uptick in volatility (VIX above 30%). The MSCI ACWI retreated 3.5% in USD terms, with developed markets underperforming by 3.9% and emerging markets remaining stable over the period. US equities consolidated sharply: the S&P 500 declined by 4.6% in USD whereas the Eurostoxx 50 lost only 3.8% in USD and remained close to flat in EUR terms. Chinese equities were also penalised (HSCEI down 6%).

Several rotations marked the period: consolidation among software suppliers (driven by fears of significant AI-related disruption) and a rotation toward semiconductor manufacturers and their value chain. Mid-caps were favoured over large-caps. Cycles initially favouring Europe and Japan were reversed with the hike in the oil price: the Stoxx Europe 600 posted a 5.5% loss in EUR terms since the start of the conflict. The South Korean index tumbled as much as 18% before rebounding, pulling back its decline to -12%. However, it remains up by approximately 30% since the start of the year. The Japanese Topix finished up 2.6%. In terms of sectors, energy was making progress at the end of the quarter, whereas more cyclical, demand-sensitive sectors remain under pressure.

Bond markets

The figures stated in this report are historical and not necessarily indicative of future performance.

The bond market remained very volatile over the quarter: after a rate-cutting phase the onset of the Iran war brought in a clear recovery. Investors initially anticipating cuts by the central banks, revised their projections when Brent broke the $100 mark, reigniting fears of galloping inflation. Markets revised expectations for both the Fed from two to three cuts to no cuts in 2026 and for the ECB, from potential cuts to a rise of 75 bps. US 2-year Treasury bills closed up 32 bps and the 2-year German yield up 49 bps to 2.62%. Increases in yields were swift and pronounced at the long end of curves, reflected in recovering premiums and an adjustment in long-term inflation expectations (with breakeven inflation rising sharply): US 10-year yields up 15 bps, passing the psychological barrier of 4% to reach 4.32% and the Bund up 15 bps, approaching 3%. US 30-year Treasuries grazed 5% and the 30-year Japanese bond finished at 3.7%.
The 10-year OAT reached an intraday peak close to 3.9%, its highest level since 2009, and 10-year Gilt yields hit 5.1%, their highest level since 2008. Volatility on the bond markets is also reflected in Eurozone spreads, with a spread of 14 bps in France and 28 bps in Italy, compared to Germany.
The corporate credit market continued to be active with a significant volume of issues, despite such a complex backdrop. We see widening credit spreads, especially in the high-yield segment, while several private debt funds are struggling to ensure liquidity for their holders.

Foreign exchange, gold and oil
The foreign exchange market exhibited two phases: initially the dollar was tracking downwards, then posted a sharp rebound after the outbreak of hostilities in the Middle East, the greenback regaining its status as a safe haven. Over the quarter the euro declined 1.6% against the dollar, with the yen down 1.3% and pounds sterling remaining stable.
Kevin Warsh's appointment also helped to stabilise the dollar and correspondingly weighed on gold. After a period of consolidation at the end of January, gold started to rise again, reaching $5,183 per ounce supported by the geopolitical backdrop. The price of gold fell sharply following the launch of Iran's retaliatory strike, driven by the strengthening dollar and the search for liquidity by Persian Gulf institutions. The precious metal lost 11% over the month, finishing at $4,668 per ounce after dipping close to $4,100.
Oil posted its sharpest monthly gain in decades in March; Brent rising 63.3% in March to settle at 118.35 USD a barrel. The price of US oil (WTI) surged by approximately 50%, driving the price of gasoline in the United States up to $4 a gallon for the first time since 2022.

Q2 2026

In the second quarter of 2026 the global economy proved generally resilient to the shock caused by the blockade of the strait of Hormuz. The rise in inflation remains relatively limited for the time being although consumption is slowing in several regions. In the United States, economic activity remains supported by investment – particularly in artificial intelligence and defence – while households are beginning to feel the impact of rising prices more acutely. Growth remains fragile in Europe, against a backdrop of rising inflation and limited fiscal room for manoeuvre. So central banks are adopting a firmer stance. Momentum in Asia remains positive overall: Japan continues resilient thanks to domestic demand, and China is showing signs of recovery, supported by an accommodating monetary policy. Across the markets the rise in inflation and shifting monetary policy expectations have led to a rise in interest rates. However, shares rebounded sharply after the announcement of a ceasefire in the Persian Gulf, driven by strong corporate earnings and the artificial intelligence theme. The quarter closed with oil close to $70 a barrel, while the dollar strengthened and gold retreated.

Macro Economy
United States
In the second quarter the US economy retained its contradictory profile: investment, particularly in artificial intelligence and defence, remains robust, while consumption weakened progressively thanks to the energy shock and inflation pressures. Q1 growth came in at 2.1% y-o-y (compared to a rise of 1.6% initially), with real consumer spending – that is adjusted for inflation – proving weaker than expected. While retail sales had rebounded strongly in March, rising 1.7% m-o-m, momentum subsequently ran out of steam: disposable income remained flat, and personal spending grew by only 0.7% in June. Household confidence surveys hit a ten-year low in April (Univ. Michigan Consumer Sentiment à 49,8), but bounced back in June. The savings rate fell back to 3.0% of disposable income in May, with households dipping into their savings to cope with rising prices. Sales of new homes over the quarter retreated markedly under the impact of interest rates on real estate. This is in contrast to the investment that is driving US growth. Durable goods orders significantly outperformed expectations, rising 7.9% (versus an expected 3.5% and a previous 1.3%), driven by defence equipment, industrial machinery, and – above all – AI-related infrastructure. Leading indicators point to this positive trend continuing: the manufacturing activity index (ISM Manufacturing) remained in expansion territory at 52.7 in April, then reached a high in May of 54.0, not seen since 2022, and 53 in June. The ISM Services index rose to 54.5 in May (against 53.6 in April) with new orders at 57.7. In the labour market, Non-Farm Payrolls (NFP) surprised on the upside (up by 172,000 compared to a consensus estimate of +88,000), accompanied by positive revisions. Unemployment remained stable at 4.3% throughout the quarter.
Inflation accelerated again, driven by the hike in the price of petrol. In May, the Consumer Price Index (CPI) came in at more than 4% y-o-y, with core CPI at 2.7%. The PCE inflation rate for May was also high, at 3.9% y-o-y, and core PCE at 3.4% – a level incompatible with a return to the Federal Reserve's target of 2% in the short term. The price of services, measured by the ISM Services Price Paid survey for May, reached a high not seen since 2022. During the first meeting under the chairmanship of Kevin Warsh, the monetary policy committee (FOMC) was unanimous in maintaining rates unchanged at 3.50-3.75%, while announcing that the Fed was going to prioritise price stability. Warsh announced the creation of five working groups to redefine the monetary policy framework. The committee's decidedly hawkish tone and deliberately limited communication took the markets by surprise; they now anticipate an initial rate hike as early as September 2026.

Europe
Eurozone
Growth momentum in the Eurozone is still fragile, with a continuing increased risk of stagflation. In Q1 real GDP growth was revised down to 0.2% q-o-q in its final announcement, compared to down 0.1% previously, particularly due to the strong GDP contraction in Ireland (down 12.5%). Domestic demand was therefore already slowing at the beginning of the year, driven by weakening consumption and investment. Consumer confidence continues to deteriorate. Pressure on purchasing power has intensified against the backdrop of slowing real wage growth. The labour market was also showing signs of running out of steam and the unemployment rate rose to 6.3% in April. Leading indicators confirm this picture: the composite PMI HCOB index fell below 50 in May and other activity surveys signalled a decline in employment, especially in France and Germany. Overall, the risk of stagflation is still significant, all the more so as external demand
faded and the margins for fiscal manoeuvre are limited in most countries. Germany is deploying its recovery plan on an ongoing basis, but this is insufficient to sustain activity in the Eurozone.
Inflation continued its upward momentum throughout the quarter, moving away from the European Central Bank's (ECB) target. Initial annualised estimates for inflation (HICP) in June stand at 2.8%, down from 3.2% in May, while it was 1.7% at the beginning of the year. Inflation, excluding volatile components, has reached 2.4%, a sign that rising energy costs are gradually spreading throughout the economy. Amid these circumstances the ECB increased its deposit rate in June by 25 basis points. However, the market is expecting two or three hikes of 25 basis points over the course of 2026.
United Kingdom
In the United Kingdom, the dynamic of Q2 was characterised by relatively resilient activity and persistent inflation which remains lower than in the Eurozone. Gross Domestic Product (GDP) in March moved up 1.2% year-on-year, largely above expectations. Leading activity indicators show resilience in the manufacturing sector (with an activity index of 53.1 in June). Nevertheless, the trend in services seems to be reversing (May Services PMI at 48.7 versus 50.5). During May inflation was at 2.8%, with underlying inflation at 2.6%. This is a sign that purchasing power is deteriorating, retail sales excluding energy fell by 0.4% in April. The BoE's caution has been confirmed over the months in the face of still-mixed macroeconomic signals; it has not altered monetary policy.

ASIA

The figures stated in this report are historical and not necessarily indicative of future performance.

Japan
The Japanese economy showed marked resilience in Q2, buoyed by domestic demand. March GDP came in 1.8% – above expectations. As far as consumption goes, retail sales were from 1.4% in April to 2.1% in May year-on-year. This increase is largely attributable to government subsidies, particularly a stimulus plan targeting consumption and the alleviation of price pressures. Activity indicators nevertheless show conflicting dynamics: the S&P Global Flash Manufacturing PMI continues to signal expansion (54.9 in June) while the PMI also remains above 50 (51.8 in June). Inflation slowed slightly, dropping to 1.4% in May versus 1.5% in April. On the other hand, inflationary pressures on producers are intensifying sharply upstream: PPI in May came in at 6.3% y-o-y, its highest level in over three years, driven by a 25.5% rise in import prices, including a 47% surge in energy prices. The yen remains under pressure; forcing the government to intervene to limit excessive depreciation. With inflation exceeding its target, the Bank of Japan raised rates by 25 bps to 1.0% on June 16 – their highest level since 1995 – while signalling normalisation would continue.

China
The Chinese economy began Q2 on an encouraging note, posting Q1 GDP at 5.0% (versus 4.5% in Q4 2025), remaining within Beijing's target range of 4.5 to 5%. The manufacturing sector's activity index (RatingDog Manufacturing PMI) declined from 52.2 in April to 51.8 in May, above consensus (51.4), but down compared to the previous month. Service indicators also looked good (RatingDog Services PMI moved from 52.6 in April to 54.4 in May), clearly above expectations. Inflationary momentum accelerated sharply in April and China appeared to be coming out of its deflation phase. The annualised consumer prices index came in at 1.2% (versus 1.0% in March and consensus opinion of 0.8%). The most significant hike was in production prices: the PPI surged to 3.9% year-on-year in May, way above expectations. We note that China has reduced fuel imports and is using its strategic stockpile to limit the negative impact of the blockade of the strait of Hormuz. Exports were up 19.4% (in USD terms) boosted by shipments to the United States being up 35.4% – the highest they have been since March 2021. On the imports side, momentum accelerated further to 27.4%, exceeding both the previous month's figure (up 25.3%) and consensus expectations. The People's Bank of China is maintaining an accommodative policy, with the one-year and five-year Loan Prime Rates (LPR) remaining unchanged at 3.0% and 3.5% respectively, combining liquidity support with targeted policies to boost domestic demand without reigniting financial imbalances.

India
In India, economic activity remained resilient, with indicators posting highs. In June, the HSBC PMI confirmed the trend with the composite index coming in at 57.4 and the Services PMI at 57.3. The Manufacturing PMI reached 54.5, signalling a slight slowdown in the private sector. These figures were supported by April's industrial production, up 4.9% y-o-y, above consensus expectations, driven by a sharp increase in manufacturing output. Equally, infrastructure output gained ground, up to 1.7% in April while consensus estimates were for a contraction of 0.5%. Inflation calls for heightened vigilance on the part of the central bank, as inflationary pressures are intensifying. The Consumer Prices index (CPI) gathered speed to rise 3.93% year-on-year in May, compared to 3.5% in April, this reflecting the gradual pass-through of the energy shock. Wholesale price inflation (WPI) surged to 9.68% – its highest level for four years, driven by soaring fuel prices (up 30% y-o-y) and rising prices for manufactured goods (up 7.5%). The central bank (RBI) has revised its growth forecasts downward and its inflation expectations upward, but has kept its key policy rate at 5.25%.

MARKETS
Money markets and bonds
During the quarter, the energy shock and the resurgence of inflation led to a shift in expectations regarding monetary policy. Investors expecting key rate cuts by the end of the year, have revised their forecasts, now expecting a 75 basis points increase from the European Central Bank and a hike from the Fed over the 12-month horizon, driving up short-term interest rates. The 3-month Euribor rose to 2.32%, up 25 basis points. The 2-year T-Bill yield rose by 37 basis points to 4.17% and the 2-year German Bund yield fell nine basis points to 2.53%. After an initial sovereign bond rally triggered by the outbreak of hostilities in Iran in March, long-term interest rates have resumed their upward trend. The 10-year Treasury yield is up 15 basis points over the quarter, to 4.56%. In the Eurozone, long-term interest rates have not followed this trend, with the German 10-year Bund retreating 14 basis points to 2.86%. Equally, we can see peripheral spreads tightening, with the exception of France (the 10-year OAT up seven bps versus the Bund).
The hike in sovereign yields has not weighed on the performance of corporate bonds, where spreads have tightened sharply: The Main sovereign bond was down 20 bps and the CrossOver dropped 109 bps over the quarter, despite liquidity constraints at several private debt funds.

Equities
Share markets performed well over the quarter, despite geopolitical instability, the energy crisis and rising interest rates. After a phase of consolidation in March with the ongoing war between Iran and the United States and Israel, the market bounced back with the announcement of a ceasefire. The MSCI ACWI index finished up 14.5% in USD terms. Developed markets came in at 13.3% (in USD) and emerging markets clearly outperformed with a rise of 23% in the MSCI EM index (in USD). The market was boosted by excellent first-quarter earnings results, in particular American corporates that significantly outperformed analyst expectations, but also by the resurgence of the AI theme. The US technology index, the Nasdaq 100, gained 27.5%, outstripping the S&P 500 which rose 14.9%. The semiconductor sector has been in high demand overall, pushing the Seoul and Taipei markets to new highs. The lack of a genuine AI driver is weighing on European equities, which are lagging behind with a return of 6.6%. We note underperformance in China and a strong uptick in Japan (the Nikkei is up 37.2%).

Commodities, foreign exchange and gold
Uncertainty over the end of the conflict in the Persian Gulf strongly influenced foreign exchange markets where the dollar regained its status as a safe haven. The price of Brent fluctuated between $90 and $120 a barrel over the quarter and hikes in oil prices were linked to a rise in the dollar, itself linked to the rise in short-term US interest rates. Over the quarter, Brent crude fell 38.4% and ended near $70.
Euro/dollar parity finished down from 1.1% to 1.142%. The yen remained under pressure due to the resurgence in inflation in Japan and a fiscal policy being viewed as aggressive by the market; it ended the quarter at 163 against the dollar despite interventions by the Japanese government to boost the currency. Rising risk-free yields and sales by financial institutions weighed on the price of gold, which ended down 14.1%, close to $4,000 per ounce.

The accompanying notes form an integral part of these financial statements

1 INTRODUCTION

Amundi Funds (the “Fund”) is organised as a “Société d’Investissement à Capital Variable” (“SICAV”) under the laws of the Grand Duchy of Luxembourg. The Fund, initially Groupe Indosuez Funds FCP, an unincorporated mutual investment fund (“Fonds Commun de Placement”) created on 18 July 1985, was transformed, in accordance with Article 110 (2) of the law of 30 March 1988 on Undertakings for Collective Investment, and renamed GIF SICAV II on 15 March 1999. The deed of transformation and the Articles of Incorporation (the “Articles”) were published in the Mémorial, Recueil des Sociétés et Associations on 28 April 1999. The name of the Fund was then changed to GIF SICAV on 1st December 1999, to Crédit Agricole Funds on 8 December 2000 and to CAAM Funds on 1st July 2007. As at 2 March 2010, in accordance with the decision taken by the shareholders in the framework of the Extraordinary General Meeting held on 23 November 2009 and with the decision of the Board of Directors taken on 23 December 2009, CAAM Funds was renamed Amundi Funds.

The amendments to the Articles have been published in the Mémorial, Recueil des Sociétés et Associations respectively on 14 January 2000, on 17 January 2001, and on 13 June 2007 for the first three name changes and on 3 April 2010 for the last one. A latest amendment to the Articles has been made on 14 March 2012 and has been published in the Mémorial, Recueil des Sociétés et Associations - C, number 943 and dated 12 April 2012. The Fund is subject to Part I of the amended law of 17 December 2010 on Undertakings for Collective Investment (the “2010 law”).

The following Sub-Funds have been launched during the year:
Amundi Funds Global Bond Income on 7 July 2025
Amundi Funds US Bond Income on 2 October 2025
Amundi Funds US Equity High Income on 21 October 2025
Amundi Funds Global Equity Core on 04 December 2025
Amundi Funds US Equity Large Cap Value on 04 December 2025
Amundi Funds US Equity Small Cap on 04 December 2025

The following Sub-Fund has been merged into Amundi Funds Global Multi-Asset Conservative on 19 June 2026:
Amundi Funds Multi-Asset Real Return.

Amundi Funds Global Bond Flexible has been defeederized from its Master Amundi Oblig Internationales Flexible on 12 June 2026.

As per Depositary confirmation, the following balances are present as at 30 June 2026 for these liquidated Sub-Funds:
- Amundi Funds Equity Korea : USD 6,747.88 and EUR -20.34
- Amundi Funds Equity Emerging Conservative : USD 291.95

Considering the cumulated relevant portion of Russian and Ukrainian securities in portfolio and following decision of the Board of Directors of the SICAV:
- Amundi Funds Russian Equity: the NAV calculation has been suspended on 28 February 2022 and the last available official NAV is dated 25 February 2022.
After that date, no further subscriptions or redemptions have been accepted for this Sub-Fund.
- Amundi Funds Emerging Europe Middle East and Africa: the segregated class (ISIN LU2600584523) created on 11 April 2023, where all the illiquid Russian assets and liabilities have been transferred, is still existing.
The class is still under liquidation and subscriptions and redemptions are still not accepted. All the related fees are still waived or borne by the Management Company.
No advance on liquidation proceeds have been anticipated to the shareholders.

In reference to the prospectus dated April 2026, the Fund consisted of 119 Sub-Funds in activity, each investing in a specific market or group of markets.
Equity Japan Target, Euroland Equity, Europe Equity Select, Euroland Equity Small Cap Select, Europe ex UK Equity, European Equity, Europe Equity Green Technology, European Equity Value, Europe Equity Income Select, European Equity Small Cap, Global Equity Responsible, Global Equity, Global Equity Select, Global Equity Income Select, Global Equity Core, Japan Equity Select, Japan Equity Value, Montpensier Great European Models SRI, Montpensier M Climate Solutions, Global Equity Climate, Europe Equity Climate, Polen Capital Global Growth, US Equity Dividend Growth, US Equity Select, US Equity Fundamental Growth, US Equity Research , US Equity Research Value, US Equity High Income, US Equity Large Cap Value, US Equity Small Cap, US Pioneer Fund, China New Energy, Asia Equity Focus, China A Shares, China Equity, Emerging Europe Middle East and Africa, Emerging Markets Equity Select, Emerging Markets Equity Focus, Emerging Markets Equity Focus ex China, Emerging World Equity, Equity MENA, Latin America Equity, Emerging Markets Equity Climate, Emerging Markets Equity Growth Opportunities, Russian Equity, SBI FM India Equity, India Equity Contra, Euroland Equity Dynamic Multi Factors, Euroland Equity Risk Parity, European Equity Conservative, European Equity Dynamic Multi Factors, Global Equity Conservative, Global Equity Dynamic Multi Factors, European Convertible Bond, Montpensier Global Convertible Bond, Euro Aggregate Bond, Euro Bond Income, Euro Corporate Bond Select, Euro Government Bond Responsible, Euro Inflation Bond, Impact Euro Corporate Short Term Green Bond, Strategic Bond, Euro High Yield Bond, Euro High Yield Short Term Bond, Euro Subordinated Bond Responsible, Global High Yield Bond Responsible, Global Subordinated Bond, Pioneer Global High Yield Bond, US High Yield Bond, Global Aggregate Bond, Global Government Bond, Global Bond Income, Global Corporate Bond, Global Corporate Bond Select, Global High Yield Bond, Global Inflation Short Duration Bond, Global Short Term Bond, Global Bond Flexible, Impact Green Bond, Multi Sector Credit, Global Corporate Bond Climate, Optimal Yield, Optimal Yield Short Term, Strategic Income, US Corporate Bond Climate, US Bond, US Bond Income, US Corporate Bond Select, US Short Term Bond , Asia Bond Income Responsible, China RMB Aggregate Bond, Emerging Markets Blended Bond, Emerging Markets Bond, Emerging Markets Corporate Bond, Emerging Markets Corporate High Yield Bond, Emerging Markets Green Bond, Emerging Markets Hard Currency Bond, Emerging Markets Local Currency Bond, Emerging Markets Short Term Bond, Asia Multi-Asset Target Income , Euro Multi-Asset Target Income, Global Multi-Asset, Global Multi-Asset Conservative, Global Multi-Asset Target Income, Income Opportunities, Multi-Asset Conservative Responsible, Multi-Asset Climate, Pioneer Flexible Opportunities, Real Assets Target Income, Absolute Return Forex, Absolute Return Multi-Strategy, Absolute Return Global Opportunities Bond, Multi-Strategy Growth, Quantitative Global Absolute Return Bond , Volatility Euro, Volatility World, Protect 90, Cash EUR and Cash USD.

The Board of directors has decided to converted the "Share Classes C" into "Shares Classes A" as of 28 November 2025 for the following Sub-Funds :

2 PRINCIPAL ACCOUNTING CONVENTIONS

PRESENTATION OF THE FINANCIAL STATEMENTS

The Fund's financial statements were prepared in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

The financial statements are presented on the basis of the latest Net Asset Value ("NAV") calculated during the financial period. In accordance with the prospectus dated April 2026, the NAVs were calculated using the latest market values and exchange rates known at the time of the calculation meaning:

- For all Sub-Funds: official NAV dated 30 June 2026.

In the annual report as at 30 June 2026, the Sub-Funds merged or liquidated during this period are shown separately in the Statement of Operations and Changes in Net Assets and are included in the combined figures.

These financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements on a going concern basis except for Amundi Funds Montpensier Great European Models SRI. (See note 29).

- **Cross Sub-Funds investments** - As at 30 June 2026, the value of the investments made by Sub-Funds in other Sub-Funds of the SICAV amounts to EUR 1,012,770,567.07 corresponding to 1.03% of the total net asset value. Therefore, the total combined NAV at the year end without those cross investments would amount to EUR 97,278,930,984.93.

- **Securities portfolio** - Transferable securities listed on a Stock Exchange or on a regulated market are valued at their last known price. When these prices are not representative or when securities are not listed, they are valued at their reasonably probable realisation value, determined with care and in good faith by the Board of Directors.

- **Conversion of items expressed in foreign currencies** - The Fund's financial statements are expressed in Euro (EUR). Net assets of each Sub-Fund expressed in foreign currencies are therefore converted and combined in EUR at the exchange rate in force at the close of the financial year.
  Transactions and acquisition costs for portfolio securities expressed in foreign currencies are converted into the accounting currency of the Sub-Fund concerned at the exchange rate in force on the date of transaction or acquisition, as appropriate. Valuation values for securities in the portfolio and of other assets and liabilities expressed in foreign currencies are converted into the accounting currency of the Sub-Fund at the exchange rate in force at the end of the financial year. Currency differences resulting from these conversions are recorded under the caption "Reevaluation of consolidated Net Assets" in the Statement of Operations and Changes in Net Assets.

- **Return on investments** - Dividends are entered as yields on the date when they are declared and in so far as the appropriate information can be obtained by the Fund. Interest is accrued on a daily basis.

- **Distribution of costs and expenses** - Each Sub-Fund is charged with costs or expenses specifically attributable to it. Costs and expenses not attributable to a specific Sub-Fund are distributed between the Sub-Funds on an equitable basis, in proportion to their respective Net Assets.

- **Repurchase agreements** - Repurchase agreements (Repos) are equivalent to borrowings guaranteed by underlying assets presented in the securities portfolio of the Sub-Fund which remains exposed to market risk. Reverse Repurchase agreements (Reverse Repos) are similar to guaranteed loans. In this case, the Sub-Fund is not subject to the risk of depreciation in the value of the underlying assets. Repos and Reverse Repos are regarded as borrowings and loans, respectively, of the sum of liquid assets received and/or paid.

- **Futures contracts** - Unexpired futures contracts are valued at their last known price on the date of valuation or on the closing date and unrealised appreciations or depreciations resulting from them are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on futures contracts are recorded in the Statement of Operations and Changes in Net Assets.

- **Futures-style options contracts -** Futures-style options contracts are valued at the quoted price available on an official stock exchange. Initial margin deposits are paid in cash upon entering into the contract. Subsequent positive or negative cash-flows, referred to as variation margins, are paid or received by the Sub-Fund periodically and are based on changes in the market value of future-style options contracts. When the contract is closed, the concerned Sub-Fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the opening transaction. Net unrealised appreciations or depreciations on futures-style options contracts are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on futures-style options contracts are recorded in the Statement of Operations and Changes in Net Assets.

- **Forward foreign exchange contracts** - Unexpired forward foreign exchange contracts are valued at the exchange rates applicable on the valuation date or on the closing date and unrealised appreciations or depreciations resulting from them are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on forward foreign exchange contracts are recorded in the Statement of Operations and Changes in Net Assets.

- **Valuation of options and swaptions** - Options officially listed on a stock market or any other regulated market, operating in a regular manner, recognised and open to the public, are valued on the basis of their closing prices on the valuation day or, in the absence of such prices, on the basis of the last-known prices available. OTC options including swaptions are marked-to-market based on the elements laid down in their contracts. If the last known prices for listed options or the calculated price for OTC options are not representative, the valuation will be based on the potential realisation value estimated by the Board of Directors of the SICAV with prudence and in good faith. Net realised and net change in unrealised gain/(loss) on OTC options and swaptions are recorded in the Statement of Operations and Changes in Net Assets.

- **Swaps** - The Fund is authorised to enter into variance swaps, credit default swaps, total return swaps, inflation swaps, asset swaps, interest rate swaps or currency swaps. Those swaps are recorded at market value based on the valuation elements laid down in the contracts. The unrealised net gain is included in the item "Unrealised net appreciation on swaps and CFD" in the Statement of Net Assets and the unrealised net loss is included in the item "Unrealised net depreciation on swaps and CFD" in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on swaps are recorded in the Statement of Operations and Changes in Net Assets.

- **Money market instruments** - The money market is a financial instrument with high liquidity and very short maturities. It is used by participants as a means for borrowing and lending in the short term, with maturities that usually range from overnight to just under a year. For the money market instruments, the accretion (difference between cost and amortised value), is reported under "Net change in unrealised appreciation/(depreciation) on investments and on debts derived from reverse repurchase agreements" in the Statement of Operations and Changes in Net Assets for securities held at year end. If the instruments have been sold or reimbursed, this result is considered as "Net realised profit/(loss) on securities sold" in the Statement of Operations and Changes in Net Assets.

- **To Be Announced securities (TBAs)** - TBA positions refer to the common trading practice in the mortgage backed securities market in which a security is to be bought from a mortgage pool (e.g. Ginnie Mae, Fannie Mae or Freddie Mac) for a fixed price at a future date. At the time of purchase the exact security is not known, but the main characteristics of it are specified. Although the price has been established at the time of purchase, the principal value has not been finalised. TBA positions are disclosed in the Securities Portfolio. The purchase of this type of security has not been settled and as a consequence, the amount corresponding to the payable due when the transaction is settled, is disclosed under "Brokers payable" in the Statement of Net Assets. The realised profits/(losses) on TBAs and changes in unrealised appreciation/depreciation are disclosed in the Statement of Operations and Changes in Net Assets respectively under the headings "Net realised profit/(loss) on securities sold" and "Net change in unrealised appreciation/(depreciation) on investments and on debts derived from reverse repurchase agreements". MBS / ABS risk Mortgage-backed and asset-backed securities (MBSs and ABSs) typically carry prepayment and extension risk and can carry above-average liquidity, credit and interest rate risks.

- **Net realised profit/(loss) on securities sold** - The "Net realised profit/(loss) on securities sold" figure of the Statement of Operations and Changes in Net Assets reflects the difference between the cost and proceeds from securities sold, including the market as well as the currency impacts.
- **Transaction costs** - The transaction costs include broker fees and fees charged by the custodian for securities and derivatives transactions. The transaction fees are excluded from the cost of securities and derivatives purchased and sold. All these fees are recorded under caption "Broker and transaction fees" in Statement of Operations and Changes in Net Assets. Refer to note 23 which describes the reception and transmission of orders fees.
- **Contracts for difference (CFD)** - At each valuation date, the difference in price between the opening price and the current market price of the underlying security or index to the CFD is recorded as the market value (unrealised gain or loss) of the contract; when the Sub-Fund enters a closing transaction, the difference between the opening notional amount and the closing notional amount of the underlying security is recorded as a realised gain or loss under captions Net realised profit/(loss) on swaps and CFD in Statement of Operations and Changes in Net Assets. Initial margin deposits may be made in cash upon entering in CFD. Subsequent payments, referred to as variation margins, are made or received by the Sub-Fund periodically and are based on changes in the market value of open CFD contracts.
- **Securities lending** - In securities lending and borrowing transactions, a lender transfers securities or instruments to a borrower, subject to a commitment that the borrower will return equivalent securities or instruments on a future date or when requested by the lender.The borrower must provide a guarantee, in the form of collateral, that extends throughout the loan period and is at least equal to the global valuation of the securities lent, plus the value of any haircut considered appropriate in light of the collateral quality.

3 EXCHANGE RATES USED AS OF 30 JUNE 2026

The exchange rates used for the combined figures are the following:

1 JPY	=	0.00538 EUR
1 USD	=	0.87466 EUR

4 MANAGEMENT FEES, ADMINISTRATION FEES AND DISTRIBUTION FEES

Fee structure - The Administration fee is a fee expressed as a percentage of the NAV of the Sub-Funds and classes of shares, including all the administrative expenses of the Fund.
Such fee includes the remuneration of the Administrative Agent, Domiciliary Agent, Transfer Agent and Registrar Agent for their services rendered to the Fund, the remuneration of the Custodian for its services rendered to the Fund as well as all other administrative expenses incurred in the operation of the Fund including but not limited to:

- the fees of auditors and legal advisers of the Fund (including costs associated with compliance with legal and regulatory requirements);
- the cost of translation, printing and distribution to investors of the annual and semi-annual reports, of the prospectus of the Fund, of the Key Information Document of each class of shares and of any supplement thereto as well as of any notice sent to the Investors' attention;
- any costs related to the information of the shareholders including costs related to the publication of prices of shares in the financial press, the production of information material for the subscribers and distributors;
- any fees and expenses involved in registering and maintaining the registration of the Fund with any governmental agency or stock exchange and to comply with any regulatory requirements and the reimbursement of such fees and expenses incurred by any local representative;
- the fees of any local representative/correspondent, of which the services are required pursuant to the applicable law;
- the costs related to extraordinary measures, in particular any expertise or trial aiming at the protection of the shareholders' interests;
- the costs related to the translation, distribution and publication of any notice to the shareholders.

The Administration fee is paid in arrears to Amundi Luxembourg S.A., within a frequency defined by the Management Company and is calculated each day for each Sub-Fund and each class of shares.
The Management fees, expressed in percentages of the NAV, are paid in arrears to Amundi Luxembourg S.A., within a frequency defined by the Management Company and calculated each day for each Sub-Fund on the basis of the daily NAV of each class of shares.
Amundi Luxembourg S.A. is responsible for paying commissions to Investment Managers.
In addition to the management fees paid by the Fund to Amundi Luxembourg S.A., the Sub-Funds investing part of their assets in other UCI's are also subject to the management fees charged to those Sub-Funds.
The Distribution fees are calculated and accrued on each Dealing Day at the below rates per annum and are paid in arrears to Amundi Luxembourg S.A., within a frequency defined by the Management Company. Amundi Luxembourg S.A. is responsible for the payment of fees to Distributors.
The Management Company can further decide to pay remuneration to Distributors out of its own fees.
The Management fees, Administration fees and Distribution fees, expressed as a percentage of the NAV, applicable at 30 June 2026 are the maximum rates set out on the website www.amundi.lu/Amundi-Funds, except for the Sub-Funds Amundi Funds Cash EUR and Amundi Funds Cash USD, for which the below rates per annum are applied:

The management fees rates and administration fees rates applied have changed during the year for the above Sub-Funds.

Following the suspension of NAV calculation for Amundi Funds Russian Equity, Amundi Luxembourg S.A. has decided to waive its management fees. The same waiver applies to the segregated share class (ISIN LU2600584523) of Amundi Funds Emerging Europe Middle East and Africa, to which all illiquid Russian assets and liabilities have been transferred.

In accordance with the article 46(3) of the law of 17 December 2010, the Management fee rates for the underlying funds of Amundi Funds Protect 90 whose guarantor is part of Crédit Agricole Group, are the following:

With effect from the NAV calculation suspensions for Amundi Funds Russian Equity, Amundi Luxembourg S.A. has decided to waive its management fees.

5 PERFORMANCE FEES

The performance fee is calculated separately for each Class of Shares. It shall be accrued daily, deducted and paid annually for each Class of Shares. The performance fee is calculated by comparing the NAV of the Sub-Fund relevant Class of Shares and the reference asset.
The mechanism applied is further detailed on the website www.amundi.lu/Amundi-Funds
The Sub-Funds and the Classes of Shares subject to a performance fee are listed on the website www.amundi.lu/Amundi-Funds.
For all the classes authorized in Hong Kong please note that no performance fees are applied.

6 TAXATION OF THE FUND

“Taxe d’abonnement”
The Fund is further liable in Luxembourg to a tax of 0.05% per annum in respect of the Equity Sub-Funds, Bond Sub-Funds, Multi Asset Sub-Funds, Protected Sub-Funds and Absolute Return Sub-Funds (except on investments by these Sub-Funds in other undertakings for collective investment established in Luxembourg and already subject to the taxe d'abonnement as per law and of 0.01% per annum in respect of the Cash Sub-Funds, the H classes Category, the I classes Category, the J classes Category, the M classes Category, the O classes Category, the OR classes Category, the SE classes Category, the X classes Category and the Z classes Category of all the Sub-Funds (“Taxe d'Abonnement”), such tax being payable quarterly on the basis of the NAV of the Fund at the end of the relevant calendar quarter. The benefit of the 0.01% per annum Taxe d'Abonnement is available to those Shareholders admitted in the H classes Category, the I classes Category, the J classes Category, the M classes Category, the O classes Category, the OR classes Category, the SE classes Category, the X classes Category and the Z classes Category on the basis of the Luxembourg legal, regulatory and tax provisions as these are known to the Fund at the time of admission of an Investor in such class of shares. However, no guarantee can be given for the past and for the future and such assessment is subject to interpretations on the status of an eligible Investor in the H classes Category, the I classes Category, the J classes Category, the M classes Category, the O classes Category, the OR classes Category, the SE classes Category, the X classes Category and the Z classes Category by any competent authorities as will exist from time to time. Any such reclassification made by an authority as to the status of an Investor may submit the entire class of shares to a Taxe d'Abonnement rate of 0.05% per annum.

Indian Tax
Each sub-fund may be subject to corporation taxes in certain countries in which it invests. Capital gains realised when disposing of Indian securities held by a sub-fund are subject to capital gains tax in India, which is disclosed in the "Statement of operations and changes in net assets" under the heading "Other expenses". The tax is computed on net realised gains, and net realised losses in excess of gains at the end of the financial year in India may, under certain conditions, be carried forward for up to 8 subsequent financial years to offset against future gains. In this respect, short term capital losses (i.e when shares are held for less than 12 months) can be offset either against long term or short term capital gains whereas long term capital losses may only be offset against long term capital gains. Indian tax law imposes a tax of 20% (plus additional surcharge and health and education cess) on net realised gains from Indian securities sold within one year from the date of purchase and a tax of 12.5% (plus additional surcharge and health and education cess) if the Indian securities are sold more than 12 months after the acquisition. This tax of 12.5% on long term capital gains realised on Indian securities has been introduced with effect from 1 April 2018.
Decision to book provisions for Indian tax is captured, by sub-fund, in a detail procedure.
If applicable, daily provisions are booked in the accounts of the sub-fund and are presented in the caption "Other liabilities" of the Statement of net assets.

7 OTHER INCOME

Amounts of other income in the Statement of Operations and Changes in Net Assets include mainly revenues from securities lending and recovery of provisions on performance fees. Amounts of other income as for the Sub-Fund Amundi Funds Emerging Markets Equity Focus, Amundi Funds Asia Equity Focus, Amundi Funds Emerging Markets Equity Select, Amundi Funds Emerging World Equity and Amundi Funds SBI FM India Equity mainly include reversal of indian tax provision.

8 OTHER EXPENSES

Balances for other expenses in the Statement of Operations and Changes in Net Assets mainly include other taxes and costs from securities lending and the fees paid to the directors.
Amounts of other expenses in the Statements of Operations and Changes in Net Assets in the Sub-Funds Amundi Funds Emerging Markets Equity Growth Opportunities and Amundi Funds India Equity Contra mainly include Indian Tax.

9 REVERSE REPURCHASE AGREEMENTS

During the financial year ending 30 June 2026, certain Sub-Funds entered into reverse repurchase contracts, the amount of which being disclosed below in the Sub-Funds currency, by which they lend a certain amount to financial institutions, guaranteed by collateral. On 30 June 2026, loans granted in accordance with these agreements were guaranteed by the following underlying assets.
Counterparty's countries are listed following the ISO 3166-1 standard.
The amount of Investment Grade is referred to bonds rated at least BBB- by S&P, Baa3 by Moody's.
Please refer to the note 17 for detailed collateral information.
